

Acknowledgments	xi
About the Authors	xiii
Preface	xv
Chapter 1 The Information Infrastructure	1
The Corporate Information Factory Architecture	2
The Legacy/Operational Application Environment	3
The Integration and Transformation Layer	4
The Enterprise Data Warehouse	6
Data Marts	7
The Exploration Warehouse	8
Near-Line Storage	9
Exploration Processing	9
What Is the Explorer Looking For?	11
What Does the Explorer Need?	11
Analyzing Patterns	12
Simple Pattern Analysis	14
Complex Pattern Analysis	14
Pattern Processing and Data	16
Acquiring Data for Pattern Analysis	20
Data Quality and Pattern Processing	21
The Corporate Information Factory and Pattern Processing	21
In Summary	24
Chapter 2 The Exploration Warehouse	25
Exploration Warehouse Sources	25
Enterprise Data Warehouse Feeds	25
Near-Line Storage Feeds	26
External Data Feeds	27
Evolution of the Exploration Warehouse	28

	Creating The Exploration Warehouse	30
	Creating a Permanent or Temporary Structure	30
	Subdividing Data in the Exploration Warehouse	31
	Partitioning Data in the Exploration Warehouse	33
	Incremental Loading of the Exploration Warehouse	33
	Normalizing Data	34
	Exploration Processing	38
	Data Stabilization	38
	Restoring Previous Analyses	39
	Which to Build First?	40
	Exploration Warehouse Categories	41
	In Summary	42
Chapter 3	The Exploration Warehouse and the Chain of Beneficence	43
	From Numbers to Competitive Advantage	44
	The Start of the Quest	44
	Different Types of Data Bases	45
	The Chain of Beneficence	46
	Examples of the Chain	48
	Heuristic Processing	50
	Samples and Heuristic Analysis	51
	Sampling Techniques	54
	Reuse of Analysis	55
	In Summary	55
Chapter 4	Exploration Processing	57
	Gathering Data and Finding Patterns	58
	Focus on the Customer	59
	Determining Causality of Behavior and Correlation between Variables	59
	The Spectrum of Relationships: Identifying External Forces	60
	Capitalizing on Predictability	70
	A Simple Methodology for Exploration Analysis	71
	The Point of Interest	71
	Conditions of Insight	74

Different Approaches to Exploration Analysis	83
The Pattern-to-Business-Model Approach	84
The Business-Model-to-Pattern Approach	91
Examples of Exploration Processing	96
Air Bag Manufacturer	96
Banking Customer Relationship Management	97
Customer Churn in the Telephone Environment	102
Quality Assurance in Manufacturing	103
In Summary	105
 Chapter 5 Analytical Exploration Processing	 107
A Defined Business Problem	108
Inductive versus Deductive Processes	111
Validity and Reliability	112
Defining Analytical Relationships in Exploration	113
Causal Relationships	114
Spurious Relationships	115
Concomitant Variation	116
Specification	117
Drill-Down	118
Units of Analysis	119
Business Models and Exploration	120
Push Models and Exploration	121
Pull Models and Exploration	122
Event-Driven Exploration	123
Time and the Exploration Process	124
Hypothesis Formation	125
Beginning the Analytical Process: Simple Single-Variable Analysis	126
Interpreting Results	126
To Iterate or to Act?	126
Exploration in Web Businesses versus Brick-and-Mortar Businesses	127
In Summary	128

Chapter 6	Analytical Data Mining	131
	Data Preparation for Data Mining	132
	Basic Types of Mining Processes	134
	Regression Analysis	135
	Cluster Analysis	136
	Neural Networks	137
	Time Series Analysis	140
	Data Mining in Brick-and-Mortar Companies	140
	Data Mining and e-Commerce	141
	Platform Selection for Data Mining	142
	Tool Selection for Data Mining	143
	The Value of Mined Information	143
	Impact of Mined Data on the Business Model	144
	In Summary	144
Chapter 7	From Pattern to Competitive Advantage	145
	A Basic Formula for Gaining Competitive Advantage	145
	Identifying Environmental Factors	145
	Formulating a Strategic Plan	146
	Determining Specific Objectives	147
	Examples of Finding Competitive Advantage	148
	A Financial Institution	149
	Golfers	150
	Supermarket Sales	152
	Travelers	154
	Steel Manufacturing	156
	In Summary	158
Chapter 8	Designing the Exploration Warehouse	159
	Data Flow into the Exploration Warehouse	160
	Using the Data Model	161
	The Partial Design Approach	161
	Data Model Constraints	162
	Data Mining Design versus Data Exploration Design	162
	Creating Exploration Marts	164
	Temporary or Permanent Exploration Warehouses	165
	Manipulation of Data in Flight	165

	Maintenance of Granularity	166
	Design Approaches	166
	Integrated Exploration Warehouse Data	168
	Attributes of the Exploration Warehouse	169
	Volumes of Data	170
	Purging an Exploration Project	171
	Meta Data and the Exploration Warehouse	172
	Dynamic/Static Exploration Warehouse Differences	172
	In Summary	173
Chapter 9	The Politics of Exploration	175
	The Exploration Crucible	176
	How Does Exploration Start?	176
	Budgets for the Exploration Warehouse	177
	After the Home Run	178
	Critical Success Factors	178
	Explorer Motivation	178
	Management Communications	179
	Putting Discovery into Action	179
	In Summary	180
Chapter 10	Data Mining: From Analysis to Business	181
	A Symbiotic Relationship	181
	Degrees of Truth	183
	Examples of Degree of Truth	184
	Exploration, Mining, and the Value Development Process	186
	In Summary	189
Chapter 11	Exploration and Data Mining Technologies	191
	The Token-Based Approach	192
	In-Memory Exploration Processing	196
	White Cross	198
	In-Memory versus Token-Based	199
	Large Data Bases	200
	Static or Dynamic	200
	SAS Institute's Enterprise Miner	201
	In Summary	203

Chapter 12	Business Communities of the Corporate Information Factory	205
	Farmers	205
	Farmer Business Characteristics	206
	Architectural Requirements	208
	Tourists	208
	Tourist Business Characteristics	209
	Architectural Requirements	210
	Explorers	212
	Explorer Business Characteristics	213
	Architectural Requirements	214
	Miners	214
	Miner Business Characteristics	215
	Architectural Requirements	216
	Operators	216
	Operator Business Requirements	217
	Architectural Requirements	218
	In Summary	220
Glossary		221
Index		249
