<b>1. Background</b>	<b>1</b>
A CHANCE DISCOVERY	7
THE FIRST CONTROLLED STUDY	8
FURTHER CLINICAL AND EXPERIMENTAL OBSERVATIONS	11
SHIFT IN PARADIGM	13
ADAPTIVE INFORMATION PROCESSING	16
THEORETICAL CONVERGENCES	20
Posttraumatic Stress Disorder	20
Psychodynamic Approaches	21
Behavioral Approaches	22
Cognitive-Behavioral Approaches	24
Integrative Approach	26
SUMMARY AND CONCLUSIONS	27
<b>2. Adaptive Information Processing: The Model as a Working Hypothesis</b>	<b>29</b>
INFORMATION PROCESSING	30
Dual Attention Stimulation	32
MEMORY NETWORKS	33
A SAMPLE EMDR SESSION	35
Partial Transcript of the Sample Session	37
Evaluation of the Sample Session	40
DYSFUNCTIONAL TO FUNCTIONAL	41
DISPARATE NEURO NETWORKS	41
APPLICATIONS OF EMDR TO OTHER DISORDERS	42
STATIC EXPERIENCE: AFFECT AND BELIEF STATEMENTS	43
RESOLUTION	46
FROZEN IN CHILDHOOD	47
"TIME-FREE" PSYCHOTHERAPY	48
TARGETS	50
Access Restricted to Negative Material	51
Memory Lapses	51
Dissociation	52
INTEGRATED PSYCHOTHERAPY	53
SUMMARY AND CONCLUSIONS	54

### 3. Components of EMDR Treatment and Basic Treatment Effects

BASIC COMPONENTS OF THE EMDR PROCEDURE	57
The Image	58
The Negative Cognition	58
The Positive Cognition	60
The Emotions and Their Level of Disturbance	64
The Physical Sensations	64
ACTIVATING THE INFORMATION-PROCESSING SYSTEM	65
Eye Movements	65
Alternative Forms of Stimulation	69
THE EIGHT PHASES OF EMDR TREATMENT	69
Phase One: Client History and Treatment Planning	70
Phase Two: Preparation	71
Phase Three: Assessment	72
Phase Four: Desensitization	72
Phase Five: Installation	73
Phase Six: Body Scan	74
Phase Seven: Closure	75
Phase Eight: Reevaluation	75
STANDARD THREE-PRONGED EMDR PROTOCOL	76
CHOOSING A TARGET	76
PATTERNS OF RESPONSE	78
Multimemory Associative Processing	80
The Belief Inherent in the Trauma	80
The Major Participant or Perpetrator	81
The Pronounced Stimuli	81
The Specific Event	81
The Dominant Physical Sensations	82
The Dominant Emotions	82
Single-Memory Processing Effects	83
Changes in Image	83
Changes in Sounds	85
Changes in Cognitions	85
Changes in Emotions	86
Changes in Physical Sensation	86
DIFFERENTIAL EFFECTS	88
SUPERVISED PRACTICE	88
SUMMARY AND CONCLUSIONS	89

### 4. Phase One: Client History

CLIENT READINESS	91
CLIENT SAFETY FACTORS	93
Level of Rapport	93
Emotional Disturbance	94
Stability	95
Life Supports	95
General Physical Health	95
Office Consultation versus Inpatient Treatment	96

Neurological Impairment	96
Epilepsy	97
Eye Problems	97
Drug and Alcohol Abuse	98
Legal Requirements	98
Systems Control	99
Secondary Gains	100
Timing	101
Medication Needs	102
Dissociative Disorders	103
TREATMENT PLANNING	104
HISTORY-TAKING TRANSCRIPT	108
SUPERVISED PRACTICE	119
SUMMARY AND CONCLUSIONS	119
<b>5. Phases Two and Three: Preparation and Assessment</b>	<b>121</b>
PHASE TWO: PREPARATION	121
Adopting a Clinical Stance	122
Forming a Bond with the Client	122
Explaining the Theory	123
Testing the Eye Movements	124
Creating a Safe Place	125
Describing the Model	127
Setting Expectations	129
Addressing Client Fears	131
PHASE THREE: ASSESSMENT	132
Selecting the Picture	133
Identifying the Negative Cognition	133
Developing a Positive Cognition	136
Rating the Validity of Cognition	137
Naming the Emotion	138
Estimating the Subjective Units of Disturbance	139
Identifying Body Sensations	139
IMPORTANCE OF THE COMPONENTS	140
SUPERVISED PRACTICE	142
SUMMARY AND CONCLUSIONS	142
<b>6. Phases Four to Seven: Desensitization, Installation, Body Scan, and Closure</b>	<b>144</b>
ACCELERATED REPROCESSING OF THE MEMORY	144
PHASE FOUR: DESENSITIZATION	149
Associative Processing	151
Imagery	151
<i>New Memory 152; Image Changes 152; Incident Unfolds 153;</i>	
<i>Appearance Changes 153;</i>	
Sounds and Thoughts	154
<i>Negative Statements 154; Mismatches 155; Positive Thoughts 155;</i>	
<i>Insights 156</i>	

Sensation and Affect	156
<i>New Emotions 157; Shifting Sensations 158</i>	
Assessment	158
PHASE FIVE: INSTALLATION	160
PHASE SIX: BODY SCAN	162
PHASE SEVEN: CLOSURE	163
Visualization	164
Safety Assessment	164
Debriefing and Log	165
SUPERVISED PRACTICE	168
SUMMARY AND CONCLUSIONS	169
 <b>7. Working with Abreaction and Blocks</b>	 <b>171</b>
ABREACTION	172
Guidelines for Facilitating Abreaction	174
If Abreaction Persists	180
STRATEGIES FOR BLOCKED PROCESSING	181
Primary Target	181
Altering the Eye Movement	182
Focusing on Body Sensation	182
<i>All Sensation 182; The Primary Sensation 182; Unspoken Words 182;</i>	
<i>Using Movement 184; Pressing the Location 184</i>	
Scanning	184
<i>Visual Cues 185; Sound Effects 185; Dialogue 185</i>	
Alterations	186
<i>Appearance of Image 186; No Action 186; Hierarchy 187; Redirecting</i>	
<i>to Image 187; Redirecting to Negative Cognition 187; Adding a Positive</i>	
<i>Statement 187; Checking the Positive Cognition 188</i>	
Return to Target	188
Ancillary Targets	188
Feeder Memories	189
Blocking Beliefs	192
Fears	193
<i>Fear of Going Crazy 194; Fear of Losing the Good Memories 195;</i>	
<i>Fear of Change 195</i>	
Wellsprings of Disturbance	197
SUPERVISED PRACTICE	198
SUMMARY AND CONCLUSIONS	198
 <b>8. Phase Eight: Reevaluation and Use of the EMDR</b>	 <b>200</b>
<b>Standard Three-Pronged Protocol</b>	
PHASE EIGHT: REEVALUATION	201
THE STANDARD EMDR PROTOCOL	202
Working on the Past	202
Single-Target Outcome	203
Recycling through Multiple Targets	205
<i>Primary Events 206; Past Events 206; Progressions 206; Clusters 206;</i>	
<i>Participants 207</i>	
Working on the Present	207
Using the Log to Report Systems Issues	209

Working on the Future	210
Significant People	211
Significant Situations	211
Incorporating a Positive Template	211
CONCLUDING THERAPY	215
Follow-Up	215
Terminating Therapy	216
SUPERVISED PRACTICE	218
SUMMARY AND CONCLUSIONS	219

## 9. Protocols and Procedures for Special Situations 221

THE 11-STEP STANDARD PROCEDURE	222
PROTOCOL FOR A SINGLE TRAUMATIC EVENT	223
PROTOCOL FOR CURRENT ANXIETY AND BEHAVIOR	223
PROTOCOL FOR RECENT TRAUMATIC EVENTS	224
PROTOCOL FOR PHOBIAS	227
PROTOCOL FOR EXCESSIVE GRIEF	231
PROTOCOL FOR ILLNESS AND SOMATIC DISORDERS	234
SELF-DIRECTED USE OF EYE MOVEMENT SETS	
FOR STRESS REDUCTION	241
Caveats and Suggestions	241
Technical Considerations	242
SELF-CONTROL/CLOSURE PROCEDURES	243
Safe-Place Imagery	243
Taped Visualizations	244
The Light-Stream Technique	244
Vertical Eye Movements	246
DEBRIEFING AND SAFETY ASSESSMENT	246
SUMMARY AND CONCLUSIONS	246

## 10. The Cognitive Interweave: A Proactive Strategy for Working with Challenging Clients 249

FOUNDATION OF THE INTERWEAVE	251
RESPONSIBILITY, SAFETY, AND CHOICES	252
FITTING THE INTERVENTION TO THE CLIENT	261
INTERWEAVE CHOICES	262
New Information	263
"I'm Confused"	263
"What If It Were Your Child?"	264
Metaphor/Analogy	265
"Let's Pretend"	265
Socratic Method	266
ASSIMILATION	267
VERBALIZATIONS AND ACTIONS	267
EDUCATION	273
SUPERVISED PRACTICE	275
SUMMARY AND CONCLUSIONS	275

**11. Selected Populations**

ISSUES OF NONCOMPLIANCE 278

CHILDREN 281

Concrete Definitions of Feelings 283

Holding the Child's Attention 283

Cognitions 284

Generalizing Treatment Effects 285

Creative Therapy 286

COUPLES 286

Early Sexual Abuse in a Marital Partner 287

Joint versus Individual Sessions 287

Infidelity 289

SEXUAL ABUSE VICTIMS 290

Appropriate Goals 290

Client Readiness 291

Structure 292

Integration 293

Information Plateaus 294

Emotional Stages 295

False Memory 296

Cautions Regarding Memory Work 297

Hypnosis 297

The Fallibility of Memory 298

COMBAT VETERANS 301

Dealing with Feelings of Lack of Control 302

Secondary Gain Issues 303

Affiliation and the Fear of Forgetting 303

Dealing with Denial and Transition States 304

Dealing with Anger 305

Using the Cognitive Interweave 307

Anniversary Dates 307

Special Populations 307

DISSOCIATIVE DISORDERS 308

OVERALL EVALUATIONS 311

SUMMARY AND CONCLUSIONS 312

**12. Theory, Research, and Clinical Implications**

THEORETICAL EXPLANATIONS 315

PROCEDURAL ELEMENTS 317

Interrupted Exposure 318

Perceived Mastery 319

Attention to Physical Sensation 320

Cognitive Reframing 320

Alignment of Memory Components 321

Free Association 321

Mindfulness 322

Eye Movements and Alternative Dual Attention Stimuli 323

ORIENTING RESPONSE 324

DISTRACTION	325
HYPNOSIS	326
CELLULAR AND BRAIN-LEVEL CHANGES	327
DREAM SLEEP	332
RELAXATION RESPONSE	333
HEMISPHERIC SYNCHRONIZATION	334
CORTICAL FUNCTION	336
INTEGRATIVE EFFECT	338
<b>CONTROLLED RESEARCH</b>	<b>339</b>
GENERAL SCARCITY OF PTSD TREATMENT STUDIES	339
SUGGESTED CRITERIA FOR CLINICAL OUTCOME RESEARCH	340
Method Validity	341
Selection of Psychometrics	342
Participant Selection	343
Comparative Research	343
Component Analyses	344
Civilian Studies	345
Studies of Combat Veterans	351
Methodological Problems in EMDR Outcome Studies	353
Treatment Fidelity and Protocol Adherence	353
Evaluation Tools	354
Treatment Time	355
The Comparison of EMDR and Other PTSD Treatments	356
Suggested Criteria for Comparative Clinical Outcome Studies	359
DIVERSE CLINICAL APPLICATIONS	360
WEIGHTING OF ACTIVE COMPONENTS	363
Component Analyses	364
Suggested Parameters for Component Analyses in Clinical Outcome Component Studies	365
A Review of Extant Clinical Component Analyses	368
The Utility of Single-Subject Design	370
Discerning Testable Hypotheses	371
Testing a Variety of Existing Hypotheses	373
Hypothesis Regarding the Autobiographical Nature of the Targeted Disturbance	373
Hypothesis Regarding the Etiological Nature of Memories	373
Hypothesis Regarding Orienting Response Mechanism	374
Hypothesis Regarding Bilateral Stimulation Mechanism	374
Hypothesis Regarding the Distractive Level of Stimuli	374
Hypothesis Regarding Free Association	375
Summary of Recommendations for Component Research	375
BROADER CLINICAL AND PROFESSIONAL CONCERNS	377
Inadequate Standards of Research and Review	377
Clinical Responsibility	380
Global Responsibility	382
SUMMARY AND CONCLUSIONS	385

<b>Appendix A: Clinical Aids</b>	427
EMDR Screening and Data Checklist	427
EMDR Treatment Planning Checklist	428
Recommended Format for Weekly Log Report	429
Selecting Negative and Positive Cognitions	429
List of Generic Negative and Positive Cognitions	430
EMDR Procedural Outline	431
Form for Identifying the EMDR Target	433
Form and Sequence for Floatback Technique to Identify Past Event	433
Guidelines and Procedures for EMDR Resource Development and Installation	434
Indications of a Need to Extend Client Preparation and Stabilization Phase	434
Characteristics and Types of Resources Appropriate for Resource Development and Installation	435
Prolonged Resource Development May Need to Precede EMDR-RDI Procedures	436
Precautions in Considering Resource Development and Installation	436
The Basic EMDR Resource Development and Installation Protocol	437
Use of Resource Development and Installation	440
<b>Appendix B: Client Safety</b>	441
Section I—EMDR Dissociative Disorders Task Force Recommended Guidelines: A General Guide to EMDR's Use in the Dissociative Disorders	441
Additional Training	445
Suggested Reading	445
Section II—EMDR Professional Issues Committee Recommended Guidelines	446
Client Welfare	446
Training	447
Section III—Professional Standards and Training Committee of the EMDR International Association	449
<b>Appendix C: EMDR Resources</b>	451
The EMDR International Association	451
EMDR Humanitarian Assistance Programs	452
Training Availability	453
The EMDR Institute	453
