Contents

Part I  Introduction

1 Noise and Marine Life: Progress From Nyborg to Cork in Science and Technology to Inform Decision Making ................................................. 3 Brandon L. Southall

2 Listening Backward: Early Days of Marine Bioacoustics.................................................. 11 William N. Tavolga

Part II  Sound Detection by Aquatic Animals

3 Effects of Underwater Noise on Marine Mammals .......................................................... 17 Christine Erbe

4 Psychophysical Studies of Auditory Masking in Marine Mammals: Key Concepts and New Directions ..................................................... 23 Colleen Reichmuth

5 On the Relationship Between Environmental Noise, Critical Ratios, and Comodulation Masking Release in the Bottlenose Dolphin (Tursiops truncatus) .................................................. 29 Brian K. Branstetter, Jennifer S. Trickey, and James J. Finneran

6 Direct Measurements of Subjective Loudness in a Bottlenose Dolphin.......................... 33 Carolyn E. Schlundt and James J. Finneran

7 High Auditory Time Resolution in Bottlenose Dolphins Is Effective Protection Against Reverberation ....................................................... 37 Gennadi Zaslavski

8 Frequency Selectivity in the Bottlenose Dolphin Auditory System .................................. 41 Gennadi Zaslavski

9 Auditory Brain Stem Responses Associated with Echolocation in an Atlantic Bottlenose Dolphin (Tursiops truncatus) ........................................ 45 Songhai Li, Paul E. Nachtigall, and Marlee Breese

10 Hearing, Noise, and Echolocating Odontocetes ............................................................. 49 Paul E. Nachtigall, Alexander Y. Supin, and Marlee Breese
11 Evoked Potential Audiometry in Aquatic Mammals ................................................................. 53
   Alexander Y. Supin

12 Prediction of a Mysticete Audiogram via Finite Element Analysis
   of the Middle Ear .................................................................................................................. 57
   Andrew Tubelli, Aleks Zosuls, Darlene Ketten, and David C. Mountain

13 Reverse Engineering the Cetacean Ear to Extract Audiograms ........................................... 61
   Aleks Zosuls, Seth O. Newburg, Darlene R. Ketten, and David C. Mountain

14 Validation of a Vibroacoustic Finite Element Model Using Bottlenose Dolphin Experiments ............................................................... 65
   Petr Krysl, Vanessa Trijoulet, and Ted W. Cranford

15 Acoustic Function in the Peripheral Auditory System of Cuvier’s Beaked Whale (Ziphius cavirostris) .......................................................................................................................... 69
   Ted W. Cranford and Petr Krysl

16 Auditory Evoked Potential Measurement of Hearing Sensitivity in Pinnipeds ............ 73
   Jason Mulsow, Colleen Reichmuth, Dorian Houser, and James J. Finneran

17 Hearing in Birds: What Changes From Air to Water ............................................................. 77
   Robert J. Dooling and Sara C. Therrien

18 Amphibious Hearing in Sea Turtles ......................................................................................... 83
   Wendy E. Dow Piniak, David A. Mann, Scott A. Eckert, and Craig A. Harms

19 Hearing Capabilities of Loggerhead Sea Turtles (Caretta caretta) Throughout Ontogeny ......................................................................................................................... 89
   Ashley L. Lavender, Soraya M. Bartol, and Ian K. Bartol

20 Are Sharks Even Bothered by a Noisy Environment? ......................................................... 93
   Brandon M. Casper, Michele B. Halvorsen, and Arthur N. Popper

   Marco Lugli

22 A Critical Reevaluation of the Role of Acoustic Pressure in Source Localization by Fish ................................................................. 101
   Peter H. Rogers, James S. Martin, and John R. Bogle

23 Vibration of the Otoliths in a Teleost ................................................................................. 105
   Carl R. Schilt, Ted W. Cranford, Petr Krysl, Robert E. Shadwick, and Anthony D. Hawkins

24 Hearing Sensitivity of the Painted Goby, Pomatoschistus pictus ........................................ 109
   Marta Bolgan, Silvia S. Pedros, Raquel O. Vasconcelos, Joana M. Jordão, M. Clara P. Amorim, and Paulo J. Fonseca

25 Acoustic Communication in Pomatoschistus spp.: A Comparison Between Closely Related Species .................................................................................................................. 113
   Silvia S. Pedros, Marta Bolgan, Joana M. Jordão, Paulo J. Fonseca, and M. Clara P. Amorim

26 Importance of Hearing for Survival of Danio rerio (Zebrafish) in an Experimental Predator/Prey Environment ............................................................. 117
   Rikke Agner Jørgensen, Christian Brandt, Magnus Wahlberg, and Jakob Christensen-Dalsgaard
27  **Lateral Line Canal Morphology and Noise Reduction** ........................................ 121  
Adrian T. Klein and Horst Bleckmann

28  **Potential for Sound Sensitivity in Cephalopods** ............................................... 125  
T. Aran Mooney, Roger Hanlon, Peter T. Madsen, Jakob Christensen-Dalsgaard,  
Darlene R. Ketten, and Paul E. Nachtigall

29  **Listening in Noise** ............................................................................................... 129  
Richard R. Fay

30  **Discovery of Sound in the Sea: An Online Resource** ........................................ 135  
Kathleen J. Vigness-Raposa, Gail Scowcroft, James H. Miller, and Darlene Ketten

**Part III  Sound Production by Aquatic Animals**

31  **Whistles of Bottlenose Dolphins: Group Repertoires and Geographic Variations in Brazilian Waters** .................................................. 141  
Lisa S. Hoffmann, Elton Ferlin, Pedro F. Fruet, Rodrigo C. Genovês,  
Fernanda P. Valdez, Juliana Di Tullio, Glauco Caon, and Thales R. Freitas

32  **Detection and Classification of Vocalizations for the Study of Marine Mammal Distributions in the Chukchi Sea** ............................................ 145  
David Hannay

33  **Acoustic Ecology and Behavior of Minke Whales in the Hawaiian and Marianas Islands: Localization, Abundance Estimation, and Characterization of Minke Whale “Boings”** ........................................... 149  
Thomas Norris, Stephen Martin, Len Thomas, Tina Yack, Julie N. Oswald,  
Eva-Marie Nosal, and Vincent Janik

34  **What You See Is Not What You Hear: The Relationship Between Odontocete Echolocation Click Production and Hearing** ................................................. 155  
Laura N. Kloepper, Paul E. Nachtigall, and Marlee Breese

35  **Sound Production and Reception in Southern Sea Otters**  
(*Enhydra lutris nereis*) ........................................................................................ 157  
Asila Ghoul and Colleen Reichmuth

36  **Nocturnal Acoustic Activity in the Shallow Waters of the WWF-Miramare Natural Marine Reserve (Trieste, Italy)** ................................................. 161  
Antonio Codarin, Marta Picciulin, Linda Sebastianutto, Giuliana Calcagno,  
Maurizio Spoto, and Enrico A. Ferrero

37  **Acoustic Ecology of the California Mantis Shrimp**  
(*Hemisquilla californiensis*) .................................................................................. 165  
Erica R. Staaterman, Christopher W. Clark, Austin J. Gallagher,  
Thomas Clavere, Maya S. deVries, and Sheila N. Patek

38  **Influence of Turbidity on the Incidence of Sound Production in Atlantic Croaker** (*Micropogonias undulatus*) in Pamlico Sound, North Carolina ........................................... 169  
Cecilia S. Kracht, John P. Walsh, Mark W. Sprague, Devon O. Eulie,  
D. Reide Corbett, and Joseph J. Luczkovich

39  **Propagation of Lusitanian Toadfish Sounds in Estuarine Shallow Waters** .......... 173  
Andreia Ramos, M. Clara P. Amorim, and Paulo J. Fonseca
40 Sound Production in Some Physostomous Fish Species and Effects of Biological Sounds on Fish ................................................................. 177
Michail Y. Kuznetsov and Yury A. Kuznetsov

41 Is Biological Sound Production Important in the Deep Sea? ................................................................. 181
Rodney A. Rountree, Francis Juanes, Clifford A. Goudey, and Kenneth E. Ekstrom

42 Unusual and Unexpected Biological Noisemakers in the Irish Sea and St. George’s Channel ................................................................. 185
Rodney Coates, Gillian A. Coates, Rachel Porter, Andrew Davies, and Dylan Evans

Part IV Physiological Effects of Sounds

43 Noise-Induced Hearing Loss: From Animal Models to Human Trials ................................................................. 191
Colleen G. Le Prell

44 Auditory Effects of Underwater Noise in Odontocetes ................................................................. 197
James J. Finneran

45 Implementation of Acoustic Dosimeters With Recoverable Month-Long GPS/TDR Tags to Interpret Controlled-Exposure Experiments for Large Whales .............................................................................. 203
Bruce R. Mate

46 Marine Mammal Auditory System Noise Impacts: Evidence and Incidence ................................................................. 207
Darlene R. Ketten

47 Effect of Broadband Sounds on the Auditory Evoked Potential Thresholds in the Beluga Whale ................................................................. 213
Vladimir V. Popov and Alexander Y. Supin

48 The ESME Workbench: Simulating the Impact of Anthropogenic Sound on Marine Mammals .............................................................................. 217
David C. Mountain, David Anderson, Andrew Brughera, Matthew Cross, Dorian S. Houser, Nael Musleh, Michael Porter, and Martin Siderius

49 Using EarLab to Study Masking Due to Anthropogenic Sound ................................................................. 221
David C. Mountain, David Anderson, and Andrew Brughera

50 Portable Auditory Evoked Potential System to Assess Odontocete Hearing ................................................................. 225
Aude F. Pacini, Paul E. Nachtigall, and Laura N. Kloeppep

51 Barotrauma in Fish and Barotrauma Metrics ................................................................. 229
Thomas J. Carlson

52 Assessment of Barotrauma Injury and Cumulative Sound Exposure Level in Salmon After Exposure to Impulsive Sound .............................................................................. 235
Michele B. Halvorsen, Brandon M. Casper, Thomas J. Carlson, Christa M. Woodley, and Arthur N. Popper

53 Shipboard Assessment of Hearing Sensitivity of Tropical Fishes Immediately After Exposure to Seismic Air Gun Emissions at Scott Reef .............................................................................. 239
Mardi C. Hastings and Jennifer Miksis-Olds

54 A Lack of Correlation Between Air Gun Signal Pressure Waveforms and Fish Hearing Damage ................................................................. 245
Robert D. McCauley and Chandra Salgado Kent

69 Impacts of Anthropogenic Sounds on *Phocoena phocoena* (Harbor Porpoise) ................. 311
Ronald Kastelein and Nancy Jennings

70 Changes in Vocal Behavior of North Atlantic Right Whales in Increased Noise ......................................................... 317
Susan E. Parks, Mack P. Johnson, Douglas P. Nowacek, and Peter L. Tyack

71 Acoustic Compensation to Shipping and Air Gun Noise by Mediterranean Fin Whales (*Balaenoptera physalus*) ................................................................. 321
Manuel Castellote, Christopher W. Clark, and Marc O. Lammers

72 Long-Term Monitoring of Anthropogenic Noise and Its Relationship to Bottlenose Dolphin (*Tursiops truncatus*) Distribution in the Cres–Lošinj Archipelago, Northern Adriatic, Croatia ................................................................. 323
Nikolina Rako, Marta Picciulin, Peter Mackelworth, Draško Holcer, and Caterina Maria Fortuna

73 Does Vessel Noise Affect the Use of Sound by Foraging *Orcinus orca* (Killer Whales)? ................................................................. 327
Marla M. Holt, Dawn P. Noren, and Candice K. Emmons

74 Do Silent Ships See More Fish? Comparison of a Noise-Reduced and a Conventional Research Vessel in Alaska ................................................................. 331
Alex De Robertis, Christopher D. Wilson, and Neal J. Williamson

75 Behavioral Observations of Baleen Whales in Proximity of a Modern Fishing Vessel................................................................. 335
Matteo Bernasconi, Ruben Patel, and Leif Nøttestad

Sylvia E. van der Woude

77 Acoustic Monitoring of Beluga Whales (*Delphinapterus leucas*) in Cook Inlet, Alaska ................................................................. 341
Marc O. Lammers, Robert Small, Shannon Atkinson, Manuel Castellote, Justin Jenniges, Anne Rosinski, Sue Moore, Chris Garner, and Whitlow W.L. Au

78 Soundscape of a Nearshore Coral Reef Near an Urban Center ................................................................. 345
Whitlow W.L. Au, Michael Richlen, and Marc O. Lammers

79 Gap Durations in Ambient Noise Impact the Communication Range of Harp Seals: A Pilot Study ................................................................. 353
John M. Terhune

80 Importance of Underwater Sounds for Migration of Fish and Aquatic Mammals ................................................................. 357
Ilse van Opzeeland and Hans Slabbekoorn

81 Behavioral Responses of Diamondback Terrapins (*Malaclemys terrapin terrapin*) to Recreational Boat Sounds ................................................................. 361
Lori A. Lester, Edward A. Standora, Walter F. Bien, and Harold W. Avery

82 Assessing Disturbance From Under-Ice Noise on Fishes in Boreal Lakes ................................................................. 363
Peter A. Cott, David A. Mann, Dennis M. Higgs, Tom A. Johnston, and John M. Gunn
83 Impacts of River-Based Air Gun Seismic Activity on Northern Fishes
Peter A. Cott, Arthur N. Popper, David A. Mann, John K. Jorgenson, and Bruce W. Hanna

Effects of Underwater Noise on Larval settlement
Jenni A. Stanley, Craig A. Radford, and Andrew G. Jeffs

85 Does Vessel Noise Change the Calling Rate and Intensity of Soniferous Fishes?
Joseph J. Luczkovich, Cecilia S. Krahforst, and Mark W. Sprague

86 Behavioral Responses of Captive Herring to Sonar Signals (1-1.6 kHz) of a Naval Frigate Throughout a Yearly Cycle
Lise Doksæter, Petter H. Kvadsheim, Nils O. Handegard, Nina Nordlund, and Olav R. Godø

87 Acoustic Tagging: A Suitable Method for the Study of Natural Herring Behavior Around Spawning?
Lise Langård, Arne Johannessen, Anders Fernø, Leif Nøttestad, Georg Skaret, Aril Slotte, Jostein Røttingen, and Jan T. Øvredal

88 Effects of Pile Driving on the Behavior of Cod and Sole
Frank Thomsen, Christina Mueller-Blenkle, Andrew Gill, Julian Metcalfe, Peter K. McGregor, Victoria Bendall, Mathias H. Andersson, Peter Sigray, and Daniel Wood

89 A Novel Field Study Setup to Investigate the Behavior of Fish Related to Sound
Christina Mueller-Blenkle, Andrew B. Gill, Peter K. McGregor, Mathias H. Andersson, Peter Sigray, Victoria Bendall, Julian Metcalfe, and Frank Thomsen

90 Do Ocean-Based Wind Farms Alter the Migration Pattern in the Endangered European Silver Eel (Anguilla anguilla) Due to Noise Disturbance?
Mathias H. Andersson, Ingvar Lagenfelt, and Peter Sigray

91 Effects of Vessel Engine Noise on the Acoustic Signaling Behavior of Dascyllus albisella (Hawaiian Damselfish)
Pollyanna I. Fisher-Pool, Marc O. Lammers, and Lisa M. Munger

92 Distribution and Potential Impact of Boat Noise on Fish Sound Production From an Autonomous Acoustic Array in the Eastern Gulf of Mexico
Carrie C. Wall, Peter Simard, and David A. Mann

93 Cichlid Courtship Acoustics: Signals and Noise Influence Reproductive Behavior
Hans Slabbekoorn, Machted Verzijden, and Christina May

94 Using Catch Statistics to Investigate Effects of Seismic Activity on Fish Catch Rates
Aud Vold, Sven Løkkeborg, and Maria M. Tenningen

95 Effects of Sounds From Seismic Air Guns on Fish Behavior and Catch Rates
Svein Løkkeborg, Egil Ona, Aud Vold, and Are Salthaug
Part VI Population Effects

96 A Bioenergetics Approach to Developing a Population Consequences of Acoustic Disturbance Model .................. 423
   Daniel P. Costa

97 Energetic Cost of Behaviors Performed in Response to Vessel Disturbance: One Link in the Population Consequences of Acoustic Disturbance Model .......... 427
   Dawn P. Noren, Robin C. Dunkin, Terri M. Williams, and Marla M. Holt

Part VII Anthropogenic Sound Sources and Their Measurement

98 A Common Sense Approach to Source Metrics ........................................... 433
   William T. Ellison and Adam S. Frankel

99 Underwater Sounds From Unattenuated and Attenuated Marine Pile Driving ...... 439
   James Reyff

100 What is the Source Level of Pile-Driving Noise in Water? ............................. 445
   Michael A. Ainslie, Christ A.F. de Jong, Stephen P. Robinson, and Paul A. Lepper

101 Ground Roll Waves as a Potential Influence on Fish: Measurement and Analysis Techniques ........................................... 449
   Richard A. Hazelwood

102 Assessment of Cumulative Sound Exposure Levels for Marine Piling Events ...... 453
   Paul A. Lepper, Stephen P. Robinson, Michael A. Ainslie, Pete D. Theobald, and Christ A.F. de Jong

103 Modeling the Propagation of Transient Sounds in Very Shallow Water Using Finite Difference Time Domain (FDTD) Calculations .................................. 459
   Mark W. Sprague and Joseph J. Luczkovich

104 Proximate Measurements of Acoustic Emissions Associated with the Installation and Operation of an Exploration Jackup Drilling Rig in the North Sea ............ 463
   Victoria L.G. Todd and Paul R. White

105 Measurement of Underwater Noise Arising From Marine Aggregate Operations ........................................... 465
   Stephen P. Robinson, Pete D. Theobald, Paul A. Lepper, Gary Hayman, Victor F. Humphrey, Lian-Sheng Wang, and Samantha Mumford

106 Svein Vaage Broadband Air Gun Study ........................................... 469
   Anders Mattsson, Gregg Parkes, and David Hedgeland

107 Cetacean Hearing-Damage Zones Around a Seismic Source ......................... 473
   Robert Laws

108 Modeling Cumulative Sound Exposure Over Large Areas, Multiple Sources, and Long Durations ........................................... 477
   Christine Erbe

109 Sound-Recording Systems for Measuring Sound Levels During Seismic Surveys ........................................... 481
   Jan Tore Øvredal and Bjorn Totland
110 First Description of the Sound Pressure and Particle Velocity Components of the Ambient Noise and Boat Noise Recorded at the WWF-Miramare Natural Marine Reserve, Trieste, Italy ......................................................... 485
Angelo Farina, Adriano Farina, Enrico Armelloni, Linda Sebastianutto, Carlo Franzosini, and Marta Picciulin

111 Underwater Particle Acceleration Induced by a Wind Turbine in the Baltic Sea ........................................................................................................... 489
Peter Sigray and Mathias H. Andersson

112 Is the Ocean Really Getting Louder? ........................................................................................................................... 493
Michael Stocker and Tom Reuterdaahl

Part VIII Science, Regulation, and Sound Exposure Criteria

113 The Complexity of Noise Impact Assessments: From Birdsong to Fish Behavior ................................................................. 497
Hans Slabbekoorn

114 Extrapolating Beyond Chinchillas: Behavioral Response Ambiguity Through the Lens of Variable Human Responses to Moderate Wind Farm Noise .............. 501
Jim Cummings

115 Underwater Noise Effects From Wave Energy Devices on Marine Mammals: A Possible Approach ......................................................... 505
Sofia Patricio

116 Physical Biologists and Biological Physicists: Combining Biology and Physics in Research on the Effects of Noise on Aquatic Life ......................................................................................... 509
Douglas H. Cato

117 “So, Am I Correct in My Understanding That a Decibel Is the Same as a Hertz?”: The Quest for Informed, Objective Environmental Impact Analysis of Marine Anthropogenic Noise ................................................................................................................................ 515
John F. Polglaze

118 Environmental Assessment of Offshore Wind Power Generation: Effect on a Noise Budget ..................................................................................... 519
James H. Miller, Gopu R. Potty, Kathleen J. Vigness-Raposa, David Casagrande, Lisa A. Miller, Jeffrey A. Nystuen, Peter M. Scheifele, and John G. Clark

119 Development and Implementation of Criteria for Exposure of Western Gray Whales to Oil and Gas Industry Noise ..................................................... 523
Douglas P. Nowacek, Alexander Vedenev, Brandon L. Southall, and Roberto Racca

120 Strategic Assessment of the Risk Posed to Marine Mammals by the Use of Air Guns in the Antarctic: Concepts, Methods, Results, and Controversies .... 529
Olaf Boebel, Monika Breitzke, Elke Burkhardt, and Horst Bornemann

121 Establishing a Safety Zone for Marine Mammals Due to Underwater Blasting .... 533
Norm Broner and Mike Huber

122 The Marine Mammal Protection Act: A Regulatory Approach to Identifying and Minimizing Acoustic-Related Impacts on Marine Mammals ................................................................. 537
Jaclyn N. Daly and Jolie Harrison

Part X Workshops and Concluding Remarks

| 149  | Workshop One: Risk Analysis                                             | Thomas J. Carlson, Christ de Jong, and Rene P.A. Dekeling             |
| 150  | Workshop Two: Long-Term and Cumulative Effects of Acoustic Exposure Along With Other Stressors | Robert Gisiner and George Frisk                                      |
151  Workshop Three: Approaches to Behavioral Analysis of Responses to High-Energy Acoustic Sources ................................................................. 665
     Svein Løkkeborg and Frank Thomsen

152  Workshop Four: International Regulatory Issues ........................................ 669
     Amy R. Scholik-Schlomer and Camille Mageau

153  Summing Up .............................................................................................. 673
     Roger L. Gentry

Index .................................................................................................................. 681
