

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
<i>Volumes in Series</i>	<i>xvii</i>
1. Techniques for Cultivating Methanogens	1
Ralph S. Wolfe	
1. Introduction	1
2. Methanogens on a Budget	2
3. Use of an Anoxic Chamber	18
Acknowledgment	21
References	21
2. Genetic Methods for <i>Methanosarcina</i> Species	23
Nicole Buan, Gargi Kulkarni, and William Metcalf	
1. Introduction	24
2. Liposome-Mediated Transformation	28
3. Deleting Genes	29
4. Test for Gene Essentiality	34
5. Adding Genes	38
Acknowledgments	41
References	41
3. Genetic Systems for Hydrogenotrophic Methanogens	43
Felipe Sarmiento B., John A. Leigh, and William B. Whitman	
1. Introduction	44
2. Genome Sequences	46
3. Growth and Storage of Methanogen Cultures	46
4. Genetic Tools	54
5. Transformation Methods	60
6. Other Genetic Techniques	66
Acknowledgments	71
References	71

4. Molecular Tools for Investigating ANME Community Structure and Function	75
Steven J. Hallam, Antoine P. Pagé, Lea Constan, Young C. Song, Angela D. Norbeck, Heather Brewer, and Ljiljana Pasa-Tolic	
1. Introduction	76
2. Exploring ANME Population Structure	78
3. Detecting ANME Proteins in Marine Sediments	83
Acknowledgments	88
References	88
5. Studying Gene Regulation in Methanogenic Archaea	91
Michael Rother, Christian Sattler, and Tilmann Stock	
1. Introduction	92
2. Quantitative Reverse Transcription PCR for <i>M. maripaludis</i>	94
3. Analyzing Gene Expression Using <i>uidA</i> Reporter Gene Fusions in <i>M. acetivorans</i>	97
4. Creating Random Disruption Mutants of <i>M. maripaludis</i> by <i>In Vitro</i> Transposon Mutagenesis	101
Acknowledgments	105
References	105
6. Growth of Methanogens Under Defined Hydrogen Conditions	111
John A. Leigh	
1. Introduction	112
2. Hydrogen Limitation in Batch Culture	113
3. Hydrogen Limitation in Continuous Culture	116
Acknowledgments	118
References	118
7. Preparation of [Fe]-Hydrogenase from Methanogenic Archaea	119
Seigo Shima, Michael Schick, and Haruka Tamura	
1. Introduction	120
2. Oxygen, Light, and Copper Sensitivity of [Fe]-Hydrogenase and FeGP Cofactor	124
3. Preparation of [Fe]-Hydrogenase	125
4. Preparation of FeGP Cofactor	128
5. Preparation of Reconstituted [Fe]-Hydrogenase	131
6. Assay of the Enzyme Activity	134
Acknowledgments	135
References	136

8. Assay of Methylophilic Methyltransferases from Methanogenic Archaea	139
Donald J. Ferguson, David G. Longstaff, and Joseph A. Krzycki	
1. Introduction	140
2. Preparation of Anoxic Cell Extracts of <i>M. barkeri</i>	141
3. Isolation and Resolution of MtmBC Complexes	143
4. Ellman's Assay of Methylophilic Substrate:CoM Methyl Transfer	145
5. Assay of Methylthiol:CoM Methyltransferases	150
6. Assay of Methylophilic Substrate:Corrinoid Methyltransferase Activity	152
7. Spectral Assay of Methylcobalamin:CoM Methyltransferases	155
Acknowledgments	156
References	157
9. Methyl-Coenzyme M Reductase from Methanothermobacter marburgensis	159
Evert C. Duin, Divya Prakash, and Charlene Brungess	
1. Introduction	160
2. Equipment	162
3. Cell Growth: Basic Procedure	164
4. Whole-Cell Experiments	167
5. Cell Growth: Induction of Different Forms of MCR	171
6. Enzyme Purification	172
7. Different MCR Forms	178
8. Materials	180
Acknowledgment	185
References	185
10. Methods for Analysis of Acetyl-CoA Synthase: Applications to Bacterial and Archaeal Systems	189
David A. Grahame	
1. Introduction	190
2. Assays of A Cluster Protein (ACS) Catalytic Activities	195
3. Acetyltransferase Reactions	196
4. Acetyl-CoA Synthesis Reactions	205
5. The Acetyl-CoA Carbonyl:CO Exchange Reaction	211
6. Concluding Remarks	213
Acknowledgments	214
References	215

11. Acetate Kinase and Phosphotransacetylase	219
James G. Ferry	
1. Introduction	220
2. Acetate Kinase of <i>Methanosarcina thermophila</i>	221
3. Phosphotransacetylase of <i>M. thermophila</i>	226
Acknowledgments	229
References	229
12. Sodium Ion Translocation and ATP Synthesis in Methanogens	233
Katharina Schlegel and Volker Müller	
1. Introduction	234
2. Analysis of the Na ⁺ Dependence of Growth and Methanogenesis	237
3. Na ⁺ Transport in Cell Suspensions	239
4. Determining Bioenergetic Parameters via Different Localization of Radioactively Labeled Substances: Intracellular Volume, ΔpH, and ΔΨ	242
5. ATP Synthesis	248
6. ATP Hydrolysis	252
Acknowledgments	253
References	253
13. Proton Translocation in Methanogens	257
Cornelia Welte and Uwe Deppenmeier	
1. Introduction	258
2. Analysis of Membrane-Bound Electron Transport in <i>Methanosarcina mazei</i>	260
3. Measurement of Proton Translocation	271
4. Analysis of ATP Formation in Vesicle Preparation	276
Acknowledgments	277
References	277
14. Measuring Isotope Fractionation by Autotrophic Microorganisms and Enzymes	281
Kathleen M. Scott, Gordon Fox, and Peter R. Girguis	
1. Introduction	282
2. Enzyme-Level Studies	283
3. Culture/Cell-Level Studies	290
4. Calculations	292
Acknowledgments	294
References	295

15. 2-Oxoacid Metabolism in Methanogenic CoM and CoB Biosynthesis	301
David E. Graham	
1. Introduction	302
2. Chemistry of 2-Oxoacids	302
3. Biosynthesis of Coenzyme M	304
4. Synthesis of 2-Sulfofopryuvate	307
5. Discussion of CoM Biosynthesis	308
6. Coenzyme B Biosynthesis	309
7. Homocitrate Synthase	310
8. Homocitrate Synthase Enzymology	311
9. Substrate Specificity Determinants in HCS	312
10. Chemical Synthesis of 2-Oxoacids	313
11. Chemical Synthesis of Homocitrate and Its Analogs	314
12. Homoaconitase	315
13. Homoaconitase Enzymology	315
14. Chemical Synthesis of Homoaconitase and Its Analogs	316
15. Homoisocitrate Dehydrogenase	317
16. Enzymology of Homoisocitrate Dehydrogenase	317
17. Synthesis of Homoisocitrate	318
18. Chromatographic Analysis of 2-Oxoacids	318
19. Conclusions	321
Acknowledgments	321
References	322
16. Biomethanation and Its Potential	327
Irini Angelidaki, Dimitar Karakashev, Damien J. Batstone, Caroline M. Plugge, and Alfons J. M. Stams	
1. Introduction	328
2. The AD Process: Microbiology and Metabolic Pathways	329
3. Biochemical Methane Potential	338
4. Biogas Applications	342
5. Biomethanation—Global Aspects	346
Acknowledgments	347
References	347
