List of Figures	xi
List of Tables	xiii
Preface	xv
Acknowledgments	xvii
1. Introduction	3
1.1 Modeling Speech Perception	4
1.2 Modeling Morphological Processing	6
1.3 Lexical Effects	9
1.3.1 Phonological Transparency	9
1.3.2 Temporality	9
1.3.3 Relative Frequency	10
1.4 Prelexical Effects	12
1.4.1 Metrical Structure	12
1.4.2 Possible Word Constraint	14
1.4.3 Probabilistic Phonotactics	15
1.5 Consequences	16
1.5.1 Words	16
1.5.2 Affixes	16
1.6 Some Disclaimers	18
1.7 Organization of the Book	19
2. Phonotactics and Morphology in Speech Perception	21
2.1 Phonotactics in Speech Perception	21
2.2 Neural Networks and Segmentation	22

2.3	Experiment 1: A Simple Recurrent Network	23
2.3.1	Network Architecture	24
2.3.2	Training Data	24
2.3.3	Results and Discussion	26
2.4	Phonotactics and Morphological Decomposition	28
2.5	Experiment 2: Phonotactic Decomposition in Morphology	30
2.5.1	Materials	31
2.5.2	Methodology	32
2.5.3	Results and Discussion	35
2.6	Summary	36
3.	Phonotactics and the Lexicon	39
3.1	Experiment 3: Phonotactics and Morphological Complexity	40
3.1.1	Materials and Methodology	40
3.1.2	Results and Discussion	43
3.2	Calculating Juncturehood	44
3.3	Prefixes	46
3.3.1	Prefixedness	46
3.3.2	Semantics	49
	Semantic Transparency Ratings: Wurm (1997)	49
	Polysemy	51
	Degree of Semantic Drift	57
3.3.3	Lexical Frequency	61
3.4	Suffixes	63
3.4.1	Semantics	65
	Degree of Semantic Drift	65
	Polysemy	66
3.4.2	Lexical Frequency	67
3.4.3	Summary: Suffixes and Junctural Phonotactics	67
3.5	Summary	69
4.	Relative Frequency and Morphological Decomposition	71
4.1	Relative Frequency in Morphology	72
4.2	Surface Frequency and Decomposition	75
4.3	Base Frequency and Decomposition	76
4.4	Models of Morphological Processing	77
4.4.1	Bybee's "Morphology as Connections" Model	77
4.4.2	Caramazza's "Augmented Addressed Morphology"	79
4.4.3	Marslen-Wilson's "Direct Access Model"	80
4.4.4	Baayen (1992)	80
4.4.5	Frauenfelder and Schreuder (1992)	81
4.4.6	Schreuder and Baayen's Morphological Meta-Model	82
4.4.7	Summary	84

4.5	Experiment 4: Relative Frequency and Morphological Complexity	85
4.5.1	Materials and Methodology	85
4.5.2	Results and Discussion	87
4.6	Experiment 5: Relative Frequency and Pitch Accent Placement	88
4.6.1	Materials and Methodology	89
4.6.2	Results	91
4.6.3	Discussion	94
4.7	Summary	95
5.	Relative Frequency and the Lexicon	97
5.1	Relative Frequency Distributions in Affixed Words	98
5.2	Relative Frequency in Prefixed Forms	104
5.2.1	Relative Frequency and Polysemy in Prefixed Forms	104
5.2.2	Relative Frequency and Semantic Drift of Prefixed Forms	110
5.3	Relative Frequency in Suffixed Forms	113
5.3.1	Relative Frequency and Semantic Drift in Suffixed Forms	113
5.3.2	Relative Frequency and Polysemy in Suffixed Forms	114
5.4	Summary	117
5.5	Consequences	118
6.	Relative Frequency and Phonetic Implementation	123
6.1	Experiment 6: Relative Frequency and /t/-deletion	123
6.1.1	Materials	125
6.1.2	Measurement and Analysis	126
6.1.3	Results and Discussion	132
6.2	Discussion	133
7.	Morphological Productivity	139
7.1	Measuring Productivity	140
7.2	Modeling Productivity	142
7.2.1	Productivity and Morphological Decomposition	145
8.	Affix Ordering	153
8.1	A Parsing Account	154
8.2	Hypotheses	155
8.2.1	The Same Suffix Will Be Differently Separable in Individual Words Depending on the Phonotactics	155
8.2.2	The Same Suffix Will Be Differently Separable in Individual Words Depending on the Frequency	156

8.2.3	Suffixes Beginning with Consonants Will Tend to Be More Separable than Suffixes Beginning with Vowels	156
8.2.4	Suffixes Represented by a Relatively High Proportion of Words which Are Less Frequent than Their Bases Will Tend to Be More Separable than Suffixes Represented by a Relatively Low Proportion of Words which Are Less Frequent than Their Bases	157
8.2.5	More Separable Affixes Will Occur outside Less Separable Affixes	158
8.3	Frequency and Phonotactic Profiles of Level 1 and 2 Affixes	158
8.4	Fabb's (1988) Affix Classes	162
8.4.1	Suffixes which Never Attach to an Already Suffixed Word	162
8.4.2	Suffixes which Attach outside One Other Suffix	166
8.4.3	Freely Attaching Suffixes	168
8.4.4	Problematic Suffixes	169
8.5	A Case Study: Denominal <i>-al</i>	170
8.6	Experiment 7a: <i>-al</i> Affixation and Relative Frequency	175
8.6.1	Methodology and Materials	175
8.6.2	Results	177
8.7	Experiment 7b: <i>-al</i> Affixation and Phonotactics	178
8.7.1	Methodology and Materials	178
8.7.2	Results	178
8.8	Discussion	179
8.9	Exceptions to Level-ordering	181
8.10	Bracketing Paradoxes	182
8.11	Conclusion	184
9.	Conclusion	185
9.1	Summary of Results	185
9.1.1	Probabilistic Phonotactics	185
9.1.2	Lexical Frequency	186
9.1.3	Phonetic Consequences	187
9.1.4	Morphological Productivity	187
9.1.5	Level-ordering and Stacking Restrictions	188
9.2	Discussion	189
Appendix A.	Segmentation and Statistics	191
A.1	Interactionist vs. Bottom-up Models of Segmentation	191
A.2	Reanalysis of Hay et al. (in press)	192
A.3	Experiment 2 (2.5)	200
A.4	Wurm: Prefixedness (3.3.1)	207
A.5	Wurm: Semantic Transparency (3.3.2)	207
A.6	Polysemy (3.3.2)	207

<i>Contents</i>	<i>ix</i>
A.7 Relative Frequency (3.3.3)	208
A.8 Segmentation and Language Design	208
