Preface to the Second Edition

xix

PART ONE

Introduction and General Principles

1

Basic Ideas and Examples

3

1 WHAT IS A GAME OF STRATEGY? 4

2 SOME EXAMPLES AND STORIES OF STRATEGIC GAMES 6

A. Which Passing Shot? 6

B. The GPA Rat Race 7

C. "We Can't Take the Exam, Because We Had a Flat Tire" 9

D. Why Are Professors So Mean? 10

E. Roommates and Families on the Brink 11

F. The Dating Game 13

3 OUR STRATEGY FOR STUDYING GAMES OF STRATEGY 14

2 How to Think About Strategic Games 17

- 1 DECISIONS VERSUS GAMES 18
- 2 CLASSIFYING GAMES 20
 - A. Are the Moves in the Game Sequential or Simultaneous? 20
 - B. Are the Players' Interests in Total Conflict or Is There Some Commonality? 21
 - C. Is the Game Played Once or Repeatedly, and with the Same or Changing Opponents? 22
 - D. Do the Players Have Full or Equal Information? 23
 - E. Are the Rules of the Game Fixed or Manipulable? 24
 - F. Are Agreements to Cooperate Enforceable? 25
- 3 SOME TERMINOLOGY AND BACKGROUND ASSUMPTIONS 27
 - A. Strategies 27
 - B. Payoffs 28
 - C. Rationality 29
 - D. Common Knowledge of Rules 31
 - E. Equilibrium 33
 - F. Dynamics and Evolutionary Games 34
 - G. Observation and Experiment 35
- 4 THE USES OF GAME THEORY 36
- 5 THE STRUCTURE OF THE CHAPTERS TO FOLLOW 38
- SUMMARY 41
- KEY TERMS 41
- EXERCISES 42

PART TWO

Concepts and Techniques

3 Games with Sequential Moves 45

- 1 GAME TREES 46
 - A. Nodes, Branches, and Paths of Play 46
 - B. Uncertainty and "Nature's Moves" 46
 - C. Outcomes and Payoffs 48
 - D. Strategies 48
 - E. Tree Construction 49

2 SOLVING GAMES BY USING TREES	50
3 ADDING MORE PLAYERS	55
4 ORDER ADVANTAGES	60
5 ADDING MORE MOVES	61
A. Tic-Tac-Toe	61
B. Chess	63
6 EVIDENCE CONCERNING ROLLBACK	69
7 STRATEGIES IN THE SURVIVOR® GAME	72
SUMMARY	77
KEY TERMS	78
EXERCISES	78

4 Simultaneous-Move Games with Pure Strategies I: Discrete Strategies 83

1 DEPICTING SIMULTANEOUS-MOVE GAMES WITH DISCRETE STRATEGIES	84
2 NASH EQUILIBRIUM	86
A. Some Further Explanation of the Concept of Nash Equilibrium	87
B. Nash Equilibrium As a System of Beliefs and Choices	89
3 DOMINANCE	90
A. Both Players Have Dominant Strategies	92
B. One Player Has a Dominant Strategy	93
C. Successive Elimination of Dominated Strategies	95
4 BEST-RESPONSE ANALYSIS	98
5 THE MINIMAX METHOD FOR ZERO-SUM GAMES	99
6 THREE PLAYERS	101
7 MULTIPLE EQUILIBRIA IN PURE STRATEGIES	105
8 NO EQUILIBRIUM IN PURE STRATEGIES	111
SUMMARY	113
KEY TERMS	114
EXERCISES	114
APPENDIX: Some General Definitions	120

5

Simultaneous-Move Games with Pure Strategies II: Continuous Strategies and III: Discussion and Evidence 123

1 PURE STRATEGIES THAT ARE CONTINUOUS VARIABLES 124

- A. Price Competition 124
- B. Political Campaign Advertising 129

2 EMPIRICAL EVIDENCE CONCERNING NASH EQUILIBRIUM 131

- A. Laboratory and Classroom Experiments 132
- B. Real-World Evidence 135

3 CRITICAL DISCUSSION OF THE NASH EQUILIBRIUM CONCEPT 139

- A. The Treatment of Risk in Nash Equilibrium 140
- B. Multiplicity of Nash Equilibria 142
- C. Requirements of Rationality for Nash Equilibrium 144

4 RATIONALIZABILITY 145

- A. Applying the Concept of Rationalizability 146
- B. Rationalizability Leading to Nash Equilibrium 147

SUMMARY 151

KEY TERMS 151

EXERCISES 151

6

Combining Sequential and Simultaneous Moves 155

1 GAMES WITH BOTH SIMULTANEOUS AND SEQUENTIAL MOVES 156

- A. Two-Stage Games and Subgames 156
- B. Configurations of Multistage Games 160

2 CHANGING THE ORDER OF MOVES IN A GAME 162

- A. Changing Simultaneous-Move Games into Sequential-Move Games 163
- B. Other Changes in the Order of Moves 170

3 CHANGE IN THE METHOD OF ANALYSIS 171

- A. Illustrating Simultaneous-Move Games by Using Trees 171
- B. Showing and Analyzing Simultaneous-Move Games in Strategic Form 172

4 THREE-PLAYER GAMES 176

SUMMARY 179

KEY TERMS 180

EXERCISES 180

7**Simultaneous-Move Games with Mixed Strategies I:
Zero-Sum Games 185****1 WHAT IS A MIXED STRATEGY? 186****2 UNCERTAIN ACTIONS: MIXING MOVES TO KEEP THE OPPONENT
GUESSING 187**

A. Best-Response Analysis 188

B. The Minimax Method 194

3 NASH EQUILIBRIUM AS A SYSTEM OF BELIEFS AND RESPONSES 198**4 MIXING WHEN ONE PLAYER HAS THREE OR MORE PURE
STRATEGIES 199**

A. A General Case 200

B. Exceptional Cases 203

C. Case of Domination by a Mixed Strategy 204

5 MIXING WHEN BOTH PLAYERS HAVE THREE STRATEGIES 207

A. Full Mixture of All Strategies 208

B. Equilibrium Mixtures with Some Strategies Unused 210

6 EVIDENCE ON MIXING IN ZERO-SUM GAMES 212**7 HOW TO USE MIXED STRATEGIES IN PRACTICE 214****SUMMARY 216****KEY TERMS 217****EXERCISES 217****APPENDIX: Probability and Expected Utility 221****1 THE BASIC ALGEBRA OF PROBABILITIES 222**

A. The Addition Rule 224

B. The Modified Addition Rule 225

C. The Multiplication Rule 225

D. The Modified Multiplication Rule 226

E. The Combination Rule 227

F. Expected Values 228

2 ATTITUDES TOWARD RISK AND EXPECTED UTILITY 228**SUMMARY 231****KEY TERMS 232**

8

Simultaneous-Move Games with Mixed Strategies II: Non-Zero-Sum Games and III: General Discussion 233

- 1 MIXING SUSTAINED BY UNCERTAIN BELIEFS 234
 - A. Will Harry Meet Sally? 234
 - B. Diced Chicken? 239
- 2 NON-ZERO-SUM MIXING WITH THREE STRATEGIES 241
- 3 GENERAL DISCUSSION OF MIXED-STRATEGY EQUILIBRIA 243
 - A. Weak Sense of Equilibrium 244
 - B. Opponent's Indifference and Guarding Against Exploitation 244
 - C. Counterintuitive Outcomes with Mixed Strategies in Zero-Sum Games 245
 - D. Another Counterintuitive Result for Non-Zero-Sum Games 249
- 4 EVIDENCE ON MIXING IN NON-ZERO-SUM GAMES 250
- 5 MIXING AMONG THREE OR MORE STRATEGIES: GENERAL THEORY 250
- SUMMARY 257
- KEY TERMS 258
- EXERCISES 258

PART THREE

Some Broad Classes of Games and Strategies

9

Uncertainty and Information

263

- 1 ASYMMETRIC INFORMATION: BASIC IDEAS 264
- 2 DIRECT COMMUNICATION, OR "CHEAP TALK" 266
- 3 SIGNALING AND SCREENING 272
- 4 INCENTIVE PAYMENTS 277
- 5 EQUILIBRIA IN SIGNALING GAMES 280
 - A. Separating Equilibrium 284
 - B. Pooling Equilibrium 285
 - C. Semiseparating Equilibrium 287
 - D. General Theory 289

6 EVIDENCE ABOUT SIGNALING AND SCREENING	292
SUMMARY	294
KEY TERMS	295
EXERCISES	295
APPENDIX: Information and Risk	300
1 INFERRING PROBABILITIES FROM OBSERVING CONSEQUENCES	301
2 CONTROLLING AND MANIPULATING RISK	304
A. Strategies to Reduce Risk	304
B. Using Risk	307
C. Manipulating Risk in Contests	307
SUMMARY	309
KEY TERMS	310

10 Strategic Moves 311

1 A CLASSIFICATION OF STRATEGIC MOVES	312
A. Unconditional Strategic Moves	313
B. Conditional Strategic Moves	314
2 CREDIBILITY OF STRATEGIC MOVES	315
3 COMMITMENTS	317
4 THREATS AND PROMISES	321
A. Example of a Threat: U.S.–Japan Trade Relations	322
B. Example of a Promise: The Restaurant Pricing Game	326
C. Example Combining Threat and Promise: Joint U.S.–China Political Action	328
5 SOME ADDITIONAL TOPICS	329
A. When Do Strategic Moves Help?	329
B. Deterrence Versus Compellence	330
6 ACQUIRING CREDIBILITY	331
A. Reducing Your Freedom of Action	331
B. Changing Your Payoffs	333
7 COUNTERING YOUR OPPONENT'S STRATEGIC MOVES	337
A. Irrationality	337
B. Cutting Off Communication	337
C. Leaving Escape Routes Open	338

D. Undermining Your Opponent's Motive to Uphold His Reputation 338

E. Salami Tactics 338

SUMMARY 339

KEY TERMS 340

EXERCISES 340

11 The Prisoners' Dilemma and Repeated Games 345

1 THE BASIC GAME (REVIEW) 346

2 SOLUTIONS I: REPETITION 347

A. Finite Repetition 348

B. Infinite Repetition 349

C. Games of Unknown Length 353

D. General Theory 354

3 SOLUTIONS II: PENALTIES AND REWARDS 356

4 SOLUTIONS III: LEADERSHIP 359

5 EXPERIMENTAL EVIDENCE 362

6 REAL-WORLD DILEMMAS 365

A. Governments Competing to Attract Business 365

B. Labor Arbitration 367

C. Evolutionary Biology 368

D. Price Matching 369

SUMMARY 372

KEY TERMS 372

EXERCISES 373

APPENDIX: Infinite Sums 378

12 Collective-Action Games 382

1 COLLECTIVE-ACTION GAMES WITH TWO PLAYERS 383

2 COLLECTIVE-ACTION PROBLEMS IN LARGE GROUPS 387

3 A BRIEF HISTORY OF IDEAS 393

4 SOLVING COLLECTIVE-ACTION PROBLEMS 394

A. Analysis 395

B. Applications 400

5	SPILOVERS, OR EXTERNALITIES	403
	A. The Calculus of the General Case	406
	B. Negative Spillovers	406
	C. Positive Spillovers	411
6	"HELP!": A GAME OF CHICKEN WITH MIXED STRATEGIES	414
	SUMMARY	418
	KEY TERMS	419
	EXERCISES	420

13

Evolutionary Games

425

1	THE FRAMEWORK	426
2	PRISONERS' DILEMMA	430
	A. The Repeated Prisoners' Dilemma	432
	B. Multiple Repetitions	436
	C. Comparing the Evolutionary and Rational-Player Models	437
3	CHICKEN	439
4	THE ASSURANCE GAME	441
5	INTERACTIONS ACROSS SPECIES	444
6	THE HAWK-DOVE GAME	447
	A. Rational Strategic Choice and Equilibrium	448
	B. Evolutionary Stability for $V > C$	448
	C. Evolutionary Stability for $V < C$	449
	D. $V < C$: Stable Polymorphic Population	450
	E. $V < C$: Each Player Mixes Strategies	450
7	THREE PHENOTYPES IN THE POPULATION	452
	A. Testing for ESS	452
	B. Dynamics	453
8	SOME GENERAL THEORY	456
9	PLAYING THE FIELD	458
10	EVOLUTION OF COOPERATION AND ALTRUISM	459
	SUMMARY	462
	KEY TERMS	463
	EXERCISES	463

PART FOUR

Applications to Specific Strategic Situations

14 Brinkmanship: The Cuban Missile Crisis 471

- 1 A BRIEF NARRATION OF EVENTS 472
- 2 A SIMPLE GAME-THEORETIC EXPLANATION 479
- 3 ACCOUNTING FOR ADDITIONAL COMPLEXITIES 481
- 4 A PROBABILISTIC THREAT 487
- 5 PRACTICING BRINKMANSHIP 491
- SUMMARY 495
- KEY TERMS 496
- EXERCISES 496

15 Strategy and Voting 500

- 1 VOTING RULES AND PROCEDURES 501
 - A. Binary Methods 501
 - B. Plurative Methods 502
 - C. Mixed Methods 503
- 2 VOTING PARADOXES 505
 - A. The Condorcet Paradox 505
 - B. The Agenda Paradox 507
 - C. The Reversal Paradox 508
 - D. Change the Voting Method, Change the Outcome 509
- 3 GENERAL IDEAS PERTAINING TO PARADOXES 510
 - A. Black's Condition 512
 - B. Robustness 513
 - C. Intensity Ranking 513
- 4 STRATEGIC MANIPULATION OF VOTES 514
 - A. Plurality Rule 515
 - B. Pairwise Voting 517
 - C. Strategic Voting with Incomplete Information 520
- 5 GENERAL IDEAS PERTAINING TO MANIPULATION 523

6 THE MEDIAN VOTER THEOREM	524
A. Discrete Political Spectrum	525
B. Continuous Political Spectrum	528
SUMMARY	531
KEY TERMS	531
EXERCISES	532

16 Bidding Strategy and Auction Design 538

1 TYPES OF AUCTIONS	539
2 THE WINNER'S CURSE	541
3 BIDDING STRATEGIES	544
4 VICKREY'S TRUTH SERUM	545
5 ALL-PAY AUCTIONS	547
6 HOW TO SELL AT AUCTION	550
A. Risk-Neutral Bidders and Independent Estimates	550
B. Risk-Averse Bidders	551
C. Correlated Estimates	552
7 SOME ADDED TWISTS TO CONSIDER	554
A. Multiple Objects	554
B. Defeating the System	555
C. Information Disclosure	557
8 AUCTIONS ON THE INTERNET	557
9 ADDITIONAL READING ON THE THEORY AND PRACTICE OF AUCTIONS	560
SUMMARY	561
KEY TERMS	562
EXERCISES	562

17 Bargaining 566

1 NASH'S COOPERATIVE SOLUTION	568
A. Numerical Example	568
B. General Theory	569
2 VARIABLE-THREAT BARGAINING	575

3 ALTERNATING-OFFERS MODEL I: TOTAL VALUE DECAYS 577

4 EXPERIMENTAL EVIDENCE 579

5 ALTERNATING-OFFERS MODEL II: IMPATIENCE 582

6 MANIPULATING INFORMATION IN BARGAINING 587

7 BARGAINING WITH MANY PARTIES AND ISSUES 590

 A. Multi-Issue Bargaining 590

 B. Multiparty Bargaining 592

SUMMARY 592

KEY TERMS 593

EXERCISES 593

18 Markets and Competition 596

1 A SIMPLE TRADING GAME 598

2 THE CORE 606

 A. Numerical Example 608

 B. Some Properties of the Core 609

 C. Discussion 611

3 THE MARKET MECHANISM 613

 A. Properties of the Market Mechanism 615

 B. Experimental Evidence 617

4 THE SHAPLEY VALUE 618

 A. Power in Legislatures and Committees 620

 B. Allocation of Joint Costs 622

5 FAIR DIVISION MECHANISMS 624

SUMMARY 625

KEY TERMS 626

EXERCISES 626

Glossary 629

Index 647
