

Table of Contents

Preface	V
Table of Contents	VII
List of Authors	IX

I Geometric Evolution Problems

Introduction	3
Geometric evolution problems, distance function and viscosity solutions	5
L. Ambrosio	
Variational models for phase transitions, an approach via Γ -convergence ..	95
<i>G. Alberti</i>	
Some aspects of De Giorgi's barriers for geometric evolutions	115
<i>G. Bellettini, M. Novaga</i>	
Partial Regularity for Minimizers of Free Discontinuity Problems with p-th Growth	153
<i>A. Leaci</i>	
Free discontinuity problems and their non-local approximation	171
<i>A. Braides</i>	

II Degree Theory on Convex Sets and Applications to Bifurcation

Introduction	183
Degree theory on convex sets and applications to bifurcation ...	185
E. N. Dancer	
Nonlinear elliptic equations involving critical Sobolev exponents	227
<i>D. Passaseo</i>	
On the existence and multiplicity of positive solutions for semilinear mixed and Neumann elliptic problems	243
<i>G. Cerami</i>	

Solitons and Relativistic Dynamics	259
<i>V. Benci, D. Fortunato</i>	
An algebraic approach to nonstandard analysis	285
<i>V. Benci</i>	
References	327
Index	345
