Acknowledgments	xi
1 An introduction to linguistics and language studies	1
1.1 Ferdinand de Saussure	5
1.2 Noam Chomsky	8
1.3 M. A. K. Halliday	9
1.4 Conclusion	12
1.5 References and further readings	14
1.6 Some answers to the exercises	14
2 A focus on spoken interaction	16
2.1 Speech act theory: Doing things with words	17
2.2 Grice's conversational maxims	21
2.3 Politeness	24
2.4 The lexicogrammar of casual speech	26
2.4.1 Discourse markers	26
2.4.2 Vague language	31
2.4.3 Ellipsis	31
2.4.4 Intonation	31
2.4.5 Intonation patterns	35
2.5 The analysis of talk in interaction (conversation analysis)	36
2.5.1 Background	36
2.5.2 Turn allocation	37
2.5.3 Transcription conventions	40
2.6 Speech sounds	43
2.6.1 Introduction	43
2.6.2 Articulatory phonetics	45
2.6.2.1 Features of consonants in English: Point of articulation	46
2.6.2.2 Features of consonants in English: Manner of articulation	48
2.6.2.3 Features of vowels in English	52
2.6.3 Articulatory processes	56

2. 7 Phonology: Meaningful sounds across languages	59
2.7.1 From speech sounds to meaningful sounds	59
2.7.2 Phonemes and allophones	61
2.7.3 Phonemic tone and length	64
2.8 Further exercises	65
2.9 Chapter outcomes	67
2.10 References and further reading	68
2.11 Some answers to the exercises	70
3 Analyzing written language	82
3.1 Genre and text analysis	83
3.1.1 Genre	83
3.1.2 Textual patterns	89
3.1.2.1 Narrative	89
3.1.2.2 Problem-solution	92
3.1.2.3 Related patterns	95
3.1.2.4 Lexical signaling	97
3.2 Systemic Functional Linguistics	101
3.2.1 Groups	102
3.2.1.1 Nominal group	102
3.2.1.2 Verbal group	106
3.2.1.3 Other groups	110
3.2.2 Clause metafunctions	111
3.2.2.1 Clause as exchange	112
3.2.2.2 Clause as representation	119
3.2.3 Clause complexes and simplexes	128
3.2.3.1 Parataxis and hypotaxis	128
3.2.3.2 Embedded clauses	130
3.2.4 Clause as message	131
3.2.4.1 Theme-Rheme: structure and realization	131
3.2.4.2 Thematic patterning	135
3.3 Written and spoken language	141
3.3.1 Generic structure	141
3.3.2 Clause complexes and groups	141
3.3.2.1 Clause as exchange, representation and message	143
3.4 Chapter outcomes	146

3.5	References and further reading	148
3.6	Some answers to the exercises	149
4	Language and mind	169
4.1	Morphology: the construction of words	169
4.1.1	What's in a word?	169
4.1.2	Content words and function words	171
4.1.3	Morphemes	172
4.1.4	Morphophonemics	181
4.2	Morphology and syntax	184
4.3	Formal syntax	187
4.3.1	Phrase structure grammar	189
4.3.1.1	Immediate constituent analysis	189
4.3.1.2	Phrase structure rules	190
4.3.2	Transformational generative grammar	193
4.3.2.1	Motivation	193
4.3.2.2	Generative structure	195
4.3.2.3	Transformations	197
4.3.2.4	Structural ambiguity	199
4.3.2.5	Different deep structures	201
4.4	Semantics	203
4.4.1	Sense and reference	203
4.4.2	Semantic relations	204
4.4.3	Componential Analysis	207
4.4.4	Thematic roles	210
4.5	Chapter outcomes	212
4.6	References and further reading	212
4.7	Some answers to the exercises	213
5	Language change	232
5.1	Introduction	232
5.1.1	Development of human language	232
5.1.2	Tracing language change	233
5.1.3	Loss of world languages	236
5.1.4	Language degeneration...or change?	237
5.2	The ways in which languages change	238
5.2.1	A very brief history of English	238

5.2.2 Lexical growth and loss	240
5.2.3 Semantic change	247
5.2.4 Sound change	251
5.2.4.1 Individual sounds	251
5.2.4.2 Sound change at word level	254
5.2.5 Morphological change	255
5.2.6 Syntactic change	257
5.2.7 Changes in text and discourse	259
5.3 Why languages change	262
5.4 Chapter outcomes	264
5.5 References and further reading	264
5.6 Some answers to the exercises	265
6 Language variation	271
6.1 Synchronic variation, sociolinguistics, and speech communities	271
6.2 Dialect and vernacular	274
6.3 Diglossia	276
6.4 Pidgins and Creoles	278
6.5 Sociolect	279
6.5.1 Language variation based on socio-cultural and economic background	280
6.5.2 Language variation based on gender	285
6.5.3 Language variation based on age	288
6.5.4 Language variation based on occupation/activity	290
6.6 Register	292
6.7 Speech accommodation	297
6.8 Lexical variation	297
6.9 Sound variation	301
6.10 Morphosyntactic variation	304
6.11 Chapter outcomes	306
6.12 References and further readings	307
6.13 Some answers to the exercises	309
7 Language, biology and learning	313
7.1 The brain and language	313
7.2 First language acquisition	320

7.2.1 Child language development	320
7.2.2 Critical period hypothesis	324
7.2.3 Theoretical perspective on child language development	325
7.2.4 Bilingual language development	330
7.3 Second language development	331
7.4 Animals and language	333
7.4.1 Bees and dialects	334
7.4.2 Starlings and recursion	334
7.4.3 Apes and human language	336
7.5 Chapter outcomes	339
7.6 References and further reading	340
8 Fields of linguistics	344
8.1 Clinical linguistics, <i>David Crystal</i>	344
8.2 Cognitive linguistics, <i>Dirk Geeraerts</i>	346
8.3 Computational linguistics, <i>Mick O'Donnell</i>	348
8.4 Contrastive linguistics, <i>Jorge Arús Hita</i>	349
8.5 Corpus linguistics, <i>Michaela Mahlburg</i>	351
8.6 Critical discourse analysis, <i>Thomas Bloor</i>	355
8.7 Educational linguistics, <i>Frances Christie</i>	358
8.8 Forensic linguistics, <i>Malcom Coulthard</i>	359
8.9 Formal linguistics, <i>Amaya Mendikoetxea</i>	362
8.10 Functional linguistics, <i>Chris Butler</i>	365
8.11 Historical linguistics, <i>Michael Cummings</i>	368
8.12 Psycholinguistics, <i>Amanda Miller</i>	370
8.13 Sociolinguistics, <i>Jeffrey Reaser</i>	372
Glossary	375
Index of Names	395
Subject Index	399
