

Contents

1. Cognition and the Study of Behavior	3
1.1. What is comparative cognition about?	4
1.2. Kinds of explanation for behavior	10
1.3. Approaches to comparative cognition	15
1.4. Summary	23
2. Evolution, Behavior, and Cognition: A Primer	26
2.1. Testing adaptation	26
2.2. Mapping phylogeny	31
2.3. Evolution, cognition, and the structure of behavior	34
2.4. Evolution and the brain	42
2.5. What does all this have to do with comparative psychology?	49
2.6. Summarizing and looking ahead	53
Part I. Fundamental Mechanisms	55
3. Perception and Attention	57
3.1. Specialized sensory systems	57
3.2. How can we find out what animals perceive?	62
3.3. Some psychophysical principles	65
3.4. Signal detection theory	66
3.5. Perception and evolution: Sensory ecology	73
3.6. Search and attention	77
3.7. Attention and foraging: The behavioral ecology of attention	84
3.8. Summary	94
4. Learning: Introduction and Pavlovian Conditioning	96
4.1. General processes and “constraints on learning”	96
4.2. A framework for thinking about learning	98
4.3. When and how will learning evolve?	102
4.4. Pavlovian conditioning: Conditions for learning	105
4.5. What is learned?	119
4.6. Conditional control of behavior: Occasion setting and modulation	126
4.7. Effects of learning on behavior	127
4.8. Concluding remarks	134

5. Recognition Learning	136
5.1. Habituation	136
5.2. Perceptual learning	146
5.3. Imprinting	150
5.4. The behavioral ecology of social recognition: Recognizing kin	161
5.5. Forms of recognition learning compared	165
6. Discrimination, Classification, and Concepts	167
6.1. Three examples	167
6.2. Untrained responses to natural stimuli	168
6.3. Classifying complex natural stimuli	172
6.4. Discrimination learning	179
6.5. Category discrimination and concepts	190
6.6. Summary and conclusions	208
7. Memory	210
7.1. Functions and properties of memory	211
7.2. Methods for studying memory in animals	215
7.3. Conditions for memory	222
7.4. Species differences in memory?	230
7.5. Mechanisms: What is remembered and why is it forgotten?	237
7.6. Memory and consciousness	241
7.7. Summary and conclusions	256
Part II. Physical Cognition	259
8. Getting Around: Spatial Cognition	261
8.1. Mechanisms for spatial orientation	264
8.2. Modularity and integration	283
8.3. Acquiring spatial knowledge: The conditions for learning	288
8.4. Do animals have cognitive maps?	296
8.5. Summary	310
9. Timing	313
9.1. Circadian rhythms	313
9.2. Interval timing: Data	323
9.3. Interval timing: Theories	331
9.4. Summary: Two timing systems?	338
10. Numerical Competence	340
10.1. Numerosity discrimination and the analog magnitude system	344
10.2. The object tracking system	350
10.3. Ordinal comparison: Numerosity, serial position, and transitive inference	355
10.4. Labels and language	365
10.5. Numerical cognition and comparative psychology	370
11. Cognition and the Consequences of Behavior: Foraging, Planning, Instrumental Learning, and Using Tools	371
11.1. Foraging	372
11.2. Long-term or short-term maximizing: Do animals plan ahead?	389
11.3. Causal learning and instrumental behavior	394

11.4. Using and understanding tools	399
11.5. On causal learning and killjoy explanations	413
Part III. Social Cognition	415
12. Social Intelligence	417
12.1. The social intelligence hypothesis	418
12.2. The nature of social knowledge	421
12.3. Intentionality and social understanding	432
12.4. Theory of mind	441
12.5. Cooperation	455
12.6. Summary	464
13. Social Learning	466
13.1. Social learning in context	468
13.2. Mechanisms: Social learning without imitation	475
13.3. Mechanisms: Imitation	482
13.4. Do nonhuman animals teach?	497
13.5. Animal cultures?	503
13.6. Summary and conclusions	506
14. Communication and Language	508
14.1. Some basic issues	511
14.2. Natural communication systems	516
14.3. Trying to teach human language to other species	532
14.4. Language evolution and animal communication: New directions	543
14.5. Summary and conclusions	546
15. Summing Up and Looking Ahead	548
15.1. Modularity and the animal mind	549
15.2. Theory and method in comparative cognition	551
15.3. Humans versus other species: Different in degree or kind?	554
15.4. The future: Tinbergen's four questions, and a fifth one	559
