

Zintl Phases

Principles and Recent Developments

Volume Editor: Thomas F. Fässler

With contributions by

J. Evers · U. Häussermann · K. Kovnir · V.F. Kranak ·
G.J. Miller · K. Puhakainen · M.W. Schmidt ·
A.V. Shevelkov · F. Wang · T.-S. You

Springer

Contents

Quantitative Advances in the Zintl–Klemm Formalism	1
Gordon J. Miller, Michael W. Schmidt, Fei Wang, and Tae-Soo You	
High Pressure Investigations on $A^I B^{III}$ Zintl Compounds ($A^I = \text{Li to Cs}$; $B^{III} = \text{Al to Tl}$) up to 30 GPa	57
Jürgen Evers	
Zintl Clathrates	97
Andrei V. Shevelkov and Kirill Kovnir	
Hydrogenous Zintl Phases: Interstitial Versus Polyanionic Hydrides	143
Ulrich Häussermann, Verina F. Kranak, and Kati Puhakainen	
Index	163
