

CONTENTS

ENVIRONMENTAL HEALTH CRITERIA FOR DISINFECTANTS AND DISINFECTANT BY-PRODUCTS

PREAMBLE	xv
ACRONYMS AND ABBREVIATIONS	xxv
1. SUMMARY AND EVALUATION	1
1.1 Chemistry of disinfectants and disinfectant by-products	1
1.2 Kinetics and metabolism in laboratory animals and humans	4
1.2.1 Disinfectants	4
1.2.2 Trihalomethanes	4
1.2.3 Haloacetic acids	5
1.2.4 Haloaldehydes and haloketones	5
1.2.5 Haloacetonitriles	5
1.2.6 Halogenated hydroxyfuranone derivatives	5
1.2.7 Chlorite	6
1.2.8 Chlorate	6
1.2.9 Bromate	6
1.3 Toxicology of disinfectants and disinfectant by-products	6
1.3.1 Disinfectants	6
1.3.2 Trihalomethanes	7
1.3.3 Haloacetic acids	7
1.3.4 Haloaldehydes and haloketones	8
1.3.5 Haloacetonitriles	8
1.3.6 Halogenated hydroxyfuranone derivatives	9
1.3.7 Chlorite	9
1.3.8 Chlorate	9
1.3.9 Bromate	9
1.4 Epidemiological studies	10
1.4.1 Cardiovascular disease	10
1.4.2 Cancer	10
1.4.3 Adverse pregnancy outcomes	12

1.5	Risk characterization	13
1.5.1	Characterization of hazard and dose-response	13
1.5.1.1	Toxicological studies	13
1.5.1.2	Epidemiological studies	22
1.5.2	Characterization of exposure	23
1.5.2.1	Occurrence of disinfectants and disinfectant by-products	23
1.5.2.2	Uncertainties of water quality data	24
1.5.2.3	Uncertainties of epidemiological data	25
2.	CHEMISTRY OF DISINFECTANTS AND DISINFECTANT BY-PRODUCTS	27
2.1	Background	27
2.2	Physical and chemical properties of common disinfectants and inorganic disinfectant by-products	28
2.2.1	Chlorine	28
2.2.2	Chlorine dioxide	31
2.2.3	Ozone	32
2.2.4	Chloramines	33
2.3	Analytical methods for disinfectant by-products and disinfectants	33
2.3.1	Trihalomethanes, haloacetonitriles, chloral hydrate, chloropicrin and haloacetic acids	33
2.3.2	Inorganic disinfectant by-products	35
2.3.3	Total organic carbon and UV absorbance at 254 nm	36
2.3.4	Chloramines	36
2.4	Mechanisms involved in the formation of disinfectant by-products	37
2.4.1	Chlorine reactions	37
2.4.2	Chlorine dioxide reactions	39
2.4.3	Chloramine reactions	41
2.4.4	Ozone reactions	42

2.5	Formation of organohalogen disinfectant by-products	43
2.5.1	Chlorine organohalogen by-products	43
2.5.2	Chloramine organohalogen by-products	49
2.5.3	Chlorine dioxide organohalogen by-products	49
2.5.4	Ozone organohalogen by-products	50
2.6	Formation of inorganic disinfectant by-products	50
2.6.1	Chlorine inorganic by-products	50
2.6.2	Chloramine inorganic by-products	52
2.6.3	Chlorine dioxide inorganic by-products	52
2.6.4	Ozone inorganic by-products	53
2.7	Formation of non-halogenated organic disinfectant by-products	53
2.7.1	Chlorine organic by-products	53
2.7.2	Chloramine organic by-products	55
2.7.3	Chlorine dioxide organic by-products	55
2.7.4	Ozone organic by-products	55
2.8	Influence of source water characteristics on the amount and type of by-products produced	56
2.8.1	Effect of natural organic matter and UV absorbance at 254 nm	56
2.8.2	Effect of pH	59
2.8.3	Effect of bromide	61
2.8.4	Effect of reaction rates	61
2.8.5	Effect of temperature	63
2.8.6	Effect of alkalinity	63
2.9	Influence of water treatment variables on the amount and type of by-products produced	64
2.9.1	Effect of ammonia	64
2.9.2	Effect of disinfectant dose	65
2.9.3	Effect of advanced oxidation processes	65
2.9.4	Effect of chemical coagulation	66
2.9.5	Effect of pre-ozonation	67
2.9.6	Effect of biofiltration	68
2.10	Comparative assessment of disinfectants	69
2.11	Alternative strategies for disinfectant by-product control	69
2.11.1	Source control	75
2.11.2	Organohalogen by-products	75
2.11.3	Inorganic by-products	75

2.11.4	Organic by-products	76
2.12	Models for predicting disinfectant by-product formation	77
2.12.1	Factors affecting disinfectant by-product formation and variables of interest in disinfectant by-product modelling	77
2.12.2	Empirical models for disinfectant by-product formation	78
2.12.3	Models for predicting disinfectant by-product precursor removal	79
2.13	Summary	80
3.	TOXICOLOGY OF DISINFECTANTS	83
3.1	Chlorine and hypochlorite	83
3.1.1	General toxicological properties and information on dose-response in animals	83
3.1.2	Reproductive and developmental toxicity	89
3.1.3	Toxicity in humans	90
3.1.4	Carcinogenicity and mutagenicity	92
3.1.5	Comparative pharmacokinetics and metabolism	96
3.1.6	Mode of action	96
3.2	Chloramine	96
3.2.1	General toxicological properties and information on dose-response in animals	96
3.2.2	Reproductive and developmental toxicity	99
3.2.3	Toxicity in humans	100
3.2.4	Carcinogenicity and mutagenicity	100
3.2.5	Comparative pharmacokinetics and metabolism	102
3.3	Chlorine dioxide	102
3.3.1	General toxicological properties and information on dose-response in animals	102
3.3.2	Reproductive and developmental toxicity	106
3.3.3	Toxicity in humans	108
3.3.4	Carcinogenicity and mutagenicity	108
3.3.5	Comparative pharmacokinetics and metabolism	109

4.	TOXICOLOGY OF DISINFECTANT BY-PRODUCTS	110
4.1	Trihalomethanes	110
4.1.1	Chloroform	111
4.1.1.1	General toxicological properties and information on dose-response in animals	111
4.1.1.2	Toxicity in humans	115
4.1.1.3	Carcinogenicity and mutagenicity	115
4.1.1.4	Comparative pharmacokinetics and metabolism	116
4.1.1.5	Mode of action	118
4.1.2	Bromodichloromethane	119
4.1.2.1	General toxicological properties and information on dose-response in animals	119
4.1.2.2	Reproductive and developmental toxicity	123
4.1.2.3	Neurotoxicity	124
4.1.2.4	Toxicity in humans	125
4.1.2.5	Carcinogenicity and mutagenicity	125
4.1.2.6	Comparative pharmacokinetics and metabolism	128
4.1.2.7	Mode of action	136
4.1.3	Dibromochloromethane	138
4.1.3.1	General toxicological properties and information on dose-response in animals	138
4.1.3.2	Reproductive and developmental toxicity	140
4.1.3.3	Neurotoxicity	141
4.1.3.4	Toxicity in humans	141
4.1.3.5	Carcinogenicity and mutagenicity	141
4.1.3.6	Comparative pharmacokinetics and metabolism	143
4.1.3.7	Mode of action	144
4.1.4	Bromoform	144
4.1.4.1	General toxicological properties and information on dose-response in animals	144

	4.1.4.2	Reproductive and developmental toxicity	146
	4.1.4.3	Neurotoxicity	147
	4.1.4.4	Toxicity in humans	147
	4.1.4.5	Carcinogenicity and mutagenicity	147
	4.1.4.6	Comparative pharmacokinetics and metabolism	149
	4.1.4.7	Mode of action	151
4.2	Haloacids		151
	4.2.1	Dichloroacetic acid (dichloroacetate)	152
	4.2.1.1	General toxicological properties and information on dose-response in animals	152
	4.2.1.2	Reproductive effects	157
	4.2.1.3	Developmental effects	158
	4.2.1.4	Neurotoxicity	159
	4.2.1.5	Toxicity in humans	159
	4.2.1.6	Carcinogenicity and mutagenicity	161
	4.2.1.7	Comparative pharmacokinetics and metabolism	174
	4.2.1.8	Mode of action	178
	4.2.2	Trichloroacetic acid (trichloroacetate)	183
	4.2.2.1	General toxicological properties and information on dose-response in animals	183
	4.2.2.2	Reproductive effects	185
	4.2.2.3	Developmental effects	185
	4.2.2.4	Neurotoxicity	186
	4.2.2.5	Toxicity in humans	186
	4.2.2.6	Carcinogenicity and mutagenicity	187
	4.2.2.7	Comparative pharmacokinetics and metabolism	192
	4.2.2.8	Mode of action	194
	4.2.3	Brominated haloacetic acids	196
	4.2.3.1	General toxicological properties and information on dose-response in animals	196
	4.2.3.2	Reproductive effects	198
	4.2.3.3	Neurotoxicity	199
	4.2.3.4	Toxicity in humans	199
	4.2.3.5	Carcinogenicity and mutagenicity	200

	4.2.3.6	Comparative pharmacokinetics and metabolism	200
	4.2.3.7	Mode of action	202
4.2.4		Higher molecular weight halogenated acids	203
4.3		Haloaldehydes and haloketones	205
	4.3.1	Chloral hydrate (trichloroacetaldehyde, chloral)	206
	4.3.1.1	General toxicological properties and information on dose-response in animals	207
	4.3.1.2	Toxicity in humans	209
	4.3.1.3	Carcinogenicity and mutagenicity	210
	4.3.1.4	Comparative metabolism and pharmacokinetics	215
	4.3.1.5	Mode of action	217
4.3.2		Halogenated aldehydes and ketones other than chloral hydrate	218
	4.3.2.1	General toxicological properties and information on dose-response in animals	218
	4.3.2.2	Toxicity in humans	222
	4.3.2.3	Carcinogenicity and mutagenicity	222
	4.3.2.4	Comparative pharmacokinetics and metabolism	227
	4.3.2.5	Mode of action	227
4.4		Haloacetonitriles	228
	4.4.1	General toxicological properties and information on dose-response in animals and humans	228
	4.4.2	Reproductive and developmental toxicity	229
	4.4.3	Carcinogenicity and mutagenicity	231
	4.4.4	Comparative pharmacokinetics and metabolism	233
	4.4.5	Mode of action	235
4.5		Halogenated hydroxyfuranone derivatives	236
	4.5.1	General toxicological properties and information on dose-response in animals	237
	4.5.2	Toxicity in humans	239
	4.5.3	Carcinogenicity and mutagenicity	239
	4.5.3.1	Studies in bacteria and mammalian cells <i>in vitro</i>	239

	4.5.3.2	Studies in experimental animals	243
	4.5.4	Comparative pharmacokinetics and metabolism	245
4.6		Chlorite	249
	4.6.1	General toxicological properties and information on dose-response in animals	249
	4.6.2	Reproductive and developmental toxicity	251
	4.6.3	Toxicity in humans	256
	4.6.4	Carcinogenicity and mutagenicity	258
	4.6.5	Comparative pharmacokinetics and metabolism	260
	4.6.6	Mode of action	261
4.7		Chlorate	261
	4.7.1	General toxicological properties and information on dose-response in animals	261
	4.7.2	Reproductive and developmental toxicity	263
	4.7.3	Toxicity in humans	263
	4.7.4	Carcinogenicity and mutagenicity	264
	4.7.5	Mode of action	264
4.8		Bromate	266
	4.8.1	General toxicological properties and information on dose-response in animals	266
	4.8.2	Toxicity in humans	267
	4.8.3	Carcinogenicity and mutagenicity	267
	4.8.4	Comparative pharmacokinetics and metabolism	273
	4.8.5	Mode of action	274
4.9		Other disinfectant by-products	276
5.		EPIDEMIOLOGICAL STUDIES	277
	5.1	Epidemiological study designs and causality of epidemiological associations	277
		5.1.1 Experimental studies	278
		5.1.2 Observational studies	278
		5.1.3 Random and systematic error	281
		5.1.4 Causality of an epidemiological association	284
	5.2	Epidemiological associations between disinfectant use and adverse health outcomes	285

5.2.1	Epidemiological studies of cancer and disinfected drinking-water	285
5.2.1.1	Cancer associations in ecological studies	286
5.2.1.2	Cancer associations in analytical studies	288
5.2.1.3	Meta-analysis of cancer studies	317
5.2.1.4	Summary of results of cancer studies	319
5.2.2	Epidemiological studies of cardiovascular disease and disinfected drinking-water	322
5.2.2.1	Summary of results of cardiovascular studies	324
5.2.3	Epidemiological studies of adverse reproductive/developmental outcomes and disinfected drinking-water	325
5.2.3.1	Summary of results of reproductive/developmental studies	328
5.3	Epidemiological associations between disinfectant by-products and adverse health outcomes	328
5.3.1	Epidemiological studies of cancer and disinfectant by-products	328
5.3.1.1	Cancer associations in ecological studies	328
5.3.1.2	Cancer associations in analytical studies	333
5.3.1.3	Summary of results of cancer studies	342
5.3.2	Epidemiological studies of cardiovascular disease and disinfectant by-products	344
5.3.2.1	Summary of results of cardiovascular studies	344
5.3.3	Epidemiological studies of adverse reproductive/developmental outcomes and disinfectant by-products	344
5.3.3.1	Summary of results of reproductive/developmental studies	351
5.4	Summary	353

6. RISK CHARACTERIZATION	356
6.1 Characterization of hazard and dose-response	356
6.1.1 Toxicological studies	356
6.1.1.1 Chlorine	356
6.1.1.2 Monochloramine	356
6.1.1.3 Chlorine dioxide	357
6.1.1.4 Trihalomethanes	357
6.1.1.5 Haloacetic acids	359
6.1.1.6 Chlorate hydrate	362
6.1.1.7 Haloacetonitriles	362
6.1.1.8 MX	363
6.1.1.9 Chlorite	364
6.1.1.10 Chlorate	364
6.1.1.11 Bromate	365
6.1.2 Epidemiological studies	366
6.2 Characterization of exposure	366
6.2.1 Occurrence of disinfectants and disinfectant by-products	366
6.2.2 Uncertainties of water quality data	367
6.2.3 Uncertainties of epidemiological data	369
7. RISK CONCLUSIONS AND COMPARISONS	370
7.1 Epidemiological studies	370
7.2 Toxicological studies	370
7.2.1 Diversity of by-products	370
7.2.2 Diversity of modes of action	371
7.2.3 Reproductive, developmental and neurotoxic effects	373
7.3 Risks associated with mixtures of disinfectant by-products	374
8. CONCLUSIONS AND RECOMMENDATIONS	375
8.1 Chemistry	375
8.2 Toxicology	376
8.3 Epidemiology	376

9. RESEARCH NEEDS	377
9.1 Chemistry of disinfectants and disinfectant by-products	377
9.2 Toxicology	378
9.3 Epidemiology	379
10. PREVIOUS EVALUATIONS BY INTERNATIONAL BODIES	381
REFERENCES	383
RESUME ET EVALUATION	439
RESUMEN Y EVALUACION	470
