Colour plates appear between pages 112 and 113

<b>List of contributors</b>	xiii
<b>Preface</b>	xv
 Part One Diagnostic Tests	 1
<b>1 The biochemical investigation of renal disease</b>	<b>3</b>
<i>Aram Rudenski, Les Culank and Terence Kealey</i>	
Epithelial physiology	3
Renal glomerular physiology	5
Renal tubular physiology	6
Renal electrolyte and acid-base handling	8
Tests of glomerular function	11
Tests of tubular function	14
Renal failure	19
Further reading	23
 <b>2 Haematology</b>	 <b>25</b>
<i>John Bradley</i>	
Anaemia	25
Polycythaemia	27
Leucocyte abnormalities in renal failure	27
Coagulation	28
Further reading	31
 <b>3 Examination of the urine</b>	 <b>33</b>
<i>Peter Mathieson</i>	
Taking the history	33
The urine	35
Dipstick testing	36

Further analysis of proteinuria	36
Urine microscopy	38
Urinary infection	41
Assessment of haematuria	41
Urinary electrolytes	42
Urine abnormalities in renal stone disease	43
Other urinary parameters	44
Conclusions	45
Further reading	45
 <b>4 Immunological tests in nephrology</b>	 47
<i>David Oliveira</i>	
Complement	47
Antiglomerular basement membrane antibodies	52
Antineutrophil cytoplasmic antibodies	55
Other autoantibodies of nephrological significance	57
Immunoglobulins and paraproteins	58
Circulating immune complexes	60
HLA typing in renal disease	60
Effects of renal failure on immune function	61
Reference	62
Further reading	62
 <b>5 Radiology</b>	 63
<i>Simon McPherson and David Lomas</i>	
Introduction	63
Renal vascular disorders	64
Renal parenchymal disease	67
Renal collecting ducts and pelvis	74
Renal transplantation	77
Musculoskeletal imaging	79

Haemodialysis and transplantation	80
Further reading	81
<b>6 Nuclear medicine</b>	<b>83</b>
<i>Philip Wraight</i>	
Radionuclide methods	83
Clinical applications	90
References	94
Further reading	94
<b>7 Renal biopsy</b>	<b>95</b>
<i>Sathia Thiru</i>	
Types of biopsy material	95
Renal histology	96
Handling the biopsy	97
Interpretation of renal biopsy	100
Aspects of renal biopsy	101
Glomerular disorders	102
The kidney in systemic diseases	118
Tubulointerstitial nephritis	130
References	130
Further reading	130
<b>8 Inherited renal diseases and genetic counselling</b>	<b>131</b>
<i>Richard Sandford</i>	
Introduction	131
Disease classification	132
Genetic counselling in renal disease	134
Current understanding of renal genetic diseases	136
References	155
Further reading	155

<b>9 Diagnosis of acute renal failure</b>	<b>159</b>
<i>Linda De Luca</i>	
Introduction	159
Clinical presentation	161
Evaluation of urinary indices and urinary sediment	165
Other laboratory investigations	167
Radiographic studies	169
Renal biopsy	170
Conclusion	171
Acknowledgement	171
References	171
Further reading	173
 <b>10 Chronic renal failure</b>	 <b>175</b>
<i>Patricia Campbell and Allan Murray</i>	
Diagnosis of the etiology of chronic renal insufficiency	175
Assessment of the adequacy of dialysis	183
Nutritional assessment of patients with chronic renal failure	193
Complications of renal disease	199
References	212
Further reading	213
 <b>11 Transplantation</b>	 <b>215</b>
<i>Siân Griffin and Ken Smith</i>	
Introduction	215
Pretransplant assessment: recipient	215
Pretransplant assessment: donor	224
Evaluation of transplant function	226
Immunosuppression	232

Surveillance for the long-term effects of immunosuppression	238
Conclusion	240
References	241
Further reading	242
<b>12 Hypertension</b>	<b>243</b>
<i>John Bradley</i>	
History and examination of hypertensive patients	243
Target organ damage	244
Identification of the underlying causes of hypertension	245
Implications for treatment of investigations	250
References	251
Further reading	251
<b>13 Pregnancy</b>	<b>253</b>
<i>Lukas Foggensteiner</i>	
Normal renal and cardiovascular physiology of pregnancy	253
Renal investigations in pregnancy	255
Renal conditions in pregnancy	257
References	265
Further reading	265
<b>14 Pediatric renal disease</b>	<b>267</b>
<i>Vikas Dharnidharka, Matthew Hand, Stephen Alexander and David Briscoe</i>	
Introduction	267
History and physical examination	267
Urinary tract infections	269
Hematuria and proteinuria	272
Nephrotic syndrome	275
Hemolytic uremic syndrome	277

Hypertension	279
Congenital renal diseases	281
Renal failure in neonates	286
References	287
Further reading	288
<b>Index</b>	<b>289</b>
