PART 1

9

INTRODUCTION 1

1 Ten principles of economics 3

How people make decisions 4
How people interact 8
How the economy as a whole works 11
Conclusion 15
Summary 16
Key concepts 16
Questions for review 16
Problems and applications 17

2 Thinking like an economist 19

The economist as scientist 20
The economist as policy advisor 28
Why economists disagree 30
Let's get going 32
Summary 33
Key concepts 33
Questions for review 34
Problems and applications 34
Appendix Graphing: A brief review 35

3 Interdependence and the gains from trade 45

A parable for the modern economy 46
The principle of comparative advantage 50
Applications of comparative advantage 53
Conclusion 56
Summary 57
Key concepts 57

Questions for review 57
Problems and applications 58

PART 2

SUPPLY AND DEMAND I: HOW MARKETS WORK 61

4 The market forces of supply and demand 63

Markets and competition 63
Demand 65
Supply 70
Supply and demand together 74
Conclusion: How prices allocate resources 80
Summary 82
Key concepts 83
Questions for review 83
Problems and applications 84

5 Elasticity and its application 87

The elasticity of demand 88
The elasticity of supply 97
Three applications of supply, demand and elasticity 101
Conclusion 105
Summary 106
Key concepts 106
Questions for review 107
Problems and applications 107

6 Supply, demand and government policies 109

Controls on prices 110
Taxes 118
Conclusion 125
Summary 126

Key concepts 126
 Questions for review 126
 Problems and applications 127

PART 3

SUPPLY AND DEMAND II: MARKETS AND WELFARE 129

7 Consumers, producers and the efficiency of markets 131

Consumer surplus 132
 Producer surplus 136
 Market efficiency 140
 Conclusion: Market efficiency and market failure 144
 Summary 146
 Key concepts 146
 Questions for review 146
 Problems and applications 147

8 Application: The costs of taxation 149

The deadweight loss of taxation 150
 The determinants of the deadweight loss 154
 Deadweight loss and tax revenue as taxes vary 157
 Conclusion 161
 Summary 161
 Key concept 161
 Questions for review 162
 Problems and applications 162

9 Application: International trade 165

The determinants of trade 166
 The winners and losers from trade 167
 The arguments for restricting trade 178
 Conclusion 184
 Summary 184
 Key concepts 185
 Questions for review 185
 Problems and applications 185

PART 4

THE ECONOMICS OF THE PUBLIC SECTOR 187

10 Externalities 189

Externalities and market inefficiency 190
 Private solutions to externalities 195
 Public policies towards externalities 198
 Conclusion 204
 Summary 204
 Key concepts 204
 Questions for review 205
 Problems and applications 205

11 Public goods and common resources 207

The different kinds of goods 207
 Public goods 209
 Common resources 214
 Conclusion: The importance of property
 rights 220
 Summary 220
 Key concepts 220
 Questions for review 221
 Problems and applications 221

12 The design of the tax system 223

A financial overview of the UK government 224
 Tax systems in other countries 232
 Taxes and efficiency 235
 Taxes and equity 239
 Conclusion: The trade-off between equity and
 efficiency 248
 Summary 249
 Key concepts 249
 Questions for review 249
 Problems and applications 250

FIRM BEHAVIOUR AND THE ORGANIZATION OF INDUSTRY 253

13 The costs of production 255

What are costs? 256
 Production and costs 258
 The various measures of cost 263
 Costs in the short run and in the long run 268
 Conclusion 271
 Summary 272
 Key concepts 272
 Questions for review 272
 Problems and applications 273

14 Firms in competitive markets 275

What is a competitive market? 276
 Profit maximization and the competitive firm's supply curve 278
 The supply curve in a competitive market 286
 Conclusion: Behind the supply curve 292
 Summary 292
 Key concepts 293
 Questions for review 293
 Problems and applications 293

15 Monopoly 295

Why monopolies arise 296
 How monopolies make production and pricing decisions 299
 The welfare cost of monopoly 306
 Public policy towards monopolies 310
 Price discrimination 315
 Conclusion: The prevalence of monopoly 319
 Summary 322
 Key concepts 322
 Questions for review 322
 Problems and applications 323

16 Oligopoly 327

Between monopoly and perfect competition 328
 Markets with only a few sellers 329
 Game theory and the economics of cooperation 337
 Public policy toward oligopolies 345
 Conclusion 350
 Summary 351
 Key concepts 351
 Questions for review 351
 Problems and applications 352

17 Monopolistic competition 355

Competition with differentiated products 356
 Advertising 362
 Conclusion 366
 Summary 367
 Key concept 367
 Questions for review 368
 Problems and applications 368

THE ECONOMICS OF LABOUR MARKETS 371

18 The markets for the factors of production 373

The demand for labour 374
 The supply of labour 380
 Equilibrium in the labour market 381
 The other factors of production: Land and capital 385
 Conclusion 389
 Summary 389
 Key concepts 389
 Questions for review 390
 Problems and applications 390

19 Earnings and discrimination 393

Some determinants of equilibrium wages 393
 The economics of discrimination 401
 Conclusion 406
 Summary 406
 Key concepts 407
 Questions for review 407
 Problems and applications 407

20 Income inequality and poverty 409

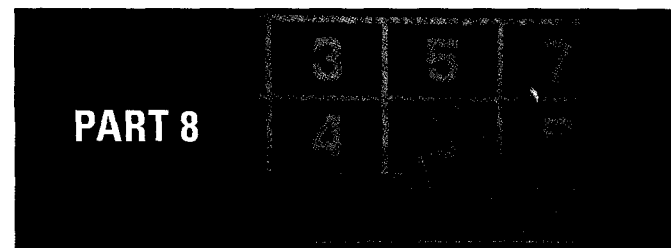

The measurement of inequality 410
 The political philosophy of redistributing income 414
 Policies to reduce poverty 417
 Conclusion 422
 Summary 423
 Key concepts 423
 Questions for review 423
 Problems and applications 424

**TOPICS FOR FURTHER STUDY 425****21 The theory of consumer choice 427**

The budget constraint: What the consumer can afford 428
 Preferences: What the consumer wants 429
 Optimization: What the consumer chooses 434
 Three applications 441
 Conclusion: Do people really think this way? 449
 Summary 449
 Key concepts 450
 Questions for review 450
 Problems and applications 450

22 Frontiers of microeconomics 453

Asymmetric information 454
 Political economy 459
 Behavioural economics 463
 Conclusion 468
 Summary 468
 Key concepts 468
 Questions for review 469
 Problems and applications 469

**THE DATA OF MACROECONOMICS 471****23 Measuring a nation's income 473**

The economy's income and expenditure 474
 The measurement of gross domestic product 476
 The components of GDP 479
 Real versus nominal GDP 481
 GDP and economic well-being 485
 Conclusion 489
 Summary 489
 Key concepts 490
 Questions for review 490
 Problems and applications 490

24 Measuring the cost of living 493

The consumer price index 494
 Correcting economic variables for the effects of inflation 501
 Conclusion 506
 Summary 507
 Key concepts 507
 Questions for review 507
 Problems and applications 508

PART 9

THE REAL ECONOMY IN THE LONG RUN 509

25 Production and growth 511

Economic growth around the world 512
Productivity: Its role and determinants 514
Economic growth and public policy 518
Conclusion: The importance of long-run growth 530
Summary 530
Key concepts 531
Questions for review 531
Problems and applications 531

26 Saving, investment and the financial system 533

Financial institutions in the economy 534
Saving and investment in the national income accounts 540
The market for loanable funds 542
Conclusion 548
Summary 549
Key concepts 549
Questions for review 550
Problems and applications 550

27 The basic tools of finance 553

Present value: Measuring the time value of money 554
Managing risk 556
Asset valuation 560
Conclusion 565
Summary 566
Key concepts 566
Questions for review 566
Problems and applications 567

28 Unemployment 569

Identifying unemployment 570
Job search 577
Minimum wage laws 581
Unions and collective bargaining 582
The theory of efficiency wages 585
Conclusion 588
Summary 589
Key concepts 589
Questions for review 589
Problems and applications 590

PART 10

MONEY AND PRICES IN THE LONG RUN 593

29 The monetary system 595

The meaning of money 596
The role of central banks 601
The European Central Bank and the Eurosystem 602
The Bank of England 603
The Federal Reserve system 604
Banks and the money supply 604
Conclusion 612
Summary 613
Key concepts 613
Questions for review 614
Problems and applications 614

30 Money growth and inflation 617

The classical theory of inflation 618
The costs of inflation 629
Conclusion 639
Summary 639
Key concepts 640
Questions for review 640
Problems and applications 640

PART 11**THE MACROECONOMICS OF OPEN ECONOMIES** 643**31 Open-economy macroeconomics: Basic concepts** 645

The international flows of goods and capital 646
 The prices for international transactions: Real and nominal exchange rates 655
 A first theory of exchange rate determination:
 Purchasing power parity 658
 Conclusion 663
 Summary 663
 Key concepts 664
 Questions for review 664
 Problems and applications 664

32 A macroeconomic theory of the open economy 667

Supply and demand for loanable funds and for foreign currency exchange 668
 Equilibrium in the open economy 672
 How policies and events affect an open economy 675
 Conclusion 683
 Summary 684
 Key concepts 684
 Questions for review 684
 Problems and applications 685

PART 12**SHORT-RUN ECONOMIC FLUCTUATIONS** 687**33 Aggregate demand and aggregate supply** 689

Three key facts about economic fluctuations 690
 Explaining short-run economic fluctuations 696
 The aggregate demand curve 699
 The aggregate supply curve 704
 Two causes of economic fluctuations 712
 Conclusion 721
 Summary 721
 Key concepts 722
 Questions for review 722
 Problems and applications 722

34 The influence of monetary and fiscal policy on aggregate demand 725

How monetary policy influences aggregate demand 726
 How fiscal policy influences aggregate demand 736
 Using policy to stabilize the economy 744
 Conclusion 752
 Summary 752
 Key concepts 753
 Questions for review 753
 Problems and applications 753

35 The short-run trade-off between inflation and unemployment 755

The Phillips curve 756
 Shifts in the Phillips curve: The role of expectations 759
 The long-run vertical Phillips curve as an argument for central bank independence 765

Shifts in the Phillips curve: The role of supply shocks 768
The cost of reducing inflation 770
Inflation targeting 774
Conclusion 780
Summary 781
Key concepts 781
Questions for review 781
Problems and applications 782

PART 13

THE FINANCIAL CRISIS OF 2007–2009 785

36 The causes of the financial crisis 787

Deregulation 788
Bubbles and speculation 790
The changed nature of banking 795
Asymmetric information, the bonus culture and risk 798
The bubble inflates: Sub-prime mortgages, securitization and credit default swaps 800
The bubble bursts 803
The path to global recession 811
Conclusion: The Causes of the Financial Crisis of 2007–09 816
Summary 816
Key concepts 817
Questions for review 817
Problems and applications 817

37 The fallout from the financial crisis 819

Efficient markets hypothesis: Dead and buried or just resting? 819
Pricing risk 823
The conduct of monetary policy 830
Lessons learned? The role of the regulators 839
Conclusion: The Fallout from the Financial Crisis 846
Summary 846
Key concepts 846
Questions for review 847
Problems and applications 847

PART 14

EUROPEAN MONETARY UNION 849

38 Common currency areas and European monetary union 851

The euro 852
The benefits and costs of a common currency 854
The theory of optimum currency areas 859
Is Europe an optimum currency area? 864
Fiscal policy and common currency areas 869
Conclusion 876
Summary 876
Key concepts 877
Questions for review 877
Problems and applications 878

PART 15

FINAL THOUGHTS 879

39 Five debates over macroeconomic policy 881

Should monetary and fiscal policy makers try to stabilize the economy? 881
Should monetary policy be made by rule rather than by discretion? 883
Should the government balance its budget? 886
Should the tax laws be reformed to encourage saving? 889
Should the UK join European monetary union? 891
Conclusion 895
Summary 895
Questions for review 896
Problems and applications 897

Glossary 899
Index 906
