Abstract	
Editor's preface	
Preface	
Acknowledgement	
Content	

1. INTRODUCTION	1
1.1 Choice of subject.....	1
1.2 Aims and objectives	2
1.3 Problems and hypotheses	3
1.4 State-of-the-art in conservation of jappanning and neighbouring fields of conservation	4
a) <i>Recent research and literature</i>	5
1.5 Delimitations.....	9
a) <i>Objects</i>	9
b) <i>Documents</i>	9
1.6 Sources of information and method	10
a) <i>Sources</i>	10
b) <i>Method</i>	13
2. MEANING OF PRESERVATION AND CONSERVATION	15
2.1 Some fundamental aspects on conservation practice.....	17
a) <i>System box-in-box thinking</i>	18
2.2 Evolution of "modern" conservation	18
2.3 Implications for object conservation.....	21
a) <i>The "cleaning controversy" in object conservation</i>	23
2.4 Conservation at different system levels	24
a) <i>At object level</i>	24
b) <i>At museum level</i>	25
c) <i>At society level</i>	25
3. ANALYSES OF OBJECTS AND DOCUMENTS	29
a) <i>Objects</i>	29
b) <i>Documents</i>	30
3.1 Sampling and specimen preparation	31
a) <i>Sampling of objects</i>	31
b) <i>Specimen preparation to sections</i>	32
3.2 Analysis of binding media and film formers	33
a) <i>Microscopy</i>	34
b) <i>Topochemical test</i>	35
c) <i>Solubility test</i>	37
d) <i>FTIR-ATR and FTIR microspectroscopy</i>	37
e) <i>GC-MS and PyGC-MS</i>	38
3.3 Analysis of pigments, colourants and fillers	39
a) <i>Microscopy</i>	41
b) <i>Topochemical test</i>	41
c) <i>ESEM-EDS</i>	43
3.4 Analysis of working plans and intermediate procedures	43
3.5 Analysis of structural alteration and craquelure	45
a) <i>Quality of work in relation to training and organisation</i>	45
b) <i>Quality of work in relation to spreading of the craft</i>	46
c) <i>Quality of work in relation to present state of condition</i>	47

d) Alterations at the external surfaces of the objects	48
e) Alterations of the inner structures of the objects	51
3.6 Analysis of documents	52
3.7 Documentation of observations.....	55
a) Documentation form for sections and crushed specimens	55
b) Documentation form for sections and application guidelines of recipes	57
4. NATURE OF JAPANNED SURFACES.....	61
4.1 Wood substrates	62
a) Wood anatomy.....	63
b) Wood recommendations in contemporary documents	66
c) Wood as found in objects	68
4.2 Grounds.....	70
a) Grounding materials and procedures in contemporary documents	70
b) Some basic characteristics of gesso grounds common in contemporary documents	73
c) Grounds as found on objects	74
4.3 Pigmentation	79
a) Pigment and colourant recommendations in contemporary documents	79
b) Some basic characteristics of pigments and colourants common in contemporary documents.....	84
c) Pigments and colourants as found on objects	85
4.4 Binders and film formers	92
a) Some basic characteristics of resins.....	93
b) Some basic characteristics of linseed oil	95
c) Solubility.....	96
d) Transparency and uncolouredness	97
e) Working temperature.....	98
f) Binders and film-forming substances in contemporary documents	98
g) Generic names of resins	103
h) Binders and film formers as found on objects	103
4.5 Decoration.....	116
a) Motifs	117
b) Guidelines on metal powders in contemporary documents.....	117
c) Metals as found on objects	119
d) Guidelines on raised work in documents	120
e) Raised work as found on objects.....	121
4.6 Coating Systems.....	123
a) Coating systems in contemporary documents.....	123
b) Coating systems as observed on objects	129
4.7 Tools	132
5. CHANGES IN STATE NOTED WITH JAPANNED OBJECTS.....	139
5.1 Change versus damage.....	139
5.2 Good condition.....	141
5.3 Physical change.....	142
a) Soiling	142
b) Dimensional change.....	143
c) Warp.....	145
d) Structural alteration.....	146
e) Changes observed on objects	148
5.4 Chemical change	154
a) Discolouration.....	154
b) Discolouration observed on objects	156
c) Corrosion.....	157

d) <i>Corrosion observed on objects</i>	159
5.5 Biodegradation.....	159
a) <i>Signs of biodegradation observed on objects</i>	161
6. CONSERVATION AND RESTORATION METHODS.....	
6.1 Cleaning and stripping.....	164
a) <i>Removal of soil, dust and dirt</i>	165
b) <i>Removal of secondary coatings and earlier restoration materials</i>	166
c) <i>Stripping of transparent coatings</i>	166
6.2 Consolidation, flake attachment and regeneration.....	167
a) <i>Consolidation of substrate</i>	169
b) <i>Consolidation of ground</i>	170
c) <i>Consolidation of pigmented coatings</i>	171
d) <i>Consolidation of transparent coatings and so-called regeneration</i>	171
6.3 Filling, retouching and recoating.....	172
a) <i>Filling</i>	173
b) <i>Retouching</i>	174
c) <i>Recoating</i>	174
6.4 Correction of distortion.....	174
6.5 Future needs.....	175
7. CONCLUSIONS.....	179
7.1 Principle versus principle.....	179
a) <i>Geographical tendency</i>	181
b) <i>Tendency in time</i>	182
c) <i>Similarity of sources</i>	183
d) <i>Similarity of recipes</i>	185
7.2 Principles versus practise.....	189
a) <i>Concerning substrate</i>	189
b) <i>Concerning wood preparation</i>	190
c) <i>Concerning grounding</i>	190
d) <i>Concerning pigmented lacquer layers</i>	190
e) <i>Concerning coating systems</i>	191
f) <i>Concerning the stratigraphy and performance of intermediate procedures</i>	191
g) <i>Potential use of written guidelines</i>	192
7.3 Object versus object.....	192
a) <i>Material-technical character related to present state</i>	193
b) <i>Objects of unknown provenance related to signed objects</i>	198
c) <i>Ascribe objects to the most similar group</i>	203
8. DISCUSSION.....	207
9. SUMMARY.....	213
10. COLOUR PLATES.....	217
11. REFERENCES.....	247
11.1 Abbreviations.....	247
11.2 Unpublished sources.....	247
11.3 Personal communication.....	249
11.4 Unprinted sources.....	249
11.5 Published sources.....	249
11.6 Historical documents on the craft of japanning and related issues.....	265

12. INDICES	269
12.1 Index of subjects	269
12.2 Index of persons	271
12.3 Index of objects	272
13. APPENDICES	
1. Paint sampler and its use	273
2. Sample preparation to cross and thin sections	274
3. List of objects examined, including positions of specimens and type of analysis	275
4. Experimental conditions: topochemical test	283
5. Experimental conditions: solubility test	291
6. Fourier Transform Infrared Spectrometry - Attenuated Total Internal Reflection (FTIR-ATR)	293
7. Gas chromatography - Mass spectrometry (GC-MS)	294
8. Pyrolysis gas chromatography - mass spectrometry (PyGC-MS)	295
9. Conversion of old measure units into modern units	296
10. Curve diagrams based on information excerpted from documents, and observation of objects	298
11. Components of manufacture and present state of objects	302
