<u>PART 1.</u>	<u>Theorems of Minkowski and relatives</u>	<u>Page</u>
1.	Conjectures of Ehrhart . . . . .	1
2.	A theorem of Sawyer . . . . .	2
3.	A reformulation of Minkowski's theorem . . . . .	3
4.	Santaló's problem on covering sets . . . . .	4
5.	Minkowski's theorem for particular sets. . . . .	6
6.	The definition of a general lattice and some of its properties . . . . .	7
7.	On a conjecture of Minkowski . . . . .	9
8.	Analogous theorems to Minkowski's using different geometric parameters . . . . .	11
9.	Results and problems on general convex sets and lattice points . . . . .	12
10.	On Minkowski-Hlawka theorem . . . . .	19
11.	On packing, covering and partition . . . . .	20
12.	Minkowskian arrangements . . . . .	25
13.	Theorem of successive minima. The polar reciprocal. . . . .	26
14.	Star bodies . . . . .	30
15.	Sets containing a given number of lattice points. . . . .	34
16.	Lattice points on the boundary of a body. Baker's theorem. . . . .	35
17.	Visible lattice points . . . . .	39
18.	Functionals . . . . .	41

	<u>Page</u>
<u>PART 2. Combinatorial problems . . . . .</u>	44
19. Pick's theorem. Lattice-polyhedron . . . . .	44
20. Lattice-graphs . . . . .	49
21. Theorems on point-sets. Ramsey-type theorems . .	50
22. Probabilistic problems . . . . .	54
 <u>PART 3. Compactness theorems. Abstract lattices . . . .</u>	 56
23. Mahler's compactness theorem . . . . .	56
24. Sequences of lattice arrangements . . . . .	57
25. Abstract lattices . . . . .	63
26. Minkowski's theorem in abstract lattices . . . .	65
 <b>References . . . . .</b>	 67
