Preface	v
Acknowledgments	vi
Dedication	vi
1 Description.....	1
1.1 Terminology.....	1
1.1.1 Psychiatric Disorders and Psychosocial Problems Associated With MS.....	5
1.1.2 Psychiatric Diagnoses Associated With MS	6
1.1.3 Psychosocial Problems Associated With MS	7
1.2 Definition.....	9
1.3 Epidemiology.....	12
1.3.1 Incidence and Prevalence	12
1.3.2 Underdiagnosis of MS.....	12
1.3.3 Psychiatric Diagnoses in MS.....	14
1.4 Course and Prognosis	15
1.4.1 Course	15
1.4.2 Prognosis	17
1.4.3 Treatment Effects on Course and Prognosis	18
1.4.4 Course and Prognosis of MS Signs and Symptoms	18
1.5 Differential Diagnosis	20
1.5.1 Symptoms of MS Versus Other Etiologies	20
1.5.2 Psychiatric Diagnoses	21
1.5.3 Neuropsychological Diagnosis	21
1.5.4 Types of Cognitive Dysfunction in MS.....	24
1.5.5 Neuropsychological Evaluation.....	27
1.6 Comorbidities.....	27
1.6.1 Medical and Biobehavioral Comorbidities in MS.....	27
1.6.2 Comorbidity Among Psychiatric Disorders.....	31
1.6.3 Comorbidity Among Cognitive Disorders.....	32
1.7 Diagnostic Procedures and Documentation.....	33
1.7.1 Diagnostic Process.....	33
1.7.2 Medical Diagnostic Procedures.....	33
1.7.3 Common Client Responses to Diagnosis	34
1.7.4 Psychiatric Diagnostic Procedures and Documentation.....	35
2 Theories and Models	37
2.1 Models of Illness and Disability	37
2.1.1 Moral Model	37
2.1.2 Medical Model.....	38
2.1.3 Minority Model	38
2.1.4 Biopsychosocial Model	38
2.2 Minority Stress Model.....	38
2.3 Depression	39
2.3.1 Depression and Psychosocial Factors	39

2.3.2	Depression and Neurologic Integrity.	39
2.4	Anxiety Disorders	40
2.5	Cognitive Impairment	40
2.5.1	Primary Contributors to Cognitive Impairment	40
2.5.2	Secondary Contributors to Cognitive Impairment	40
3	Diagnosis and Treatment Indications.	41
3.1	Common Points of Entry Into Psychotherapy.	41
3.2	Psychological Evaluation.	42
3.2.1	Mood	42
3.2.2	Suicide Risk.	42
3.3	Emotional Components of Living With MS	42
3.4	Cognitive and Psychiatric Disorders Impeding Psychotherapy and Medical Treatment	43
3.4.1	Cognitive Difficulties	43
3.4.2	Cognitive Dysfunction and Neurobehavioral Problems	44
3.4.3	Depression and Pain	44
3.4.4	Sleep Disturbance and Psychiatric Comorbidity.	45
3.5	Medication Issues	45
3.6	Psychological Difficulties of Learned Helplessness and Secondary Gain	46
3.6.1	Learned Helplessness.	46
3.6.2	Secondary Gain	46
3.7	Prioritizing Problems and Needs	46
3.8	Focus of Psychotherapy.	47
3.8.1	Health and Wellness.	47
3.8.2	Clinical Focus	49
3.9	Psychosocial Adaptation	51
3.10	Coping	54
3.11	Social Support	59
3.12	Referral Issues	60
4	Treatment.	61
4.1	Methods of Treatment	61
4.1.1	Integrative Healthcare	61
4.1.2	Medical Treatment for MS	61
4.1.3	Complementary and Alternative Medicine	71
4.1.4	Neuropsychiatric Treatment (Psychopharmacology)	73
4.1.5	Interdisciplinary Rehabilitation in MS	76
4.1.6	Cognitive Rehabilitation	76
4.1.7	Psychological Interventions.	77
4.1.8	Stress Management	82
4.1.9	Pain Management	83
4.1.10	Fatigue Management	85
4.1.11	Mind–Body Interventions	85
4.1.12	Group-Based Interventions	89
4.2	Working With Physicians and Other Healthcare Providers.	90
4.3	Efficacy and Prognosis	91
4.3.1	Neuropsychological Prognosis	91

4.4	Variations and Combinations of Methods	92
4.5	Problems in Carrying Out the Treatments.	92
4.5.1	Managing Ambivalence, Conflicts, and Ambiguity	92
4.5.2	Medical Interventions	94
4.5.3	Noncompliance/Resistance	94
4.6	Multicultural Issues	95
5	Case Vignettes	97
5.1	Case Vignette: Michelle.	97
5.2	Case Vignette: Claudette	98
5.3	Case Vignette: Jon	99
5.4	Case Vignette (Neuropsychological Evaluation): Cassie	99
6	Further Reading	101
7	References	103
8	Appendix: Tools and Resource	113
