List of Tables and Figures

Table 2.1	Employment profile, cross-regional comparison, 1990–92	9
Table 2.2	Characteristics of the economically active population of various Arab countries, 1980s, 1990s	16
Table 2.3	Participation of women in manufacturing, some Arab countries and selected NICs	20
Table 2.4	Distribution of female labour force by occupation, major groups, 1980s	26
Table 4.1	Basic indicators: Algeria, Morocco, Tunisia	51
Table 4.2	Population indicators: Algeria, Morocco, Tunisia	54
Table 4.3	Illiteracy trends: Algeria, Morocco, Tunisia	56
Table 4.4	Students enrolled, female percentage and male:female ratio, at different educational levels (1987–88): Algeria, Morocco, Tunisia	57
Table 4.5	Economically active population by industry and percentage female: Algeria, Morocco, Tunisia	58
Table 4.6	Economically active population by occupation and percentage female: Algeria, Morocco, Tunisia	60
Table 6.1	Summary schedule of the most important rules concerning women in the social security law in Lebanon	100
Table 6.2	Distribution of Lebanese economically active and highly educated population by sex, 1970–90	105
Table 6.3	Distribution of highly educated economically active women by economic sector in Lebanon	108

Table 6.4	Women University Age-Specific Activity Rate, Lebanon	110
Table 6.5	Distribution of employment among highly educated females in Lebanon	112
Table 6.6	Analysis data for integration of highly educated females in the labour force in Lebanon	114
Table 6.7	Coefficient of correlation between different variables	115
Table 6.8	Population by major age groups and sex, Lebanon 1970–90	118
Table 6.9	Student enrolment by level of education and sex, Lebanon 1970–90	118
Table 6.10	Non-schooled population of 15 years and over, by level of education and sex, Lebanon 1970–90	119
Table 6.11	Economically active population by age group and sex, Lebanon	119
Table 6.12	Economically active population by type of activity and sex, Lebanon	120
Table 6.13	Employment by type of profession, secondary and university level of education and sex, Lebanon	121
Table 7.1	Some labour-force indicators for Jordan, 1952, 1961, 1979 and 1985	128
Figure 8.1	Schematic representation of study design for one sample village from ILO/CAPMAS Egyptian Methods Test survey using three treatment factors (interviewer type, questionnaire type, respondent type)	150
Table 8.1	Presence of other persons at the Methods Test interview by gender of interviewer, respondent type and questionnaire type	160
Table 8.2	Interviewers' assessment of the effect of other persons' presence in Methods Test on responses, tabulated by questionnaire type, interviewer type and respondent type	162
Table 8.3	Comparison of activity rates for nineteen activities and four labour-force definitions (for the past year) for keyword questions and activity schedule as reported by self-respondents and proxy-respondents	164
Table 8.4	Comparison of activities reported by self-respondents and proxy-respondents for four aggregate labour-force definitions for past week, past season and past year reference periods	166

Table 8.5	Comparison of results for number of hours worked by women in the labour force for self-respondents and proxy-respondents for past week and past season reference periods	168
Table 8.6	Comparison of activity rates (for past year) for nineteen activities based on responses to keyword questions and activity schedule	171
Table 8.7	Comparison of results for four aggregate labour-force definitions based on keyword questions and activities schedule for past year, past season and past week reference periods	172
Table A1	Human development index, Arab countries	178
Table A2	Profile of human development, Arab countries	179
Table A3	Trends in human development, Arab countries	180
Table A4	Human capital formation, Arab countries	181
Table A5	Female–male gaps, Arab countries	182
Table A6	Education flows, Arab countries	183
Table A7	Education imbalances, Arab countries	184
Table A8	Employment, Arab countries	185
Table A9	Wealth, poverty, and social investment, Arab countries	186
Table A10	Military expenditure and resource use imbalances, Arab countries	187
Table A11	Urban crowding, Arab countries	188
Table A12	Demographic change, Arab countries	189
Table A13	Aggregates of human development indicators, Arab states compared with Latin America and the Caribbean	190
