

Table of Contents

Chapter I. Foundations of PDO Theory	1
§ 1. Oscillatory Integrals	1
§ 2. Fourier Integral Operators (Preliminaries)	10
§ 3. The Algebra of Pseudodifferential Operators and Their Symbols..	16
§ 4. Change of Variables and Pseudodifferential Operators on Manifolds	31
§ 5. Hypoellipticity and Ellipticity	38
§ 6. Theorems on Boundedness and Compactness of Pseudodifferential Operators	45
§ 7. The Sobolev Spaces	51
§ 8. The Fredholm Property, Index and Spectrum	64
 Chapter II. Complex Powers of Elliptic Operators	 74
§ 9. Pseudodifferential Operators with Parameter. The Resolvent	74
§10. Definition and Basic Properties of the Complex Powers of an Elliptic Operator	82
§11. The Structure of the Complex Powers of an Elliptic Operator	89
§12. Analytic Continuation of the Kernels of Complex Powers	97
§13. The ζ -Function of an Elliptic Operator and Formal Asymptotic Behaviour of the Spectrum	106
§14. The Tauberian Theorem of Ikehara	115
§15. Asymptotic Behaviour of the Spectral Function and the Eigenvalues (Rough Theorem)	122
 Chapter III. Asymptotic Behaviour of the Spectral Function	 126
§16. Formulation of the Hörmander Theorem and Comments	126
§17. Non-linear First Order Equations	127
§18. The Action of a Pseudodifferential Operator on an Exponent	134
§19. Phase Functions Defining the Class of Pseudodifferential Operators	140
§20. The Operator $\exp(-itA)$	143
§21. Precise Formulation and Proof of the Hörmander Theorem	149
§22. The Laplace Operator on the Sphere	157

Chapter IV. Pseudodifferential Operators in \mathbb{R}^n	167
§23. The Algebra of Pseudodifferential Operators in \mathbb{R}^n	167
§24. The Anti-Wick Symbol. Theorems on Boundedness and Compactness	178
§25. Hypoellipticity and the Parametrix. Sobolev Spaces. The Fredholm Property	185
§26. Essential Self-Adjointness. Discreteness of the Spectrum	189
§27. Trace and Trace Class Norm	194
§28. The Approximate Spectral Projection Operator	198
§29. Operators with Parameter	207
§30. Asymptotic Behaviour of the Eigenvalues	215
Appendix 1. Wave Fronts and Propagation of Singularities	221
Appendix 2. Quasiclassical Asymptotic Behaviour of Eigenvalues	232
Appendix 3. Hilbert-Schmidt and Trace Class Operators	249
A Short Guide to the Literature	261
Bibliography	266
Index of Notation	275
Subject Index	277
