1.1. Collaborators in the Development of the Virginia Adult Twin Study of Psychiatric and Substance Use Disorders	3
2.1. Content of the Twin Interviews	29
3.1. Tetrachoric Correlations	38
3.2. Calculating Twin-Model Estimates	42
3.3. Interpretation of Heritability Coefficients	44
4.1. Assessment of Major Depression (MD)	54
4.2. Confidence Intervals	56
4.3. Assessment of Panic	60
4.4. Assessment of Generalized Anxiety Disorder (GAD)	64
4.5. Assessment of Phobias	68
5.1. Assessment of Antisocial Behavior	83
5.2. Substance Abuse and Dependence in the DSM	89
5.3. Assessment of Alcohol Use, Abuse, and Dependence	90
5.4. Assessment of Tobacco Use and Nicotine Dependence	93
5.5. Assessment of Caffeine Use and Use-Related Problems	95
5.6. Assessment of Illicit Drug Use, Abuse, and Dependence	98
5.7. Assessment of Bulimia	104
6.1. Assessment of Twin Environmental Similarity	117
7.1. Assessment of Parenting in the VATSPSUD	131
7.2. Defining Parental Loss	138
7.3. Assessment of Childhood Sexual Abuse	144

8.1. Types of Stressful Life Events	151
8.2. Diagnostic Definitions Used in SLE Studies	153
8.3. Life Event Ratings	155
8.4. Psychological Dimensions of Life Events	157
8.5. Measuring Social Support	163
11.1. Understanding Models for Comorbidity	201
11.2. Personality	218
11.3. Assessment of Drinking Motives	221
16.1. Measures Used for Study of Parenting and Problem Drinking	305
16.2. Model for Moderated Genetic and Environmental Effects	309
16.3. Assessment of Family Dysfunction	312
17.1. Predictor Variables	322

Contents

List of Sidebars	xi
List of Abbreviations	xiii
Introduction	1
Overture	2
Structure	4
The Development of the VATSPSUD	5
 PART I. BACKGROUND	
1. The Scientific and Social Context of the Virginia Adult Twin Study of Psychiatric and Substance Use Disorders	11
Biometrical Genetics	11
Psychiatric Twin Studies	12
Psychiatric Epidemiology	13
A New Paradigm for Twin Studies	15
Genes	16
The Social and Political Context of the VATSPSUD	17
Our Philosophy of Science	18
2. Methodology Used in the VATSPSUD	20
Organization and Terminology	20
Samples	21
<i>Selection and Recruitment</i>	22
<i>The Female–Female Twin Study</i>	22
<i>The Female–Female–Parent Study</i>	25
<i>The Male–Male/Male–Female Twin Study</i>	25
<i>Representativeness of Our Samples</i>	27

Assessment 28
 Overview 28
 Assessment of Zygosity 30
 Assessment Procedures 31

3. Twinning and Twin Models **34**

Representativeness of Twins 36
Analysis Basics 37
 Twin-Pair Similarity 37
 Basics of Twin Models 40
 Structural Models and Model Fitting 41
 Statistical Significance and Precision 43
 Path Diagrams 45

PART II. GENETIC RISK

4. Internalizing Disorders **51**

Major Depression 51
 Genetic and Environmental Influences 53
 Discussion and Implications 57
Panic Disorder 58
 Genetic and Environmental Influences 59
 Discussion and Implications 62
Generalized Anxiety Disorder 63
 Discussion and Implications 65
Phobias 66
 Theories of Etiology 67
 Genetic and Environmental Influences 70
 Discussion and Implications 73
Summary 74

5. Externalizing and Substance Use Disorders **81**

Antisocial Behavior 82
 Results from Twin-Pair Models 84
 Genetic Influences: Evidence and Implications 86
 Shared Environmental Influences 87
Substance Abuse and Dependence 87
 Alcohol 88
 Nicotine 93
 Caffeine 95
 Illicit Substances 97
 Genetic Mechanisms 100
 The Role of Environmental Factors in Liability to Substance Use Disorders 102
Bulimia 103

6. Twin Model Assumptions**114**

- Random Mating 114
- Equal Environment Assumption 115
 - Similarity of Environmental Exposures* 116
 - Parental Treatment* 121
 - Physical Resemblance* 122
 - Perceived versus True Zygosity* 122
- Summary 124

PART III. ENVIRONMENTAL RISK**7. Childhood Experiences and Risk for Psychopathology****129**

- Is Parenting Received in Childhood Associated with Adult Psychopathology? 130
 - Interactions among Parent Dimensions* 135
 - Interpretations* 136
- Is Parental Loss a Risk Factor for Psychiatric Disorders? 137
- Is Childhood Sexual Abuse Associated with Psychiatric Disorders? 142
- Summary 144

8. Adult Experiences and Risk for Psychopathology**148**

- Stressful Life Events 148
 - Severity and Number of Events* 153
 - Independence versus Dependence of Events* 154
 - Psychological Dimensions of Events and Episode Type* 156
 - Causality* 160
- Social Support 162
- Summary 165

PART IV. A CLOSER LOOK AT GENETIC AND ENVIRONMENTAL INFLUENCES**9. Sex Differences****169**

- Types of Sex Differences 169
- Major Depression 172
- Anxiety Disorders 174
- Antisocial Behavior 175
- Alcoholism 176
- Nicotine Dependence 177
- Illicit Substance Abuse and Dependence 178
- Summary 179

10. Genetic and Environmental Influences on Stability and Change	181
Stability and Change in Major Depression in Women	182
<i>Implications</i>	185
Influences on the Development of Antisocial Behavior	188
Stability and Change in Alcohol Consumption in Women	192
<i>Effects of Age and Cohort</i>	194
Summary	196
11. The Genetics of What?: Comorbidity, General versus Specific Effects, and Risk Indicators	199
Studying the Sources of Comorbidity	200
<i>Comorbidity of Major Depression and Generalized Anxiety</i>	201
<i>Comorbidity of Major Depression and Social Phobia</i>	202
<i>Mechanisms for Comorbidity:</i>	
<i>Alcoholism and Major Depression</i>	203
Common and Specific Risk Factors for Multiple Disorders	207
<i>Common and Specific Influences on Phobia Subtypes</i>	208
<i>Common and Specific Influences on Substance Use Disorders</i>	211
<i>Multivariate Analyses of Psychiatric and Substance Use Disorders</i>	213
Risk Indicators	216
<i>Novelty Seeking as an Indicator of Risk for Cannabis Use and Abuse</i>	217
<i>Mediators of Risk</i>	219
<i>Drinking Motivations as Mediators versus Indicators of Risk for Alcoholism</i>	220
<i>Neuroticism as an Indicator or Mediator of Risk for Depression</i>	224
Summary	226
12. Three Extensions of the Twin Model	229
Genetic Influences on Conditional Processes	229
Cross-Generational Transmission of Risk	234
Dealing with Unreliability	237
<i>Twin Measurement Model</i>	238
<i>Multiple-Rater Model</i>	240
<i>Conclusions about Unreliability</i>	245
Summary	245
 PART V. BRINGING IT ALL TOGETHER	
13. The Genetics of the Environment	251
Stressful Life Events	252
<i>Sources of Individual Differences in Reported Life Events: A Cross-Sectional Study</i>	252

<i>Sources of Individual Differences in Reported Life Events: A Longitudinal Study</i>	255
Social Support	257
Parenting	260
<i>Parenting Received</i>	260
<i>Parenting Given</i>	262
<i>Interpretation of Parenting Studies</i>	262
Summary	263
14. Mechanisms for Genetic Control of Exposure to the Environment	267
Mechanisms through Which Genetic Factors Influence Exposure to Environmental Stress	267
<i>Stressful Life Events</i>	268
<i>Social Support</i>	270
<i>Implications</i>	270
Are the Genetic Risk Factors for Environmental Adversities Related to Those for Psychiatric Disorders?	271
Summary	273
15. Is the Relation between Environmental Risk Factors and Psychiatric Disorders Causal?	275
Cotwin-Control Design	276
<i>Does Early Drinking Increase Risk for Alcoholism?</i>	278
<i>Are Stressful Life Events Causal for Depression?</i>	281
<i>Does Smoking Predispose to Depression?</i>	282
<i>Is Childhood Sexual Abuse Causal for Psychiatric Disorders?</i>	283
<i>Childhood Parental Loss and Risk for Alcoholism</i>	284
Summary	289
16. Genetic Control of Sensitivity to the Environment	291
Examples of Genetic Control of Sensitivity to the Environment	293
Evidence for Genetic Control of Sensitivity to the Environment in the VATSPSUD	294
<i>Genes, Stressful Live Events, and Major Depression</i>	295
<i>Are the Effects of Parental Alcoholism Moderated by Parental Rearing Style?</i>	304
Moderation of Genetic Effects by Environmental Risk Factors	307
<i>Family Dysfunction and the Heritability of Neuroticism</i>	308
<i>Family Dysfunction and the Heritability of Cigarette Smoking</i>	313
Summary	315
17. Integrative Models	320
Integrative Model for Major Depression in Women	320
<i>Childhood Risk Factors</i>	323
<i>Risk Factors of Early Adolescence</i>	325
<i>Risk Factors of Late Adolescence</i>	327

<i>Adult Risk Factors</i>	327
<i>Pastt-Year Risk Factors</i>	327
<i>Episode of Major Depression in the Past Year</i>	327
<i>Interpretation of Results</i>	329
Integrative Model for Major Depression in Men	333
Methodological Limitations	336
18. Conclusions	339
The VATSPSUD and the New Molecular Genetics	348
Philosophical Implications	349
References	351
Publications from the VATSPSUD	377
Author Index	391
Subject Index	401
