

CONTENTS

Preface xi

1 What's So Cultural about Disease? 1

Culture in Medicine 2

Disease in Other Cultures and Times 3

Impact of Culture on Contemporary Biomedicine 4

Development of Medical Anthropology 8

Medicine as a Social Process: William H. R. Rivers 8

Functional Views of Medicine: Erwin Ackerknecht 9

Applied Roots of Medical Anthropology 10

Medical Anthropology Today 11

Summary: Placing Medical Anthropology among the Social Sciences of Medicine 12

Suggested Readings 13

Notes 14

2 Anthropological Questions and Methods in the Study of Sickness and Healing 17

Studying Shamans in Peru 18

Research Questions 18

Research Methods 20

From Fieldwork to Analysis and Interpretation 20

Studying Medicine in the United States 22

Organ Transplantation as an Anthropological Subject 22

Research Questions 23

Research Methods 27

Summary: Anthropological Vision 29

Suggested Readings 30

Notes 30

- 3 Recognizing Biological, Social, and Cultural Interconnections: Evolutionary and Ecological Perspectives on a Cholera Epidemic 31**
- Thinking about Epidemics 32
 - History and Biology of Cholera 33
 - Epidemiological Accounts of Peru's Cholera Epidemic 35
 - Evolution and the Ecological Framework 36
 - Cholera and the Evolutionary Framework 38
 - Medical Anthropology Embraces the Ecological/Evolutionary Model 40
 - Suggested Readings 43
 - Notes 43
- 4 Expanding the Vision of Medical Anthropology: Critical and Interpretive Views of the Cholera Epidemic 45**
- Political-Economy of Cholera 46
 - Political-Economic versus Ecological/Evolutionary Perspectives 49
 - Interpretive View of Cholera 51
 - Taking a Broader, Inclusive Perspective 56
 - Suggested Readings 58
 - Notes 58
- 5 Healers and the Healing Professions 61**
- Healing Roles: Organizing the Diversity 62
 - Health Care Sectors 62
 - Healers' Relationships between and within Health Care Sectors 63
 - Authority of Healers 64
 - Social and Cultural Dimensions: General Concepts 64
 - Therapy Outcome and Healer Authority 65

Authority in the Folk Health Sector:**Position of Peruvian Curanderos 66**

Social Authority of Peruvian Curanderos 66

Outcome of Curandero Therapy 66

Cultural Authority of Curanderos 67

Authority in the Professional Health Care Sector:**Case of Biomedicine 67**

What Sets Biomedicine Apart? 67

Social Authority of Biomedical Healers 68

Outcome of Biomedical Healing 69

Cultural Authority of Biomedicine 69

Challenges to Biomedical Authority 70

Economic Critique and Biomedicine's Social Authority 70

Clinical Critique and Biomedicine's Cultural Authority 71

Outcome Critique 72

Impact of the Critiques 73

Authority of Biomedicine in Non-Western Countries 73

Good News, Bad News 73

Importance of Primary Health Care 75

Alma Ata and PHC in Question: Biomedicine Reasserts Its Authority 76

Conclusion 77**Suggested Readings 77****Notes 78****6 Applying Medical Anthropology 81****Medical Anthropology in International Development:****A Brief History 84**

Anthropological Trouble-Shooters, 1945–1973 84

Disenchantment and Disengagement 86

Social Soundness Guidelines and the Return
of Applied Anthropology, 1973–1980 87

Reagan/Bush Years (1981–1993) and Beyond 88

**Work of Applied Medical Anthropologists
in International Contexts 88**

Growth and Nutrition: An Educational Project in Indonesia 89

Medical Anthropology and HIV/AIDS Prevention:
Sex Workers in Zaire 90

Applying Medical Anthropology in the United States 91

Case for Anthropology in the Medical School Curriculum 92

Special Challenge of Introducing Anthropology
to Medical Students 93

Between a Rock and a Hard Place: Applied Medical Anthropology under Attack 94

Critical Medical Anthropology Assault on Applied
Medical Anthropology 94

Response from Applied Medical Anthropologists 95

Personal Reflections 97

Conclusion 98

Suggested Readings 99

Notes 99

7 Anthropology and Medical Ethics 101

Medical Ethics: A Comparative Framework 102

Terminological Concerns 102

Question of Ethical Universals 103

Medical Ethics beyond Biomedicine 105

Medical Ethics in Small-Scale Societies 105

Ethics and Folk Healers 106

Ethics in the Great Traditions of Medicine 106

Development of Bioethics in the United States 108

Historical Perspective 108

Manifestations of Bioethics in Public Life 108

Deliberating Bioethics 109

Social Sciences and Bioethics 110

Social Science: Out of the Closet 111

Case of the Non-Heart-Beating Cadaver 111

Moral Passion and Social Science? 114

Medical Anthropology in Bioethics 115

Suggested Readings 115

Notes 116

8 A Look Back and a Glance Ahead 119

Advantages of Medical Anthropology 120

Sensitivity for Culture and Biology 120

Recognition That the Political-Economy Has Health Implications 121

Insistence on the Value of Ethnography 121

Commitment to Applying Medical Anthropology 121

Thinking Anthropologically about HIV/AIDS 121

AIDS and the Culture–Biology Interface 122

Political-Economic Factors in the Pandemic 122

AIDS Ethnography and Its Contribution to Prevention Planning 123

Directions for Future Work in Medical Anthropology 123

Culture, Health, and Science: A Model for Undergraduate Study 123

Academic and Professional Career Paths Related
to Medical Anthropology 124

Conclusion 125

Suggested Readings 125

Notes 126

Glossary 127
