Preface	
Foreword	
Acknowledgments	
Dill Symposium Contributors	

SECTION I: ADVANCES IN ADAPTATIONS TO HEAT

Depressed Chemical Thermogenesis and Hormonal Functions in Heat Harold D. Johnson, Chairperson	3
Historical Perspectives of Adaptation to Heat Steven M. Horvath	11
Some Current Advances in the Study of Adaptations to Exercise in the Heat: Body Fluids and Fluid Loss E. R. Buskirk	27
The New Effective Temperature (ET*)—An Index of Human Adaptation to Warm Environments A. Pharo Gagge, Chairperson	59
Responses of Large Animals to Heat and Exercise C. Richard Taylor	79
Responses of Small Animals to Heat and Exercise Mohamed K. Yousef	91
Anatomical and Physiological Adaptations of Panting Mammals to Heat and Exercise Mary Ann Baker	121

Role of Red Blood Cells in Adaptation to Hard Muscular Exercise with Special Reference to Protein Nutrition—Physiological Meaning of Sports Anemia	147
Hisato Yoshimura and Keizo Shiraki	
Blood Volume Regulation Under Heat Stress	179
Taketoshi Morimoto and Keizo Shiraki	
Heat and Contractile Properties of Skeletal Muscle	191
John A. Faulkner	
Thermogenic Drinking in Rats	205
Melvin J. Fregley and Paul E. Tyler	
 SECTION II: ADVANCES IN ADAPTATIONS TO ALTITUDE	
Famous Fallacies in Altitude Physiology	229
Ulrich C. Luft, Chairperson	
Ontogeny of Physiological Adaptations to Hypoxia	233
Edward F. Adolph	
Historical Excerpts and Personal Anecdotes in Adaptation to Altitude	245
John H. Talbott	
Adaptation to Extreme Altitudes	269
John B. West	
Future Studies in Adaptations to Altitude	281
Robert F. Grover	
Advances in Adaptations to Altitude	291
James L. Whittenberger, Chairperson	
Acid Base Balance at High Altitude: Historical Perspectives	295
Ralph H. Kellogg	
Nutrition at High Altitude	309
John P. Hannon	
Biochemical Adaptations to Exercise and Altitude	329
Loren G. Myhre	
Adaptive Respiratory Regulation—Lessons from High Altitudes	341
Sukhamay Lahiri	
Neuroendocrine Strategies for Adaptation to High Altitude	351
S. Fong Akana and Paola S. Timiras	
Respiratory and Cardiovascular Adaptations of Amphibians and Reptiles to Altitude	363
Stanley D. Hillyard	

SECTION III: ADVANCES IN BIOLOGY OF AGING

Contributions of the Harvard Fatigue Laboratory to Aging Sid Robinson, Chairperson	381
Historical Perspectives on Aging Nathan W. Shock	383
Origins of Aging Leonard Hayflick	399
Some Reflections on Ageism Robert E. Johnson, Chairperson	415
Aging and Exercise Erling Asmussen	419
Aging in American Indian Cultures Steven M. Horvath, Jr.	429
Aging and Adaptation to Stressors Steven M. Horvath	437
Ten Men on a Mountain David B. Dill	453
Index	467
