

Contents

Preface	xiii
---------------	------

Part One Concepts

Chapter 1 Introduction

1.1 Overview	3
1.2 Organizations and their Software	3
1.3 Background	4
1.4 Readership	5
1.5 Structure of the Book	5
1.6 Related Web Pages	6
1.7 Using the Book	7

Chapter 2 Positioning

2.1 Introduction	9
2.2 Organizations	10
2.3 The Themes of this Book	12
2.4 Systems Theory	13
2.5 The Software Engineering Research Lineage	22
2.6 The Wider World	26
2.7 Conclusion	30

Chapter 3 Process Concepts

3.1 Introduction	31
3.2 The Process Phenomenon	32
3.3 The Interactional Basis of Process Activity	35
3.4 Kinds of Process	38
3.5 Associated Concepts	39
3.6 Process Representation and Models	40
3.7 Process Domains	46
3.8 More about the Meta-Process	48
3.9 Conclusion	53

Chapter 4 Engineering of Processes

4.1 Introduction	55
4.2 Historical Development	56
4.3 The Engineering Approach to Solving Problems	57

4.4 The Engineering of Software in Organizations	60
4.5 Process Engineering as a Discipline	61
4.6 Conclusion	63

Part Two Practice

Chapter 5 The Nature of the Method

5.1 Introduction	67
5.2 An Introduction to the Case Study	68
5.3 Some Systems Thinking about the Nature of the Intervention	70
5.4 The Interactional Basis of Organizational Process	72
5.5 The Evolution of Organizational Process	78
5.6 Conclusion	83

Chapter 6 Process Contexts

6.1 Introduction	85
6.2 The Context for Process Modelling	86
6.3 The Context of the PEF Corporate Team Case Study	89
6.4 Context of the Process	91
6.5 Route Map	93
6.6 Evaluation	94
6.7 The Broader Dialectic	94
6.8 Conclusion	95

Chapter 7 Process Capture

7.1 Introduction	97
7.2 The What, the Why and the How	98
7.3 The Modelling Notations	102
7.4 Managing the Modelling Exercise	103
7.5 The Participation of Users	105
7.6 Creating the Model	108
7.7 Modelling the System	109
7.8 Modelling the Goals	112
7.9 Modelling the Method	118
7.10 The Broader Dialectic	136
7.11 Conclusion	137

Chapter 8 Process Design

8.1 Introduction	139
8.2 Using OPM for Design	142
8.3 The Design Domain at Parker, Ellington and Fitzgerald	143
8.4 Process Design Examples	148
8.5 The Broader Dialectic	176
8.6 Conclusion	177

Chapter 9 Process Managing

9.1 Introduction	181
9.2 The Problem and its Context	183

9.3 The Meta-Process as a Solution	184
9.4 The Approach to the Solution	186
9.5 A Role as a P2E	196
9.6 Conclusion	197
Chapter 10 Process Support Technology	
10.1 Introduction	199
10.2 Views of Process Support Technology	201
10.3 Motives for an Active Model	201
10.4 Requirements for Active Modelling Technology	203
10.5 Manage Documents or Manage Workspaces	206
10.6 An Example ProcessWeb Model	208
10.7 Generic Process Support System Architecture	210
10.8 From RAD to ProcessWeb Model	213
10.9 ProcessWise Integrator User View	218
10.10 Other Process Support Technologies	219
10.11 Managing, Learning and Developing	222
10.12 Conclusion	224
Chapter 11 The OPM Case Study	
11.1 Introduction	227
11.2 A Review	227
11.3 The Context	228
11.4 Interaction of Administrator, Broker, Underwriter	230
11.5 Broker Interacts with Underwriter	237
11.6 Underwriter Interacts with Administrator	239
11.7 Interaction of Administrator, Underwriter, Administrator	243
11.8 Sub-Roles	246
11.9 Conclusion	250
Chapter 12 Conclusion	
12.1 Organizations and their Software	251
12.2 A Process Approach	252
12.3 Review	252
12.4 A Way Forward	254
References	255
Index	259
