<i>Clinical Guides to Medical Management</i>	Burton E. Sobel	iii
<i>Foreword</i>	Claude Lenfant	v
<i>Preface</i>		vii
<i>Introduction</i>		ix
<i>Contributors</i>		xv
1. Lipid Lowering		1
<i>John C. LaRosa</i>		
2. Role of Antioxidants in Prevention of Coronary Artery Disease		31
<i>Joseph L. Witztum</i>		
3. High Blood Pressure and Atherogenesis		43
<i>William J. Elliot and Henry R. Black</i>		
4. Smoking and Atherogenesis		65
<i>Thomas E. Kotke, Antonio Cabrera, and Miriam A. Marquez</i>		
5. Lifestyle Interventions in Atherosclerosis		91
<i>Neil J. Stone</i>		
6. Effects of Gonadal Hormones on Atherogenesis		125
<i>Robert H. Knopp, Bartolome Bonet, and Xiaodong Zhu</i>		
7. Adjunctive Nonlipid-Lowering Strategies for the Therapy of Atherosclerosis		163
<i>Bertram Pitt</i>		

8. Prevention of Atherosclerosis in Clinical Practice <i>Robert A. Vogel</i>	197
9. Economics of Medical Management of Atherogenesis: Cost-Effectiveness Analyses of Medical Interventions <i>Orlando Rodriguez and David J. Cohen</i>	221
10. Applied Genetics Now and Gene Therapy in the Future <i>Roger R. Williams, Paul N. Hopkins, Lily Wu, and Steven C. Hunt</i>	247
11. Acute and Chronic Lesions in the Epicardial Coronary Arteries in Patients with Symptomatic and Fatal Myocardial Ischemia <i>William C. Roberts</i>	269
12. Insulin Resistance and Atherosclerosis <i>Ronald B. Goldberg</i>	283
<i>Index</i>	317
