

Contents

Preface	xi
1 Introduction	1
1.1 MATHEMATICAL INDUCTION	1
1.2 HISTORICAL BACKGROUND	2
1.3 DYNAMIC PROGRAMMING	5
1.4 THE EXECUTIONER'S TALE	8
1.5 SUMMARY	8
EXERCISES	10
 I Deterministic Models	 11
2 Multi-Stage Decision Problems	13
2.1 MAXIMIZING UTILITIES	13
2.2 A GENERAL MODEL	17
2.3 APPLICATIONS	19
EXERCISES	25
3 Networks	27
3.1 SHORTEST PATHS	27
3.2 DIRECTED NETWORKS	29
3.3 CRITICAL PATH ANALYSIS	30
EXERCISES	37
4 Further Applications	39
4.1 DISCRETE ACTIONS	39
4.2 THE KNAPSACK PROBLEM	39
4.3 A SIMPLE REPLACEMENT MODEL	42
4.4 SCHEDULING PROBLEMS	44
4.5 JOHNSON'S ALGORITHM	45
EXERCISES	49

5 Convexity	51
5.1 CONVEX AND CONCAVE FUNCTIONS	51
5.2 ALLOCATION PROBLEMS	56
5.3 CONCAVE UTILITY FUNCTIONS	60
EXERCISES	64
 II Stochastic Models	 67
6 Markov Systems	69
6.1 INTRODUCTION	69
6.2 STOCHASTIC DYNAMIC PROGRAMMING	70
6.3 APPLICATIONS	72
EXERCISES	78
 7 Optimal Stopping	 79
7.1 INTRODUCTION	79
7.2 STOPPING TIMES AND STOPPING SETS	82
7.3 APPLICATIONS	90
EXERCISES	94
 8 Special Problems	 97
8.1 INTRODUCTION	97
8.2 SELLING AN ASSET	97
8.3 THE MARRIAGE PROBLEM	104
8.4 PROPHET INEQUALITIES	109
EXERCISES	116
 III Markov Decision Processes	 119
9 General Theory	121
9.1 INTRODUCTION	121
9.2 MINIMIZING DISCOUNTED EXPECTATIONS	122
9.3 POLICY IMPROVEMENTS	130
9.4 A MACHINE REPLACEMENT MODEL	137
 10 Minimizing Average Costs	 145
10.1 INTRODUCTION	145
10.2 LONG-TERM AVERAGE COSTS	148
10.3 EXTENSION TO INFINITELY MANY STATES	153
10.4 OPTIMAL INVENTORY POLICIES	158
 11 Statistical Decisions	 165
11.1 INTRODUCTION	165

11.2 TESTING STATISTICAL HYPOTHESES	166
11.3 THE SEQUENTIAL PROBABILITY RATIO TEST	170
Notes on the Exercises	177
Chapter 1	177
Chapter 2	177
Chapter 3	178
Chapter 4	179
Chapter 5	179
Chapter 6	180
Chapter 7	181
Chapter 8	183
References	185
Index	187
