Collections Cited	533
Annual Reports Examined	535
Index	537

Figures and Tables

Figures

1.1	Adolf Meyer	<i>page</i> 19
2.1	The Moniz leucotome	49
2.2	John Fulton and Lucia Wheatland Fulton on holiday	59
2.3	John Fulton and his mentors	61
2.4	John Fulton and chimpanzee Yam	62
2.5	Diagram of apparatus used in delayed-response test	65
2.6	James W. Watts at Yale	70
2.7	Walter Freeman	74
2.8	John Fulton dictating correspondence in his office	88
3.1	John Fulton and his poster exhibit at the 1939 AMA Meeting	103
3.2	Edward Strecker	121
3.3a,b	Diagram of a Freeman and Watts standard lobotomy	136
3.4	Walter Freeman and James W. Watts performing a lobotomy	140
4.1	Psychosurgery in American mental institutions, 1936-1951	148
4.2	Incontinent ward, Byberry State Hospital	149
4.3	U.S. state hospital population, 1903-1942	153
4.4	Construction of state hospitals in the United States, by decade	155
4.5	Shock therapy in American mental institutions, 1936-1942	158
4.6	Patient receiving insulin shock	159
5.1	Card used to rate progress in a lobotomy patient	224
5.2	Resistance in a patient chosen for lobotomy	230
6.1	McLean Hospital in winter	243

6.2	McLean Hospital recreation	244
6.3	McLean Hospital staff	250
6.4	Psychosurgery at McLean Hospital, 1938-1954	284
6.5	Psychosurgery at McLean Hospital, 1938-1954: hospitalization versus age at operation	285
6.6	Psychosurgery at McLean Hospital, 1938-1954: hospitalization and age, by diagnosis	287
6.7	Psychosurgery at McLean Hospital, 1938-1954: diagnosis, by sex	287
6.8	Residents at McLean Hospital on 1 January 1948: diagnosis, by sex	290
6.9	Patients at McLean Hospital: comparison of psychosurgery and nonpsychosurgery populations	294
6.10	Male schizophrenia patients at McLean Hospital: comparison of psychosurgery and nonpsychosurgery populations	294
6.11	Male patients with hebephrenia at McLean Hospital: comparison of psychosurgery and nonpsychosurgery populations	295
6.12a-d	Female patients at McLean Hospital: comparison of psychosurgery and nonpsychosurgery populations	296
6.13	Female patients with catatonic schizophrenia at McLean Hospital: comparison of psychosurgery and nonpsychosurgery populations	297
7.1	Psychosurgery publications in U.S. medical literature, 1936-1955	319
7.2	Variant forms of psychosurgery	320
7.3	Transorbital lobotomy tools	338
7.4	Transorbital lobotomy operation	339
E.1	Walter Freeman's postcard greetings	406
A.1	Psychosurgery at McLean Hospital, 1938-1954: age at operation	449
A.2	Psychosurgery at McLean Hospital, 1938-1954: prior hospitalization, by sex	449
A.3	Psychosurgery at McLean Hospital, 1938-1954: diagnostic cross-over	450
A.4	Residents at McLean Hospital on 1 January 1948: age, by sex	450
A.5	Residents at McLean Hospital on 1 January 1948: prior hospitalization, by sex	451

A.6	Residents at McLean Hospital on 1 January 1948: future hospitalization versus past hospitalization	451
A.7	McLean Hospital 1948: residents and admissions, by age	452
A.8	McLean Hospital 1948: new admissions, by diagnosis and sex	452

Tables

A.1	Profile of psychosurgery patients at McLean Hospital, 1938-1954	443
A.2	Profile of all residents at McLean Hospital on 1 January 1948	444
A.3	Hospitalization patterns of residents in McLean Hospital on 1 January 1948	445
A.4	Profile of patients admitted to McLean Hospital during 1948	446
A.5	McLean Hospital 1948, new admissions and residents compared by sex and diagnosis	447
