## PART I DECISIONS INVOLVING A SINGLE ACTOR

<b>Introduction: An Overview of Decision Theory</b>	<b>3</b>
Branches of decision theory	4
Multi-objective decision problems	6
Social choice as a multi-objective decision problem	7
Descriptive decision theory	7
<b>1 Orders and Scales</b>	<b>10</b>
Binary relations	10
Orders induced by a preference relation	11
Utilities determined on a ratio scale	17
Construction of a ratio scale of preference	19
Empirical determination of the utility function	21
<b>2 Optimization</b>	<b>26</b>
Linear programming	30
The simplex method	34
The primal and the dual	39
The general optimization problem	42
Dynamic programming	46
<b>3 Decisions under Uncertainty and Risk</b>	<b>50</b>
The principle of insufficient reason	50
The maximin principle	51
The maximax	51
The Hurwicz- $\alpha$	52
Minimax regret	52
Criteria to be satisfied by a decision rule	53
Some aspects of behaviour in decision situations under uncertainty	57
The Ellsberg paradoxes	60
Decisions under risk	62
Expected gain and expected utility	64
Value of information	66
The three condemned men	67
Cost-benefit analysis of information acquisition	68
Statistical decisions	74

The value and limitations of mathematical models in theories of decision under risk	80
<b>4 Subjective Aspects of Risk</b>	<b>82</b>
Misconceptions about risk	89
Assessment of subjective probabilities	97
Pejorative connotations of risk	100
<b>5 Modifications and Generalizations of Expected Utility Theory</b>	<b>105</b>
Theory of prospects	108
Regret in decision-making	118
Generalized expected utility analysis	123
Experimental test of the generalized utility model	130
Is generalization of EU an extension of rationality?	133
<b>6 Multi-objective Decisions</b>	<b>136</b>
Expected utility and additivity	143
Experimental test of SEU, SEV, EU and EV theories	144
Lexicographic ordering	148
An application of the EBA model	153
The matching problem	156
<b>7 Theory of Social Choice</b>	<b>160</b>
Axiomatization of desiderata of a social choice function	161
The liberalism paradox	168
Alternative approaches to the problem of social choice	170
Condorcet functions	171
<b>8 Individual Psychology of Decision-making</b>	<b>174</b>
Cognitive dissonance	178
Cognitive balance	180
Conflict decision theory as an extension of cognitive dissonance	181
Limitations of freedom of choice	183
<b>PART II NON-COOPERATIVE GAMES</b>	
<b>9 Two-person Constant Sum Games</b>	<b>189</b>
Solving two-person zero sum games by the simplex method	197
Intuitive approaches to solutions of two-person constant sum games	201
The theoretical importance of two-person constant sum games	206
<b>10 Some Topics in Continuous Games</b>	<b>208</b>
Games of timing	208
Differential games	214
Some interesting examples of differential games	222

<b>11 Two-person Non-constant Sum Games</b>	<b>226</b>
What is the most 'rational' outcome?	230
Payoff dominance and risk dominance	231
Stability	232
Perfectness	234
A taxonomy of $2 \times 2$ games	238
Types of experiments with $2 \times 2$ games	240
Comparisons of performances in iterated chicken and prisoner's dilemma	241
Top dog-underdog	242
Benevolence and trust	246
Opposite pressures in prisoner's dilemma	249
The effect of others' strategy in iterated prisoner's dilemma	250
Psychological pressures in a 'top dog-underdog' game	251
Non-monotonic pressures in chicken	252
<b>12 Social Dilemmas</b>	<b>254</b>
Independent and interdependent maximization	254
Parasitism and Symbiosis	256
Game models of social dilemmas	257
Public goods and private interest	258
Generalized prisoner's dilemma	259
Two paradoxes of backward induction	260
The chain store paradox	261
Tragedy of the commons	262
Volunteer's dilemma	263
Groups-size effects in $n$ -person social traps	266
The Platonia dilemma	268
The largest number game	271
<b>13 Applications of Game Theory in Biology</b>	<b>273</b>
Evolutionary games	274
A timing game with a unique ESS	277
Evolutionary dynamics	279
Simulating the evolution of cooperation	281
A simulation experiment with human subjects	283
Reputation effects	286
The blurred boundary between competition and cooperation	290
<b>14 Theory of Voting</b>	<b>297</b>
Voting strategies	301
The case of the unqualified librarian	304
Sophisticated voting	306
The chairman paradoxes	308

**PART III COLLECTIVE DECISIONS**

<b>15 Two-person Cooperative Games</b>	<b>315</b>
Zeuthen's model of bargaining	320
Nash's solution of the two-person cooperative game	321
The individualistic orientation in Nash's solution	324
Experiments with $2 \times 2$ cooperative games	325
Other approaches to solutions of cooperative games	332
<b>16 N-person Cooperative Games</b>	<b>337</b>
Stable sets	341
The Shapley Value	343
Comparison of the stable set, the Shapley Value and the core	345
The nucleolus	346
Comparison of the four solutions of the small market game	348
Rationales for the various solution concepts	351
<b>17 The Allocation Problem</b>	<b>354</b>
Game-theoretic approaches to the allocation problem	355
Tests of game-theoretic solutions of allocation problems	357
Allocation of aircraft landing fees	362
<b>18 Indices of Power</b>	<b>366</b>
Power of political coalitions	367
The problem of choosing an index of power	371
External validity of power indices	372
Power and satisfaction	374
The case for proportional representation in electoral systems	378
<b>19 Theories of Coalition Formation</b>	<b>383</b>
Experiments in coalition formation	384
Formation of political coalitions	387
A game-theoretic approach to formation of political coalitions	388
<b>20 Game-theoretical Concepts in Economics</b>	<b>394</b>
Allocation of resources in a competitive economy	394
The Edgeworth market	398
Generalized coalition structure: 'leaks in the cliques'	405
Games and markets that generate them	408
The problem of reductionism: can a macroworld be derived from a microworld?	411
Utility of theories	415
The emergence of institutions	416

<b>21 Psychology of Collective Decision-making</b>	<b>418</b>
Amplification of probabilistic preference	419
The 'risky-shift' effect	422
Quality of group decisions in real life situations of momentous import	426
<b>Concluding Remarks</b>	<b>434</b>
<i>Glossary of Symbols and Terms</i>	441
<i>Notes</i>	446
<i>References</i>	451
<i>Name Index</i>	459
<i>Subject Index</i>	462
