ENVIRONMENTAL HEALTH CRITERIA FOR PRINCIPLES AND METHODS FOR THE ASSESSMENT OF RISK FROM ESSENTIAL TRACE ELEMENTS

1.	SUMMARY	1
2.	INTRODUCTION	3
2.1	Scope and purpose	3
2.2	Criteria for essentiality of trace elements	5
2.2.1	Essentiality and homeostatic mechanisms ..	6
2.3	Terminology	6
2.3.1	Definitions relating to individual and population requirements for ETEs	7
2.3.1.1	Factorial estimation of nutrient requirement	7
2.3.1.2	Requirements for the individual ...	7
2.3.1.3	Dietary reference intakes, popu- lation reference intakes, reference nutrient intakes, recommended dietary allowance, and safe range of population mean intake	8
2.3.2	Toxicological terms	10
2.3.2.1	Acceptable daily intake, toler- able intake, tolerable upper intake level	10
2.3.2.2	Reference dose	10
2.3.3	Principles underlying derivation of nutri- ent requirements and tolerable intakes	10
2.3.4	Approaches to define a threshold dose ...	11
2.3.5	Characteristics of uncertainty factors	12
2.3.6	Estimating TI from dose-response curve for critical effect	14
3.	THE ACCEPTABLE RANGE OF ORAL INTAKE FOR AN ESSENTIAL TRACE ELEMENT	16
3.1	Definition of an AROI	16

3.2	Boundaries of an AROI	17
3.2.1	Lower limit of an AROI	18
3.2.2	Upper limit of an AROI	18
3.3	Comparison of safety evaluations	20
4.	VARIABILITY OF HUMAN POPULATIONS	22
4.1	Principles of homeostasis of ETes in humans	22
4.2	Bioavailability	24
4.2.1	Bioavailability and utilization	25
4.3	Age-related variables	25
4.3.1	<i>In utero</i>	25
4.3.2	Infancy	27
4.3.3	The elderly	27
4.4	Variability due to gender	28
4.5	Pregnancy and lactation	28
4.6	Chemical species of ETes	29
4.7	Interactions between ETes	30
4.7.1	Copper and zinc	30
4.7.2	Selenium and iodine	31
4.8	Genetically determined human variability and disorders of homeostasis	31
4.9	Acquired disorders of homeostasis	32
5.	EFFECTS OF DEFICIENCY AND EXCESS	33
5.1	Range in severity of effects	33
5.2	Comparability of end-points used to define deficiency and excess	33
5.2.1	Range of clinical and biochemical markers of deficiency and excess	35
5.2.1.1	Deficiency	35
5.2.1.2	Excess	35
5.2.2	Examples of range of effects	36
5.2.2.1	Iron	36
5.2.2.2	Zinc	37
5.2.2.3	Copper	38
5.2.2.4	Selenium	38

6.	APPLICATION OF HOMEOSTATIC MODEL IN HUMAN HEALTH RISK ASSESSMENT TO EXPOSURE TO ETEs	40
6.1	Summary of principles	40
6.2	Scheme for application of principles	42
7.	RECOMMENDATIONS	46
8.	FURTHER RESEARCH	47
	REFERENCES	48
	RESUME	57
	RESUMEN	59
