

Contents

Preface	iii
Participants	ix
1. Butler Groups, Representations of Finite Posets, and Modules over Multiple Pullback Rings <i>David M. Arnold</i>	1
2. Left Almost Serial Rings and the Cartan Determinant Conjecture <i>W. D. Burgess and K. R. Fuller</i>	19
3. Tilting and the Cartan Determinant <i>R. R. Colby</i>	29
4. A Cotilting Theorem for Rings <i>R. R. Colby</i>	33
5. Direct Sums and Subdirect Products <i>John Dauns</i>	39
6. Examples of Reflexive Modules <i>Frank DeMeyer and Kim Regnier</i>	67
7. E-Uniserial Abelian Groups <i>Manfred Dugas and Bruce Olberding</i>	75

8.	Category Equivalences Induced by Hom and Tensor Functors <i>Theodore G. Faticoni</i>	87
9.	A Note on Proper Classes of Exact Sequences <i>Anthony J. Giovannitti</i>	107
10.	Bimodules over PI Rings <i>Robert M. Guralnick</i>	117
11.	A Characterization of Dedekind-Like Orders that Are Bass <i>Jeremy Haefner and Lee Klingler</i>	135
12.	The Ratliff-Rush Ideals in a Noetherian Ring: A Survey <i>William Heinzer, Bernard Johnston, David Lantz, and Kishor Shah</i>	149
13.	Syzygies and Homological Dimensions over Left Serial Rings <i>Birge Zimmermann Huisgen</i>	161
14.	Some New K -Theoretic Invariants for Commutative Rings <i>Steven E. Landsburg</i>	175
15.	Direct-Sum Cancellation and Genus Class Groups <i>Lawrence S. Levy</i>	203
16.	Orders in Block Matrix Rings <i>M. S. Li and J. M. Zelmanowitz</i>	219
17.	On Certain Classes of QI Rings <i>S. R. López-Permouth and S. T. Rizvi</i>	227
18.	Colorings of Planar Maps and Residues of 1-Forms <i>Rick Miranda</i>	237
19.	The Structure of Serial Rings <i>Bruno J. Müller</i>	249
20.	Examples of Non-Finitely Generated Projective Modules <i>John D. O'Neill</i>	271
21.	Artinian Rings with Linearly Ordered Two-Sided Ideals <i>Barbara L. Osofsky and Richard Resco</i>	279
22.	Gradability of Algebras <i>Manuel Saorín</i>	285

23.	A Change of Rings for Finitistic Dimension <i>Jay Shapiro</i>	303
24.	Modules Approximated by Projectives <i>Roger Wiegand</i>	311
