<b>Preface</b>	<b>xi</b>
<b>Acknowledgments</b>	<b>xiii</b>
<b>Preface to the First Edition</b>	<b>xv</b>
<b>1 A Brief History of Enzymology</b>	<b>1</b>
1.1 Enzymes in Antiquity / 2	
1.2 Early Enzymology / 3	
1.3 The Development of Mechanistic Enzymology / 4	
1.4 Studies of Enzyme Structure / 5	
1.5 Enzymology Today / 7	
1.6 Summary / 8	
References and Further Reading / 10	
<b>2 Chemical Bonds and Reactions in Biochemistry</b>	<b>11</b>
2.1 Atomic and Molecular Orbitals / 11	
2.2 Thermodynamics of Chemical Reactions / 23	
2.3 Acid-Base Chemistry / 29	
2.4 Noncovalent Interactions in Reversible Binding / 32	
2.5 Rates of Chemical Reactions / 35	
2.6 Summary / 41	
References and Further Reading / 41	
<b>3 Structural Components of Enzymes</b>	<b>42</b>
3.1 The Amino Acids / 42	
3.2 The Peptide Bond / 53	
3.3 Amino Acid Sequence or Primary Structure / 55	
3.4 Secondary Structure / 57	
3.5 Tertiary Structure / 62	

3.6 Subunits and Quaternary Structure / 65

3.7 Cofactors in Enzymes / 68

3.8 Summary / 71

References and Further Reading / 74

## 4 Protein–Ligand Binding Equilibria

76

4.1 The Equilibrium Dissociation Constant,  $K_d$  / 76

4.2 The Kinetic Approach to Equilibrium / 78

4.3 Binding Measurements at Equilibrium / 80

4.4 Graphic Analysis of Equilibrium Ligand Binding Data / 88

4.5 Equilibrium Binding with Ligand Depletion (Tight Binding Interactions) / 94

4.6 Competition Among Ligands for a Common Binding Site / 95

4.7 Experimental Methods for Measuring Ligand Binding / 96

4.8 Summary / 107

References and Further Reading / 108

## 5 Kinetics of Single-Substrate Enzyme Reactions

109

5.1 The Time Course of Enzymatic Reactions / 109

5.2 Effects of Substrate Concentration on Velocity / 111

5.3 The Rapid Equilibrium Model of Enzyme Kinetics / 113

5.4 The Steady State Model of Enzyme Kinetics / 115

5.5 The Significance of  $k_{cat}$  and  $K_m$  / 120

5.6 Experimental Measurement of  $k_{cat}$  and  $K_m$  / 124

5.7 Other Linear Transformations of Enzyme Kinetic Data / 133

5.8 Measurements at Low Substrate Concentrations / 136

5.9 Deviations from Hyperbolic Kinetics / 137

5.10 Transient State Kinetic Measurements / 141

5.11 Summary / 145

References and Further Reading / 145

## 6 Chemical Mechanisms in Enzyme Catalysis

146

6.1 Substrate–Active Site Complementarity / 147

6.2 Rate Enhancement Through Transition State Stabilization / 151

6.3 Chemical Mechanisms for Transition State Stabilization / 154

6.4 The Serine Proteases: An Illustrative Example / 178

6.5 Enzymatic Reaction Nomenclature / 184

6.6	Summary / 186	
	References and Further Reading / 186	
<b>7</b>	<b>Experimental Measures of Enzyme Activity</b>	<b>188</b>
7.1	Initial Velocity Measurements / 188	
7.2	Detection Methods / 204	
7.3	Separation Methods in Enzyme Assays / 223	
7.4	Factors Affecting the Velocity of Enzymatic Reactions / 238	
7.5	Reporting Enzyme Activity Data / 257	
7.6	Enzyme Stability / 258	
7.7	Summary / 263	
	References and Further Reading / 263	
<b>8</b>	<b>Reversible Inhibitors</b>	<b>266</b>
8.1	Equilibrium Treatment of Reversible Inhibition / 268	
8.2	Modes of Reversible Inhibition / 270	
8.3	Graphic Determination of Inhibitor Type / 273	
8.4	Dose-Response Curves of Enzyme Inhibition / 282	
8.5	Mutually Exclusive Binding of Two Inhibitors / 287	
8.6	Structure-Activity Relationships and Inhibitor Design / 291	
8.6	Summary / 303	
	References and Further Reading / 303	
<b>9</b>	<b>Tight Binding Inhibitors</b>	<b>305</b>
9.1	Identifying Tight Binding Inhibition / 305	
9.2	Distinguishing Inhibitor Type for Tight Binding Inhibitors / 307	
9.3	Determining $K_i$ for Tight Binding Inhibitors / 310	
9.4	Use of Tight Binding Inhibitors to Determine Active Enzyme Concentration / 313	
9.5	Summary / 315	
	References and Further Reading / 316	
<b>10</b>	<b>Time-Dependent Inhibition</b>	<b>318</b>
10.1	Progress Curves for Slow Binding Inhibitors / 321	
10.2	Distinguishing Between Slow Binding Schemes / 325	
10.3	Distinguishing Between Modes of Inhibitor Interaction with Enzyme / 330	

10.4	Determining Reversibility /	332
10.5	Examples of Slow Binding Enzyme Inhibitors /	334
10.6	Summary /	348
	References and Further Reading /	349
<b>11</b>	<b>Enzyme Reactions with Multiple Substrates</b>	<b>350</b>
11.1	Reaction Nomenclature /	350
11.2	Bi Bi Reaction Mechanisms /	352
11.3	Distinguishing Between Random and Compulsory Ordered Mechanisms by Inhibition Pattern /	357
11.4	Isotope Exchange Studies for Distinguishing Reaction Mechanisms /	360
11.5	Using the King–Altman Method to Determine Velocity Equations /	362
11.6	Summary /	364
	References and Further Reading /	366
<b>12</b>	<b>Cooperativity in Enzyme Catalysis</b>	<b>367</b>
12.1	Historic Examples of Cooperativity and Allostery in Proteins /	368
12.2	Models of Allosteric Behavior /	373
12.3	Effects of Cooperativity on Velocity Curves /	379
12.4	Sigmoidal Kinetics for Nonallosteric Enzymes /	382
12.5	Summary /	383
	References and Further Reading /	384
<b>Appendix I.</b>	<b>Suppliers of Reagents and Equipment for Enzyme Studies</b>	<b>385</b>
<b>Appendix II.</b>	<b>Useful Computer Software and Web Sites for Enzyme Studies</b>	<b>387</b>
<b>Index</b>		<b>391</b>
