

# TABLE OF CONTENTS

<b>Preface</b> .....	<b>vii</b>
 <b>Methodology</b>	
1. Access to glacial and subglacial environments in the Solar System by melting probe technology .....	1
2. Exploration of Ellsworth Subglacial Lake: a concept paper on the development, organisation and execution of an experiment to explore, measure and sample the environment of a West Antarctic subglacial lake .....	25
3. Thermostable proteins as probe for the design of advanced fluorescence biosensors .....	45
 <b>Geology</b>	
4. Astrobiological significance of minerals on Mars surface environment .....	55
5. Industrial barrens: extreme habitats created by non-ferrous metallurgy .....	69
 <b>Microbial life in extreme environments</b>	
<i>Viruses</i>	
6. Viruses in extreme environments .....	99
 <i>Bacteria and microbial foodwebs</i>	
7. Microbial ecology of submerged marine caves and holes characterised by high levels of hydrogen sulphide .....	115
8. Extremely halophilic archaea and the issue of long-term microbial survival .....	125
9. Planktonic microbial assemblages and the potential effects of metazooplankton predation on the food web of lakes from the maritime Antarctica and sub-Antarctic islands .....	141
 <i>Fungi and yeasts</i>	
10. Fungi in Antarctica .....	161
11. Ecology and molecular adaptations of the halophilic black yeast <i>Hortaea werneckii</i> .....	177

**Life strategies of plants in extreme environments**

12. Ultraviolet radiation shapes seaweed communities .....	187
13. Life strategy, ecophysiology and ecology of seaweeds in polar waters .....	213
14. Life expansion in Sørkapp Land, Spitsbergen, under the current climate warming .....	245
15. Some views on plants in polar and alpine regions .....	251
16. Desiccation-tolerant plants in dry environments .....	265
17. Energy dependant plant stress acclimation .....	277

**Life strategies of animals in extreme environments**

18. Post-capture investigations of hydrothermal vent macro-invertebrates to study adaptations to extreme environments .....	287
19. Adaptations to hypoxia in hydrothermal-vent and cold-seep invertebrates .....	297
20. How does the annelid <i>Alvinella pompejana</i> deal with an extreme hydrothermal environment? .....	315
21. Pressure and life: some biological strategies .....	341
22. Molecular evolution of haemoglobins of polar fishes .....	357
23. Metal detoxification and homeostasis in Antarctic Notothenioids. A comparative survey on evolution, expression and functional properties of fish and mammal metallothioneins .....	369
24. Predicting the impacts of climate change on the evolutionary adaptations of polar fish ..	385

**Human adaptation in extreme environments**

25. Human challenges in polar and space environments .....	399
26. Hypometabolic induced state: a potential tool in biomedicine and space exploration .....	415
27. A proposed classification of environmental adaptation: the example of high altitude .....	429
28. The challenge of the food sufficiency through salt tolerant crops .....	437
