

PART ONE

LECTURES ON NEVANLINNA THEORY

by Serge Lang

CHAPTER I

NEVANLINNA THEORY IN ONE VARIABLE

1. The Poisson-Jensen formula and the Nevanlinna functions	12
2. The differential geometric definitions and Green-Jensen's formula	20
3. Some calculus lemmas	29
4. Ramification and second main theorem	34
5. An estimate for the height transform	42
6. Variations and applications, the lemma on the logarithmic derivative	48
Appendix by Zhuan Ye. On Nevanlinna's error term	53

CHAPTER II

EQUIDIMENSIONAL HIGHER DIMENSIONAL THEORY

1. The Chern and Ricci forms	57
2. Some forms on C^n and $P^{n-1}(C)$ and the Green-Jensen formula	66
3. Stokes' theorem with certain singularities on C^n	70
4. The Nevanlinna functions and the first main theorem	78
5. The calculus lemma	85
6. The trace and determinant in the main theorem	87
7. A general second main theorem (Ahlfors-Wong method)	91
8. Variations and applications	102

PART TWO

NEVANLINNA THEORY OF COVERINGS

by William Cherry

CHAPTER III

NEVANLINNA THEORY FOR MEROMORPHIC FUNCTIONS ON COVERINGS OF C

1. Notation and preliminaries	113
2. First main theorem	121
3. Calculus lemmas	126
4. Ramification and the second main theorem	128
5. A general second main theorem	131

CHAPTER IV

EQUIDIMENSIONAL NEVANLINNA THEORY ON COVERINGS OF C^n

1. Notation and preliminaries	143
2. First main theorem	151
3. Calculus lemmas	154
4. The second main theorem without a divisor	156
5. A general second main theorem	158
6. A variation	167
