

# Contents

Preface	vii
A Centennial History of the Prime Number Theorem .....	1
<i>Tom M. Apostol</i>	
Non-homogeneous Problems: Conjectures of Minkowski and Watson .....	15
<i>R.P. Bambah, V.C. Dumir and R.J. Hans-Gill</i>	
On the Oscillation Theorems of Pringsheim and Landau .....	43
<i>Paul T. Bateman and Harold G. Diamond</i>	
Modular Equations in Ramanujan's Lost Notebook .....	55
<i>Bruce C. Berndt</i>	
The <i>abc</i> -conjecture .....	75
<i>Jerzy Browkin</i>	
On Values of Linear and Quadratic Forms at Integral Points .....	107
<i>S.G. Dani</i>	
Variants of the Second Borel-Cantelli Lemma and their Applications in Metric Number Theory .....	121
<i>Glyn Harman</i>	
Pythagorean Triples .....	141
<i>Edmund Hlawka</i>	
Integer Points in Plane Regions and Exponential Sums .....	157
<i>M.N. Huxley</i>	
Artin's Conjecture for Polynomials Over Finite Fields .....	167
<i>Erik Jensen and M. Ram Murty</i>	
Continuous Homomorphisms as Arithmetical Functions, and Sets of Uniqueness .....	183
<i>I. Kátai</i>	
Hamburger's Theorem on $\zeta(s)$ and the Abundance Principle for Dirichlet Series with Functional Equations .....	201
<i>Marvin I. Knopp</i>	
A Survey of Number Theory and Cryptography .....	217
<i>Neal Koblitz</i>	
Recent Developments in the Mean Square Theory of the Riemann Zeta and Other Zeta-Functions .....	241
<i>Kohji Matsumoto</i>	
Algebraic Curves Over Finite Fields with many Rational Points and their Applications .....	287
<i>Harald Niederreiter and Chaoping Xing</i>	

<b>A Report on Artin's Holomorphy Conjecture</b> .....	301
<i>Dipendra Prasad and C.S. Yogananda</i>	
<b>Siegel's Main Theorem for Quadratic Forms</b> .....	315
<i>S. Raghavan</i>	
<b>Pfister's Work on Sums of Squares</b> .....	325
<i>A.R. Rajwade</i>	
<b>Notes on the Prime Number Theorem-I</b> .....	351
<i>K. Ramachandra</i>	
<b>Sums of Squares: An Elementary Method</b> .....	371
<i>R.A. Rankin</i>	
<b>Solution of the Basic Problems of Discrete Geometry on the Plane</b> .....	401
<i>S.S. Ryshkov, R.G. Barykinskii, Y.V. Kucherinenko</i>	
<b>Exponential Diophantine Equations Involving Products of Consecutive Integers and Related Equations</b> .....	463
<i>T.N. Shorey</i>	
<b>Algebraic Independence of Transcendental Numbers: A Survey</b> .....	497
<i>Michel Waldschmidt</i>
