

CONTENTS OF EPISTEMOLOGY I

GENERAL PREFACE TO THE <i>TREATISE</i>	v
PREFACE TO <i>EPISTEMOLOGY I & II</i>	xiii
ACKNOWLEDGEMENTS	xvii
SPECIAL SYMBOLS	xix
INTRODUCTION	1
1. Descriptive Epistemology	1
2. Normative Epistemology (Methodology)	4
3. Epistemology and Biology	6
4. Epistemology and Psychology	8
5. The Place of Epistemology	10
6. Uses of Epistemology	13
7. Concluding Remarks	16
 <i>PART I. COGNITION AND COMMUNICATION</i>	 19
1. COGNITION	21
1. The Knowing Subject	23
1.1. The Cognitive Organ	23
1.2. Brain States and Processes	28
2. Cognitive Functions	35
2.1. Perceiving, Thinking, and all that	35
2.2. Learning	42

3. Development and Evolution	50
3.1. Cognitive Development	50
3.2. Cognitive Evolution	57
4. Concluding Remarks	59
2. KNOWLEDGE	61
1. From Cognition to Knowledge	62
1.1. Knowledge Acquisition and Use	62
1.2. Knowledge Evolution	67
2. Modes of Knowledge	72
2.1. Basic Categories	72
2.2. Tacit and Explicit Knowledge	77
3. Belief	80
3.1. Belief System	80
3.2. Belief and Knowledge	86
4. Inquiry	88
4.1. Field of Knowledge	88
4.2. How is Knowledge Possible?	92
5. Concluding Remarks	96
3. COMMUNICATION	97
1. Subject and World	97
1.1. Subject-Object Relation	97
1.2. Inter-Subject Relation	101
2. Social Matrix	103
2.1. Cognitive Habitat and Niche	103
2.2. Learning Community	108
3. Communication	112
3.1. Communication System	112
3.2. Language, Thought, and Reality	120
4. Concluding Remarks	124

<i>PART II. PERCEIVING AND THINKING</i>	127
4. PERCEIVING	129
1. From Sensing to Perceiving	130
1.1. Sensing	130
1.2. Perceiving	133
2. Observing	139
2.1. Direct Observation	139
2.2. Indirect Observation	142
3. Mapping Reality	146
3.1. Perceptual Mapping	146
3.2. Appearance and Reality	150
4. Concluding Remarks	155
5. CONCEIVING	159
1. Concept	159
1.1. From Percept to Concept	159
1.2. Concept Formation	164
2. Proposition	174
2.1. From Thought to Proposition	174
2.2. A Priori and a Posteriori	180
3. Exactification	182
3.1. From Vagueness to Exactness	182
3.2. Quality and Quantity	187
4. Representation	191
4.1. Conceptual Map	191
4.2. Discovery or Invention?	194
5. Concluding Remarks	196
6. INFERRING	199
1. From Spontaneity to Formality	200
1.1. Natural Reasoning	200
1.2. Formal Reasoning	203
2. Plausible Reasoning	210
2.1. Analogical Inference	210
2.2. Statistical Inference and Hypothetical Reasoning	214

- 3. Discussing 218
 - 3.1. Analysis and Criticism 218
 - 3.2. Controversy 224
- 4. Concluding Remarks 228

PART III. EXPLORING AND THEORIZING 231

- 7. EXPLORING 233
 - 1. Exploratory Behavior 233
 - 1.1. Psychobiology of Problems 233
 - 1.2. Sources and Choices 241
 - 2. From Intuition to Method 248
 - 2.1. Intuition 248
 - 2.2. Method 250
 - 3. Approach and Research 258
 - 3.1. Approach 258
 - 3.2. Research 262
 - 4. Analysis of Problems 269
 - 4.1. Logic and Semantics of Problems 269
 - 4.2. Solved, Unsolved, Insoluble 280
 - 5. Concluding Remarks 284
- 8. CONJECTURING 286
 - 1. From Preconception to Hypothesis 286
 - 1.1. Psychobiology of Conjecturing 286
 - 1.2. Hypothesis 290
 - 2. Scope and Depth 297
 - 2.1. Scope 297
 - 2.2. Depth 300
 - 3. Chance and Cause 305
 - 3.1. Probabilistic Hypotheses 305
 - 3.2. Causal Hypotheses 310

4. Requirements	314
4.1. Strength and Precision	314
4.2. Systemicity and Scrutability	318
5. Concluding Remarks	320
9. SYSTEMATIZING	323
1. Classification and Theory	324
1.1. Classification	324
1.2. Theory	331
2. Construction and Reality	340
2.1. Theory Construction	340
2.2. Theory and Reality	350
3. Convention and Law	355
3.1. Convention	355
3.2. Law	359
4. Concluding Remarks	373
<i>APPENDICES</i>	377
1. The Power of Mathematics in Theory Construction: A Simple Model of Evolution	377
2. The Prose Identifying the Variables	380
BIBLIOGRAPHY	383
INDEX OF NAMES	396
INDEX OF SUBJECTS	401
