# Contents

Preface to the Second Edition, vii

## **Part 1: Laboratory Practice**

- 1 Safety in the Chemical Laboratory, 3
- 2 Glassware and Equipment in the Laboratory, 15
- 3 Organic Reactions: from Starting Materials to Pure Organic Product, 69
- 4 Qualitative Analysis of Organic Compounds, 204
- 5 Spectroscopic Analysis of Organic Compounds, 276
- 6 Keeping Records: the Laboratory Notebook and Chemical Literature, 397

## **Part 2: Experimental Procedures**

Introduction, 421

List of Experiments, 424

Experiments which can be Taken in Sequence, 427

Experiments which Illustrate Particular Techniques, 428

- 7 Functional Group Interconversions, 429
- 8 Carbon–Carbon Bond-Forming Reactions, 522
- 9 Projects, 612

Appendices, 667

Index of Chemicals, 699

General Index, 705
