

Detailed table of contents

Preface	xi	3.3 Process and organization	92
Guided tour	xiii	3.4 Literature review as scientific contribution	108
Technology to enhance learning and teaching	xv	Running Case Study 3	108
Make the grade!	xvii	Summary	109
Acknowledgements	xviii	Discussion questions	109
PART 1 Essentials of research	1	Recommended further reading	110
1 The nature of business and management research	3	4 Ethics in business research	113
1.1 Why study research?	4	4.1 What are research ethics?	114
1.2 What is research?	6	4.2 Ethical treatment of participants	114
1.3 Is research always problem-solving based?	11	4.3 Data collection in cyberspace	120
1.4 What makes good research?	12	4.4 Ethics and the sponsor	122
1.5 Research philosophies	16	4.5 Researchers and team members	123
1.6 Understanding theory: components and connections	24	4.6 Ethical obligations to the research community	124
1.7 Propositions and hypotheses	32	4.7 Ethical approval procedures	127
1.8 Theory	35	Running Case Study 4	134
Running Case Study 1	37	Summary	134
Summary	39	Discussion questions	135
Discussion questions	40	Recommended further reading	138
Recommended further reading	43	PART 2 Research approaches	141
2 The research process and proposal	45	5 Quantitative and qualitative research	143
2.1 The research process	46	5.1 Qualitative and quantitative studies	144
2.2 Management research and measurement questions	47	5.2 Research design classifications	147
2.3 Research process	55	5.3 Explorative, descriptive and causal studies	150
2.4 The research proposal	61	Running Case Study 5	160
Running Case Study 2	79	Summary	160
Summary	79	Discussion questions	161
Discussion questions	80	Recommended further reading	162
Recommended further reading	82	6 Sampling strategies	165
3 Literature review	85	6.1 Unit of analysis	166
3.1 Aims and objectives of a review	86	6.2 The nature of sampling	167
3.2 Assessment of a 'good' literature review	89	6.3 Sample versus census	171
		6.4 Types of sample design	172
		6.5 Steps in sampling design	175

6.6	Complex probability sampling	187	10	Observation	273
6.7	Non-probability sampling	192	10.1	The uses of observation	274
6.8	Sampling on the Internet	196	10.2	Conducting an observational study	276
	Running Case Study 6	198	10.3	Participant observation	280
	Summary	198	10.4	Structured observation	282
	Discussion questions	200		Running Case Study 10	289
	Recommended further reading	202		Summary	289
7	Survey research	205		Discussion questions	290
7.1	Characteristics of the communication approach	206		Recommended further reading	291
7.2	Choosing a communication method	209	11	Content analysis and other qualitative approaches	293
7.3	Personal interviewing	214	11.1	Content analysis	294
7.4	Telephone interviewing	218	11.2	Narrative analysis	297
7.5	Self-administered surveys	221	11.3	Ethnographic studies	298
7.6	Web-based surveys	225	11.4	Action research	299
7.7	Outsourcing survey services	228	11.5	Grounded theory	300
	Running Case Study 7	229		Running Case Study 11	303
	Summary	229		Summary	303
	Discussion questions	230		Discussion questions	303
	Recommended further reading	231		Recommended further reading	304
8	Secondary data and archival sources	235	12	Experimentation	307
8.1	Secondary data	236	12.1	What is experimentation?	308
8.2	Sources of secondary data	239	12.2	An evaluation of experiments	309
8.3	How to use secondary data efficiently	243	12.3	Conducting an experiment	309
8.4	Secondary data in qualitative research	245	12.4	Validity in experimentation	313
8.5	Data-mining	246	12.5	Experimental research designs	316
	Running Case Study 8	251		Running Case Study 12	330
	Summary	251		Summary	330
	Discussion questions	251		Discussion questions	331
	Recommended further reading	252		Recommended further reading	333
9	Case studies, qualitative interviews and focus groups	255	PART 3 Research instruments		335
9.1	Case studies	256	13	Measurement and scales	337
9.2	Qualitative interviews	265	13.1	The nature of measurement	338
9.3	Focus groups	269	13.2	Data types	339
	Running Case Study 9	270	13.3	Sources of measurement differences	343
	Summary	271	13.4	Characteristics of sound measurement	344
	Discussion questions	271	13.5	The nature of measurement scales	356
	Recommended further reading	272			

13.6	Response methods	360	Glossary	487
13.7	Measurement scale construction	369	Index	11
	Running Case Study 13	378		
	Summary	378	PART 4 Statistical background	
	Discussion questions	380	(Available electronically only)	507
	Recommended further reading	383	16 Data preparation and description	509
14	Fieldwork: questionnaires and responses	387	16.1 Introduction	510
14.1	Developing the instrument design strategy	388	16.2 Editing	510
14.2	The management research question hierarchy revisited: phase 1	388	16.3 Useful rules for editing	511
14.3	Constructing and refining the measurement questions: phase 2	391	16.4 Data entry	520
14.4	Question content	393	16.5 Descriptive statistical summaries	523
14.5	Response strategy	402	Summary	528
14.6	Sources of existing questions	407	Discussion questions	529
14.7	Drafting and refining the instrument: phase 3	409	Recommended further reading	530
	Running Case Study 14	417	17 Exploring, displaying and examining data	533
	Summary	417	17.1 Introduction	534
	Discussion questions	418	17.2 Exploratory data analysis	534
	Recommended further reading	421	Summary	545
15	Writing up and presenting research outcomes	423	Discussion questions	546
15.1	The written research report	424	Recommended further reading	548
15.2	Research report components	426	18 Hypothesis testing	551
15.3	Writing the report	435	18.1 Introduction	552
15.4	Presentation considerations	439	18.2 Hypothesis testing	552
15.5	Oral presentations	447	18.3 Statistical testing procedures	559
	Running Case Study 15	452	18.4 Tests of significance	560
	Summary	452	Summary	581
	Discussion questions	453	Discussion questions	582
	Recommended further reading	454	Recommended further reading	587
Cases		457	19 Measures of association	589
1	A GEM of a study	459	19.1 Introduction	590
2	Can this study be saved?	463	19.2 Bivariate correlation analysis	591
3	Inquiring minds want to know – NOW!	465	19.3 Non-parametric measures of association	604
4	Highland Bank: teeing-up a new strategic direction	470	Summary	611
5	Ramada demonstrates its personal best	480	Discussion questions	612
6	Women getting equal in public services	483	Recommended further reading	615
			20 Multivariate analysis: an overview	617
			20.1 Introduction	618
			20.2 Selecting a multivariate technique	618

20.3	Dependency techniques	620	Appendices	651
20.4	Interdependency techniques	635	A	Core business reference sources, printed and electronic 652
	Summary	646	B	Decision theory problem 660
	Discussion questions	647	C	Sample student term project 666
	Recommended further reading	649	D	Non-parametric significance tests 672
			E	Selected statistical tables 679
