Introduction	vii
--------------	-----

CHAPTER I

λ -Rings and Chern Classes	1
§1. λ -Rings with Positive Structure	3
§2. An Elementary Extension of λ -Rings	7
§3. Chern Classes and the Splitting Principle	11
§4. Chern Character and Todd Classes	17
§5. Involutions	20
§6. Adams Operations	23

CHAPTER II

Riemann–Roch Formalism	26
§1. Riemann–Roch Functors	27
§2. Grothendieck–Riemann–Roch for Elementary Imbeddings and Projections	32
§3. Adams Riemann–Roch for Elementary Imbeddings and Projections	37
§4. An Integral Riemann–Roch Formula	43

CHAPTER III

Grothendieck Filtration and Graded K	47
§1. The γ -Filtration	47
§2. Graded K and Chern Classes	54
§3. Adams Operations and the Filtration	58
§4. An Equivalence Between Adams and Grothendieck Riemann–Roch Theorems	62

CHAPTER IV

Local Complete Intersections	66
§1. Vector Bundles and Projective Bundles	66
§2. The Koszul Complex and Regular Imbeddings	70
§3. Regular Imbeddings and Morphisms	77
§4. Blowing Up	91
§5. Deformation to the Normal Bundle	96

CHAPTER V

The K -functor in Algebraic Geometry	100
§1. The λ -Ring $K(X)$	102
§2. Sheaves on Projective Bundles	104
§3. Grothendieck and Topological Filtrations	118
§4. Resolutions and Regular Imbeddings	126
§5. The K -Functor of Regular Morphisms	134
§6. Adams Riemann–Roch for Imbeddings	141
§7. The Riemann–Roch Theorems	144
Appendix. Non-connected Schemes	149

CHAPTER VI

An Intersection Formula. Variations and Generalizations	151
§1. The Intersection Formula	152
§2. Proof of the Intersection Formula	157
§3. Upper and Lower K	164
§4. K of a Blow Up	169
§5. Upper and Lower Filtrations	178
§6. The Contravariant Maps f^K and f^G	184
§7. Singular Riemann–Roch	188
§8. The Complex Case	190
§9. Lefschetz Riemann–Roch	192
References	197
Index of Notations	199
Index	201
