# Contents

<b>Preface</b> .....	vii
<b>List of Abbreviations and Symbols</b> .....	xv
<hr/>	
<b>Part I One-Dimensional Observations</b>	
<hr/>	
<b>1 Limit Distributions and Domains of Attraction</b> .....	3
1.1 Extreme Value Theory: Basics .....	3
1.1.1 Introduction .....	3
1.1.2 Alternative Formulations of the Limit Relation .....	4
1.1.3 Extreme Value Distributions .....	6
1.1.4 Interpretation of the Alternative Conditions; Case Studies ..	12
1.1.5 Domains of Attraction: A First Approach .....	14
1.2 Domains of Attraction .....	19
Exercises .....	34
<b>2 Extreme and Intermediate Order Statistics</b> .....	37
2.1 Extreme Order Statistics and Poisson Point Processes .....	37
2.2 Intermediate Order Statistics .....	40
2.3 Second-Order Condition .....	43
2.4 Intermediate Order Statistics and Brownian Motion .....	49
Exercises .....	60
<b>3 Estimation of the Extreme Value Index and Testing</b> .....	65
3.1 Introduction .....	65
3.2 A Simple Estimator for the Tail Index ( $\gamma > 0$ ): The Hill Estimator .	69
3.3 General Case $\gamma \in \mathbb{R}$ : The Pickands Estimator .....	83
3.4 The Maximum Likelihood Estimator ( $\gamma > -\frac{1}{2}$ ) .....	89
3.5 A Moment Estimator ( $\gamma \in \mathbb{R}$ ) .....	100
3.6 Other Estimators .....	110
3.6.1 The Probability-Weighted Moment Estimator ( $\gamma < 1$ ) .....	110

3.6.2	The Negative Hill Estimator ( $\gamma < -\frac{1}{2}$ )	113
3.7	Simulations and Applications	116
3.7.1	Asymptotic Properties	116
3.7.2	Simulations	120
3.7.3	Case Studies	121
	Exercises	124
4	<b>Extreme Quantile and Tail Estimation</b>	127
4.1	Introduction	127
4.2	Scale Estimation	130
4.3	Quantile Estimation	133
4.3.1	Maximum Likelihood Estimators	139
4.3.2	Moment Estimators	140
4.4	Tail Probability Estimation	141
4.4.1	Maximum Likelihood Estimators	145
4.4.2	Moment Estimators	145
4.5	Endpoint Estimation	145
4.5.1	Maximum Likelihood Estimators	147
4.5.2	Moment Estimators	147
4.6	Simulations and Applications	148
4.6.1	Simulations	148
4.6.2	Case Studies	149
	Exercises	153
5	<b>Advanced Topics</b>	155
5.1	Expansion of the Tail Distribution Function and Tail Empirical Process	155
5.2	Checking the Extreme Value Condition	163
5.3	Convergence of Moments, Speed of Convergence, and Large Deviations	176
5.3.1	Convergence of Moments	176
5.3.2	Speed of Convergence; Large Deviations	179
5.4	Weak and Strong Laws of Large Numbers and Law of the Iterated Logarithm	188
5.5	Weak "Temporal" Dependence	195
5.6	Mejzler's Theorem	201
	Exercises	204

---

## Part II Finite-Dimensional Observations

---

6	<b>Basic Theory</b>	207
6.1	Limit Laws	207
6.1.1	Introduction: An Example	207
6.1.2	The Limit Distribution; Standardization	208
6.1.3	The Exponent Measure	211

6.1.4	The Spectral Measure .....	214
6.1.5	The Sets $Q_c$ and the Functions $L$ , $\chi$ , and $A$ .....	221
6.2	Domains of Attraction; Asymptotic Independence .....	226
	Exercises .....	230
<b>7</b>	<b>Estimation of the Dependence Structure .....</b>	<b>235</b>
7.1	Introduction .....	235
7.2	Estimation of the Function $L$ and the Sets $Q_c$ .....	235
7.3	Estimation of the Spectral Measure (and $L$ ) .....	247
7.4	A Dependence Coefficient .....	258
7.5	Tail Probability Estimation and Asymptotic Independence: A Simple Case .....	261
7.6	Estimation of the Residual Dependence Index $\eta$ .....	265
	Exercises .....	268
<b>8</b>	<b>Estimation of the Probability of a Failure Set .....</b>	<b>271</b>
8.1	Introduction .....	271
8.2	Failure Set with Positive Exponent Measure .....	276
8.2.1	First Approach: $c_n$ Known .....	276
8.2.2	Alternative Approach: Estimate $c_n$ .....	278
8.2.3	Proofs .....	279
8.3	Failure Set Contained in an Upper Quadrant; Asymptotically Independent Components .....	285
8.4	Sea Level Case Study .....	288
	Exercises .....	289

---

### Part III Observations That Are Stochastic Processes

---

<b>9</b>	<b>Basic Theory in <math>C[0, 1]</math> .....</b>	<b>293</b>
9.1	Introduction: An Example .....	293
9.2	The Limit Distribution; Standardization .....	294
9.3	The Exponent Measure .....	296
9.4	The Spectral Measure .....	302
9.5	Domain of Attraction .....	311
9.6	Spectral Representation and Stationarity .....	314
9.6.1	Spectral Representation .....	314
9.6.2	Stationarity .....	315
9.7	Special Cases .....	321
9.8	Two Examples .....	323
	Exercises .....	328
<b>10</b>	<b>Estimation in <math>C[0, 1]</math> .....</b>	<b>331</b>
10.1	Introduction: An Example .....	331
10.2	Estimation of the Exponent Measure: A Simple Case .....	332
10.3	Estimation of the Exponent Measure .....	335

10.4	Estimation of the Index Function, Scale and Location .....	338
10.4.1	Consistency .....	339
10.4.2	Asymptotic Normality .....	344
10.5	Estimation of the Probability of a Failure Set .....	349

---

**Part IV Appendix**

---

<b>A</b>	<b>Skorohod Theorem and Vervaat's Lemma .....</b>	<b>357</b>
<b>B</b>	<b>Regular Variation and Extensions .....</b>	<b>361</b>
B.1	Regularly Varying (RV) Functions .....	361
B.2	Extended Regular Variation ( <i>ERV</i> ); The class $\Pi$ .....	371
B.3	Second-Order Extended Regular Variation (2ERV) .....	385
B.4	ERV with an Extra Parameter .....	401
	<b>References .....</b>	<b>409</b>
	<b>Index .....</b>	<b>415</b>
