

Table of Contents

Preface	v
Some pioneers of extrapolation methods	1
<i>Claude Brezinski</i>	
Very basic multidimensional extrapolation quadrature	23
<i>James N. Lyness</i>	
Numerical methods for ordinary differential equations: early days	35
<i>John C. Butcher</i>	
Interview with Herbert Bishop Keller	45
<i>Hinke M. Osinga</i>	
A personal perspective on the history of the numerical analysis of Fredholm integral equations of the second kind	53
<i>Kendall Atkinson</i>	
Memoires on building a general purpose numerical algorithms library	73
<i>Brian Ford</i>	
Recent trends in high performance computing	93
<i>Jack J. Dongarra, Hans W. Meuer, Horst D. Simon, and Erich Strohmaier</i>	
Nonnegativity constraints in numerical analysis	109
<i>Donghui Chen and Robert J. Plemmons</i>	
On nonlinear optimization since 1959	141
<i>M. J. D. Powell</i>	
The history and development of numerical analysis in Scotland: a personal perspective	161
<i>G. Alistair Watson</i>	
Remembering Philip Rabinowitz	179
<i>Philip J. Davis and Aviezri S. Fraenkel</i>	
My early experiences with scientific computation	187
<i>Philip J. Davis</i>	
Applications of Chebyshev polynomials: from theoretical kinematics to practical computations	193
<i>Robert Piessens</i>	
Name Index	207
Subject Index	215
