

Contents

Location of case studies	ii and iii	Facies class A: gravels, muddy gravels, gravelly muds, pebbly sands, $\geq 5\%$ gravel grade	45
Preface	vii	Facies class B: sands, $\geq 80\%$ sand grade, $< 5\%$ pebble grade	51
Acknowledgements	ix	Facies class C: sand–mud couplets and muddy sands, 20–80% sand grade, $< 80\%$ mud grade (mostly silt)	54
List of tables	xiii	Facies class D: silts, silty-muds, and silt–mud couplets, $> 80\%$ mud, $\geq 40\%$ silt, 0–20% sand	57
1 Introduction	1	Facies class E: $\geq 95\%$ mud grade, $< 40\%$ silt grade, $< 5\%$ sand and coarser grade, $\leq 25\%$ biogenics	58
Introduction	1	Facies class F: chaotic deposits	60
Scientific drilling	4	Facies class G: biogenic oozes ($> 75\%$ biogenics), muddy oozes (50–75% biogenics), biogenic muds (25–50% biogenics) and chemogenic sediments, $< 5\%$ terrigenous sand and gravel	64
Tectonic influence on sedimentation	4		
A view to the future	7		
Organization of the book	7		
Part 1 Facies, processes, sequences and controls			
2 Sediment transport and deposition in the deep sea	13	4 Controls on sedimentation and sequences	69
Introduction	13	Introduction	69
Sediment gravity flows	14	Sediment type and grain size	69
Turbidity currents and turbidites	15	Eustatic and local changes in sea level	72
Debris flows and their deposits	26	Tectonics	74
Deep, thermohaline, clear-water currents	32	Rates of sediment supply and accumulation	76
High-level escape of mud from the shelf	34	Geometry and size of basin	77
Sediment slides	35	Ocean current circulation and Coriolis effect	77
Summary	38	Sequences	80
3 Deep-water facies and depositional processes	41	Milankovitch cyclicity	86
Introduction	41		
Classification scheme	41		

Part 2: Deep-water basin elements

5	Slope aprons and slope basins	91
	Introduction	91
	Major external controls on slope development	95
	Styles of slope deposits	108
6	Submarine canyons, gullies and other sea valleys	133
	Introduction	133
	Characteristics of modern canyons	136
	Ancient submarine canyons	154
	Other modern and ancient deep-marine valleys	155
7	Submarine fans	161
	Introduction	161
	Major controls on submarine fans	164
	Modern fans	169
	Ancient fans	178
	Summary	186
8	Sheet systems	191
	Introduction	191
	1: Modern abyssal plains	192
	11: Modern trench and arc-related basin floors	206
	111: Ancient sheet systems	211
	Summary	215
9	Contourite drifts	219
	Introduction	219
	Major external factors	225
	Styles of contourite deposits	227
	Ancient contourites	238
	Facies model for contourites	242

Part 3: Plate tectonics and sedimentation

10	Evolving and mature passive margins	249
	Introduction	249
	Stratigraphy	251
	Changes in ocean circulation patterns	253
	Failed rift systems	253
	Ocean margin basins associated with rifting	253
	Fragments of ancient passive margins	274
11	Active convergent margins	291
	Introduction	291
	Modern subduction-related systems: forearcs	292
	Trench sedimentation	292
	Preservation of trench stratigraphy and recognition	298
	Forearc basins/slope basins	300
	Forearc summary model	305
	Wet-sediment injections	305
	Marginal/backarc basins	311
	Ancient subduction – accretion systems	327
	Deep-marine foreland basins	331
12	Oblique-slip continental margin basins	343
	Introduction	343
	Modern oblique-slip mobile zones	344
	Ancient deep-marine oblique-slip mobile zones	362
	References	371
	Additional references	402
	Index	403
