

Preface
Proceedings of the 100th Anniversary symposium
JÜRGEN DREWS

First Part:
Proceedings

Opening Session

Welcome Address	3
FRITZ GERBER	

Genomic Sciences and the Medicine of Tomorrow	5
JÜRGEN DREWS	

Opening Lecture: Beyond the Human Genome Project	11
ERIC LANDER	

Opening Lecture: Medical and Social Consequences of the Human Genome Project	21
DAVID WEATHERALL	

Oncology Session

Chair: MARY-CLAIRE KING

The VHL Tumor Suppressor Gene Product: Interactions, Intercellular Trafficking and Occluded Function . . .	31
RICHARD KLAUSNER	

Question and Answer Session

Opening Lectures and Oncology Session	35
---	----

Immunology Session

Chairs: FRITZ MELCHERS and LEROY HOOD

Immunology and Complexity	39
LEROY HOOD	

Studying Diseases of the Immune System Through the Mutation and Amplification of Genes	45
KLAUS RAJEWSKY	

Reconstitution of Selective Hematopoietic Lineages and Hematopoietic Environments in vivo	51
HANS-REIMER RODEWALD	

Neurobiology Session

Chair: CHARLES WEISSMANN

Genes, Synapses and Long-Term Memory	59
ERIC KANDEL	

The Genetics of Alzheimer's Disease	69
JOHN HARDY	

The Molecular Genetics of Prion Disease	75
CHARLES WEISSMANN	

Metabolic/Heart Diseases Session

Chair: JAN BRESLOW

Apolipoprotein Genes, Lipoprotein Metabolism and Atherosclerosis	81
JAN BRESLOW	

Molecular Genetics of Human Blood Pressure Variation	89
RICHARD LIFTON	

Endothelins: From Vascular Biology to Developmental Genetics . . .	93
MASASHI YANAGISAWA	

Gene Therapy Session

Chair: JAMES WILSON

Immunology of Adenovirus Vectors	99
JAMES WILSON	

Recombinant Gene Transfer: Lessons from Viruses and Applications to Human Disease	107
GARY NABEL	
Gene Transfer into Lympho-Hematopoietic Cells for the Treatment of Genetic and Acquired Diseases	113
CLAUDIO BORDIGNON	
Podium Discussion	115
Chair: ERIC LANDER	
Wrap-up Session	
The Future is the Past, Only Better	119
DAVID BALTIMORE	
Concluding Remarks	125
JÜRGEN DREWS	
 Second Part: The Speakers	
Curricula Vitae of the Speakers	129
 Index	 157
