<i>List of Figures and Tables</i>	vii
<i>Preface</i>	ix
<i>Acknowledgements</i>	xiii
 Introduction	 I
1. How It All Began	9
2. Our Microbial Inheritance	29
3. Microbes Jump Species	54
4. Crowds, Filth and Poverty	82
5. Microbes Go Global	112
6. Famine and Devastation	139
7. Deadly Companions Revealed	161
8. The Fight Back	184
Conclusion: Living Together	211

## CONTENTS

<i>Glossary</i>	216
<i>Notes and References</i>	228
<i>Further Reading</i>	238
<i>Index</i>	241

## *Figures and Tables*

### FIGURES

0.1	Relative sizes of organisms and their component parts	xi
0.2	SARS in Hong Kong	4
1.1	Incidence of West Nile fever in the USA, 1999–2004	20
1.2	$R_0$ : the basic reproductive number of an epidemic	22
2.1	Malaria parasite life cycle	39
3.1	Notification of measles cases in UK from 1963 to 1976	62
3.2	Drawings from the Ebers papyrus possibly depicting haematuria caused by schistosomiasis	70
3.3	An illustration of a penile sheath worm in Ancient Egypt, circa XIX Dynasty. 1350–1200BC	71
3.4	Schistosomiasis: transmission cycle of <i>Schistosomiasis mansoni</i>	73
4.1	Map showing the advance of the Black Death	87
4.2	Map of present day plague foci worldwide	93
4.3	Plague cycles	98
5.1	Title page from Bartholomew Steber's <i>Syphilis</i> , 1497 or 1498	126
5.2	Cholera: a map showing its pandemic spread, 1959–94	132

## LIST OF FIGURES AND TABLES

5.3	Cholera: the natural and epidemic cycles of <i>Vibrio cholera</i>	136
6.1	A section of a leaf showing the potato blight fungus growing and producing spores (Berkley 1846)	150
8.1	Population growth, 8000 BC–AD 1974	185
8.2	MRSA in England and Wales, 1989–2004	196
8.3	Worldwide distribution of TB	200
8.4	Geographical distribution of malaria worldwide	203
8.5	The emergence of pandemic flu virus strains after reassortment in a pig	206

## TABLES

1.1	$R_0$ values for human and animal microbes	23
3.1	Examples of species domesticated in different areas of the world	57
8.1	A sample of human pathogens which have emerged since 1977	187
