

Table of Contents

Chapter I. Preliminaries	1
1. Abelian Schemes and Polarizations	1
2. Semi-Abelian Schemes and Tori	7
3. Deformation of Abelian Varieties	14
4. Review of Algebraic Stacks and Artin's Method	15
5. Algebraic Theory of Theta Functions	24
6. Complex Uniformization of A_g	29
Chapter II. Degeneration of Polarized Abelian Varieties	31
0. Introduction	31
1. Review of Raynaud Extensions	33
2. The Dual Variety	34
3. The Setup	36
4. The Completely Degenerate Case: A Trivial	37
5. The General Case: Abelian Part Non-Trivial	42
6. Complements	50
Chapter III. Mumford's Construction	53
0. Introduction	53
1. Review of the Basic Ideas	54
2. Semi-Abelian Degeneration Data	56
3. Relatively Complete Models	59
4. The Construction of the Quotient	64
5. Functoriality of Mumford's Construction	67
6. Behavior of \otimes , Pullback, Dual Under Mumford's Construction	71
7. Full Faithfulness of Mumford's Construction	76
8. Examples	77
9. Kodaira-Spencer Class	79
10. Globalization and 2-Step Constructions	87
Chapter IV. Toroidal Compactification of A_g	93
1. Strategy of the Construction of \bar{A}_g	93
2. Admissible Polyhedral Cone Decompositions	96

3. Construction of Local Charts: Formal Theory	102
4. Construction of Local Charts: Algebraization	109
5. Construction of \bar{A}_g : Gluing Good Algebraic Models	112
6. Principal Level-Structures	120
7. Theta Level Structures	132
 Chapter V. Modular Forms and the Minimal Compactification	 136
0. Introduction	136
1. Modular Forms and Their q -Expansions	137
2. Construction of the Minimal Compactification A_g^*	147
3. Modular Forms and Classical θ -Series	156
4. Applications to Diophantine Geometry	167
5. Projectivity of $\bar{A}_{g,n}$	172
6. Extension Theorems	180
7. p -adic Monodromy	192
 Chapter VI. Eichler Integrals in Several Variables	 194
1. Compactification of the Universal Abelian Variety	194
2. Computation of Formal Cohomology	207
3. Ω_X^* -Modules and \mathcal{D}_X -Modules	210
4. Extending Vector Bundles	219
5. The BGG-Complex and Eichler Integrals	227
6. Other Cohomology Theories	237
 Chapter VII. Hecke Operators and Frobenii	 243
1. The Unramified Local Hecke Algebra and Its Structure	243
2. Algebraic and Cohomological Intersections	248
3. Hecke Operators as Algebraic Correspondences Outside Characteristic p	250
4. Isogenies in Characteristic p	259
5. Applications	267
 Bibliography	 269
Glossary of Notations	275
Index	279
 Appendix	
An Analytic Construction of Degenerating Abelian Varieties over Complete Rings	
David Mumford	281
