

TABLE OF CONTENTS

Foreword	3
Chapter 1: Riding on the Experience Curve	9
Price for an Emerging Technology	9
Assessing Future Prospects	15
Competition for Learning Opportunities	18
The Purpose of this Book	23
Chapter 2: Learning Requires Action	25
An Input-Output Model of Learning	25
Influencing the Learning System: Public R&D and Deployment Policies	29
Inside the Learning System I: Technology Structural Change ..	33
Outside the Learning System: Market Structural Change	35
Inside the Learning System II: Compound Systems	40
Chapter 3: Making Emerging Technologies Commercial ..	45
Solar Heating – Monitoring and Terminating an RD&D Programme	45
Wind Power – Deployment Support to Increase Learning Investments	52
Photovoltaics – Creating and Supporting New Niche Markets ..	64
Chapter 4: The Dynamics of Learning and Technology Competition	75
Effect of Learning on Estimates of CO ₂ Mitigation Cost	75
Competition for Learning Investments	84
Uncertainty about Learning	91
Managing the Balance between Global Learning and Local Deployment	94

Chapter 5: Conclusions – Implications for Energy Technology Policy	97
References	101
Appendix A:	
<i>Graphic Representation of Experience Curves</i>	107
Appendix B:	
<i>Recommendations from IEA Workshop on Experience Curves for Policy Making – The Case of Energy Technology, Stuttgart, Germany, 10-11 May 1999</i>	111
Appendix C:	
<i>International Collaboration on Experience Curves for Energy Technnology Policy, EXCETP (pronounced "exet")</i>	115

List of Figures and Tables

Figures

Figure 1.1	Experience Curve for PV Modules, 1976-1992	11
Figure 1.2	Danish Wind Turbines, 1982-1997	13
Figure 1.3	Distribution of Progress Ratios	14
Figure 1.4	Making Photovoltaics Break-Even	15
Figure 1.5	Electric Technologies in EU, 1980-1995	21
Figure 1.6	District Heating in Sweden, 1980-1995	22
Figure 2.1	Basic Model for a Learning System	27
Figure 2.2	Influences on the Learning System from Public Policy	29
Figure 2.3	A Roadmap for Policies on Decarbonisation Energy Technologies	31
Figure 2.4	Technology Structural Change	34

Figure 2.5	Price-cost Relations for a New Product	35
Figure 2.6	Natural Gas Combined Cycle, 1981-1997	37
Figure 2.7	Market Changes for PV Modules, 1976-1996	39
Figure 2.8	Brazilian Ethanol 1978-1995	39
Figure 2.9	US Learning System for Production of Electricity from Wind	41
Figure 2.10	Electricity from Wind Energy in USA, 1985-1994 ..	43
Figure 3.1	Solar Heated Swimming Pools: Germany, 1975-1997	46
Figure 3.2	Solar Heated Swimming Pools, 1975-1993: Experience Curve and RD&D Support	47
Figure 3.3	Electricity from Wind Energy in EU, 1980-1995 ..	54
Figure 3.4	Wind Turbines in Germany, 1990-1998	55
Figure 3.5	Average Capacity of Wind Turbines Units Installed Each Year	55
Figure 3.6	Changing Markets for Wind Turbines in Germany ..	57
Figure 3.7	Learning Investments and Government Expenditures	61
Figure 3.8	Investments in Wind Turbines in Germany	63
Figure 3.9	Docking PV Technology to Niche Markets in Japan	66
Figure 3.10	Japan's PV-Roof Programme: Use of Niche Markets	68
Figure 3.11	Investments and Subsidies in PV-Roof Programme ..	71
Figure 3.12	Japan's PV-Roof Programme and World PV Markets	72
Figure 3.13	Learning Investments in Residential PV Systems ..	72
Figure 4.1	Carbon Intensity of World Economy, 1971-2020 ..	76
Figure 4.2	Carbon Intensity Paths, 1971-2060	77
Figure 4.3	Additional Annual Cost for Photovoltaics	79
Figure 4.4	Additional Annual Cost for Technology Portfolio	81
Figure 4.5	Present value of Technology Portfolio	83

Figure 4.6	Technology Paths for the Global Electricity System	88
Figure 4.7	Emissions of Carbon Dioxide from Global Electricity System	89
Figure 4.8	Cost Difference between Breakaway Path and Baseline	90
Figure 4.9	Photovoltaics: Year of 50 GW Cumulative Capacity	93
