<b>CHAPTER I</b>	<b>Introduction to Cognitive Psychology</b>	<b>1</b>
<hr/>		
What Is Cognitive Psychology?		2
The Innate Mind and Acquired Mind: The Rationalist and Empiricist Traditions		3
The Middle Ages		5
The Continuing Debate: Descartes' Mind as Rational and Locke's Mind as Empirical		7
René Descartes (1596–1650) and the Innate Mind		7
John Locke (1632–1704) and the Blank Slate		9
Mind as Associations		11
Mind as Brain: Neurology, Phrenology, and Neuropsychology		12
Mind as a Network: From Neurons to Assemblies of Neurons		14
The Mind as Structure		17
Mind as Holistic: Gestalt Psychology		20
Mind as Functional: Evolution and the Adaptive Mind		22
The Adaptive Mind: Logical Positivism and Behaviorism		25
Mind as Rational: Psycholinguistics		26
Mind as an Information Processor: The World Wars and the Development of Intellectual Testing, Information Processing, and Neuropsychology		26
Mind as Computational: Computers, Problem Solving, and Artificial Intelligence		30
What Is Mental Representation?		32
Neuropsychology and Cognitive Neuroscience		33
Inferring Neural Organization Using Cognitive Tasks		33
Measuring Brain Activity While Performing Cognitive Tasks		34
The Breakdown of Cognitive Function		35
Caution Regarding Clinical Neuropsychological Cases		36
Conclusions		38
Test Yourself Study Questions		40
Key Terms and Concepts		41

## **CHAPTER 2 From Sensation to Perception 43**

---

<b>From Sensory Transduction to Perceptions</b>	<b>45</b>
What the Frog's Eye Tells the Frog's Brain	50
The Visual Pathways	56
The "What" and "Where" Pathways	57
Building Bridges: Seeing Thunder and Hearing Lightning	60
<b>Gestalt Psychology: Top-Down Constructive Perception</b>	<b>62</b>
<b>Pattern Perception</b>	<b>70</b>
Pandemonium	71
David Marr's Information Processing Model of Visual Perception	74
Geon Theory	77
<b>Binding</b>	<b>80</b>
The Agnosias	83
Face Agnosia	85
Faces, Experts, and Objects	87
<b>Summary</b>	<b>100</b>
<b>Test Yourself Study Questions</b>	<b>101</b>
<b>Key Terms and Concepts</b>	<b>101</b>

## **CHAPTER 3 Attention in a Noisy World 103**

---

<b>A Case of Left-Sided Neglect: Federico Fellini</b>	<b>104</b>
<b>The Filter Metaphor: The Cocktail Party Phenomenon</b>	<b>107</b>
<b>Donald Broadbent's Filter Model</b>	<b>109</b>
<b>The Leaky Filter: Moray and Triesman</b>	<b>110</b>
Early and Late Selection Filters	112
Bottleneck at the Response-Selection Stage	114
<b>The Resource Metaphor</b>	<b>115</b>
You Can't Try Harder When the Task Is Easy	119
Beyond the Single Resource Model	119
Real-World Divided Attention: Cell Phones and Driving	120
<b>Automatic and Controlled Processing</b>	<b>121</b>

<b>Building Bridges Between Mind and Brain: Executive Function, the Supervisory Attentional System, and the Brain</b>	<b>123</b>
<b>Space-Based Attention and Neglect</b>	<b>128</b>
<b>The Spotlight Metaphor: Space-Based Attention</b>	<b>128</b>
Posner's Visual Orienting Task: Covert Attention	128
Cortical Networks Underlying Spatial Neglect	130
Object-Based Attention	135
<b>Spatial and Object-Oriented Neglect</b>	<b>137</b>
Neglect of Imagined Space	138
Attentional Disorders and the Dysexecutive Syndrome	138
Attention-Deficit Hyperactivity Disorder	143
<b>Conclusions: Attention</b>	<b>144</b>
<b>Test Yourself Study Questions</b>	<b>145</b>
<b>Key Terms and Concepts</b>	<b>146</b>

## **CHAPTER 4   The Modal Model of Memory   147**

---

<b>Life Moment by Moment</b>	<b>148</b>
<b>Background for the Modal Model of Memory</b>	<b>150</b>
<b>Memory: The Modal Model</b>	<b>152</b>
<b>George Sperling's Discovery of Sensory Memory</b>	<b>153</b>
How Long Does Sensory Memory Last?	155
Experiments on the Four-Eared Man	156
The Purpose of Sensory Store	157
How Is Information Coded, or Represented, in Sensory Memory?	158
<b>Short-Term, or Primary, Memory</b>	<b>158</b>
How Much Can Be Stored in Short-Term Memory?	158
Loss of Information in Short-Term Memory Store	159
Decay in Short-Term Memory: The Brown-Peterson Task	160
Interference in Short-Term Memory: Proactive and Retroactive	161
Retrieval from Short-Term Memory: The Sternberg Paradigm	165
Coding in Short-Term Memory	166
Phonological Similarity Effect	167
Word Length Effect	167
Articulatory Suppression Effect	167
Semantic Coding in Short-Term Memory	167

<b>Summary of the Modal Model of Memory: Transition to Working Memory and Executive Function</b>	<b>170</b>
<b>Test Yourself Study Questions</b>	<b>171</b>
<b>Key Terms and Concepts</b>	<b>172</b>

## **CHAPTER 5 Working Memory and the Central Executive 173**

---

<b>Patient P.V.: Loss of Verbal Short-Term Memory with Preservation of Visual Short-Term Memory</b>	<b>174</b>
<b>Working Memory Circa 1974</b>	<b>174</b>
Independence of the Visuospatial Sketchpad and the Phonological Loop	176
The Central Executive	177
<b>Working Memory Circa 2000</b>	<b>180</b>
Integration of the Phonological Loop and the Visuospatial Sketchpad	180
Two Routes to Long-Term Memory: Rethinking the Short-Term Store	184
Working Memory and Attention	186
<b>Future Directions of Working Memory</b>	<b>188</b>
Breaking Apart the Visuospatial Sketchpad	188
<b>Building Bridges: The Central Executive and the Frontal Lobes</b>	<b>191</b>
<b>Conclusions</b>	<b>192</b>
<b>Test Yourself Study Questions</b>	<b>194</b>
<b>Key Terms and Concepts</b>	<b>195</b>

## **CHAPTER 6 Making Memories 197**

---

<b>PI to 31,811 Digits</b>	<b>198</b>
<b>Factors Influencing Memory Encoding</b>	<b>199</b>
Maintenance versus Elaborative Rehearsal	200
Depth of Processing Model	201
Objections to the Level of Processing Model	206

The Encoding Specificity Principle and State-Dependent Learning	208
Imagery	210
Self-Reference Effect	211
Flashbulb Memories	212
Bartlett's "War of the Ghosts": Memory as Active Reconstruction	215
<b>Electroconvulsive Therapy and Memory</b>	<b>217</b>
<b>Building Bridges: Consolidation of Encoding</b>	<b>220</b>
Memory Destruction versus Memory Reconstruction	223
<b>Conclusions</b>	<b>225</b>
<b>Test Yourself Study Questions</b>	<b>226</b>
<b>Key Terms and Concepts</b>	<b>227</b>
 <b>CHAPTER 7    Retrieval and Memory Distortion</b>	 <b>229</b>
<hr/>	
<b>Ebbinghaus's Memory Over Time</b>	<b>230</b>
<b>Why Do We Forget?</b>	<b>233</b>
Decay Theory	233
Retrieval Factors: Interference	234
Remembering as a Cause of Forgetting	236
Cue Diffusion	239
Associative Networks: Inhibition	242
Occlusion	243
Suppression and Repression	244
<b>Memory Distortion</b>	<b>245</b>
Eyewitness Testimony	245
Children as Witnesses	250
Source Memory	251
Source Monitoring	251
Source Memory and Aging	254
Recovered Memories	255
<b>Conclusions: Retrieval and Memory Distortion</b>	<b>257</b>
<b>Test Yourself Study Questions</b>	<b>257</b>
<b>Key Terms and Concepts</b>	<b>258</b>

## **CHAPTER 8 Variations of Long-Term Memory 259**

---

<b>K. C.: The Loss of Episodic Memory</b>	<b>261</b>
<b>Types of Long-Term Memory</b>	<b>262</b>
<b>Declarative, Explicit Memory: Episodic Memory</b>	<b>263</b>
Neuroanatomical Separation of Semantic and Episodic Memory	264
<b>Autobiographical Memory</b>	<b>266</b>
Autobiographical Memories Over the Life Span	266
Neural Systems and Episodic, Autobiographical, and Semantic Retrieval	269
Revisiting Consolidation	269
<b>Nondeclarative: Implicit Memory</b>	<b>271</b>
Warrington and Weiskrantz: Implicit Memory Retention in Amnesic Patients	271
Different Methods Reveal Implicit and Explicit Memory	272
Different Time Course for Implicit and Explicit Memory	274
Transfer Specificity and the Distinction Between Implicit and Explicit Memory	275
<b>"I Know Your Face but I Can't Remember . . . ?": Knowing versus Remembering</b>	<b>279</b>
Feeling of Knowing and Tip-of-the-Tongue as Gradients	280
The Cases of B. G. and J. B.: The Left Remembers, and the Right Knows	282
<b>Do Episodic Memories Become Semantic Memories?</b>	<b>283</b>
<b>Building Bridges: Temporal Lobe Explicit Memory and Striatum Implicit Memory</b>	<b>284</b>
<b>Conclusions: One Memory or Many?</b>	<b>289</b>
<b>Test Yourself Study Questions</b>	<b>290</b>
<b>Key Terms and Concepts</b>	<b>291</b>

## **CHAPTER 9 Categorization and Meaning 293**

---

<b>The Story of the Plague of Insomnia</b>	<b>294</b>
<b>Categories and Semantic Networks: The Classical Rule-Based Approach</b>	<b>296</b>

<b>Problems for the Classical Model</b>	<b>297</b>
Borderline and Unusual Cases	298
Intransitivity	299
Family Resemblance	300
<b>Feature Comparison Models</b>	<b>301</b>
A Rose Is a Flower but Is a Fig a “Fruit?” And What’s a Platypus Duck?—	
Typicality and Family Resemblance: The Prototype Model	301
Priming Semantic Networks	304
Neural Organization of Semantic Knowledge	307
Exemplar Models	309
<b>Schemata, Frames, and Scripts</b>	<b>312</b>
<b>Imagery-Based Knowledge Representation</b>	<b>316</b>
Are Perception and Imagery Accomplished	
by the Same Processes?	317
C. K.’s Perceptual Ability	318
Explanation For C. K.’s Deficit.	319
<b>Connectionist Models of Mind</b>	<b>320</b>
<b>Conclusions: Categories and Meaning</b>	<b>324</b>
<b>Test Yourself Study Questions</b>	<b>326</b>
<b>Key Terms and Concepts</b>	<b>327</b>

## **CHAPTER 10 Consciousness 329**

---

<b>“Now I am Awake!”—The Life of Clive Wearing</b>	<b>330</b>
<b>The Problem of Consciousness</b>	<b>331</b>
<b>Characteristics of Consciousness</b>	<b>332</b>
Consciousness Is the Tip of the Iceberg	332
Implicit Memory	332
Remember–Know	333
Neglect and Blindsight	334
Consciousness Is Both Time Limited and Continuous	336
Consciousness Interconnects Widely Distributed	
Neural/Cognitive Processes	340
K. C.: Modularity of Cognitive Functions	341
<b>The Theatre of Consciousness</b>	<b>343</b>
<b>Perceptual Binding as a Model for Consciousness</b>	<b>345</b>
Spatial Versus Temporal Binding	346

<b>Bridging Brain and Mind: The Global Neuronal Workplace</b>	<b>352</b>
<b>Awareness of Self and Others: Mirror Neurons, Action, and Understanding</b>	<b>354</b>
The “Purpose” of Mirror Neurons: Mind Reading	357
Autism and Mirror Neurons	361
<b>Conclusion: The Zombie within—The Purpose of Consciousness</b>	<b>364</b>
<b>Test Yourself Study Questions</b>	<b>365</b>
<b>Key Terms and Concepts</b>	<b>366</b>
 <b>CHAPTER II   The Description and Overview of Language</b>	 <b>367</b>
<hr/>	
<b>The Story of My Life, Helen Keller</b>	<b>368</b>
<b>Language and Speech</b>	<b>369</b>
The Speech Apparatus	371
<b>The Speech Signal</b>	<b>372</b>
Categorical Perception	373
Parallel Transmission of Phonemes	375
<b>Semantic, Top-Down Influence on Speech Perception</b>	<b>375</b>
<b>Morphemes</b>	<b>376</b>
<b>Syntax: Surface and Deep Structure</b>	<b>376</b>
Chomsky’s Deep Structure and Yoda Speak	378
<b>Words, Sentences, and the Extraction of Meaning</b>	<b>380</b>
The Garden-Path Model	383
Which Comes First? The Syntax or The Meaning?	385
<b>From Sentences to Narrative and Discourse</b>	<b>389</b>
<b>Building Bridges: Inference and the Brain</b>	<b>395</b>
<b>Conclusions: Language Description and Overview</b>	<b>399</b>
<b>Test Yourself Study Questions</b>	<b>400</b>
<b>Key Terms and Concepts</b>	<b>401</b>

## **CHAPTER 12 Fundamental Issues in Language Theory 403**

---

### **Nativist Versus Empiricist Theories of Language Acquisition 405**

#### **The Source of Language Structure 408**

#### **The Development of Language 409**

Early Speech Perception 409

Critical Period for Neural Consolidation of Speech

Sounds 410

Acquisition of Words 411

Emergence of Grammar 412

#### **The “Language Gene” 419**

#### **Influence of the Environment 420**

Creativity of Language 422

Universal Grammar 422

“Poverty of the Stimulus” 422

Recent Challenges to the Nativist Position 423

The Sapir-Whorf Hypothesis: Language Leads  
to Different Worldviews 423

Some Examples of Culture-Specific Language

Differences 425

Conclusions of Whorf Section 429

#### **Thought before Language? 429**

Connectionist Models of Language Acquisition 434

#### **Modularity of Language 437**

The Neuroanatomy of Language 438

Organization of Speech in Bilinguals 444

Uniqueness of Human Language 446

Did Neanderthal Man have Language? 447

#### **Conclusions: Language Issues 448**

The Modular Hypothesis 448

Thought Precedes and Underlies Language 449

Thought Precedes Language? 450

#### **Test Yourself Study Questions 451**

#### **Key Terms and Concepts 452**

## **CHAPTER 13 Information Processing and Artificial Intelligence 453**

---

### **Artificial Intelligence 455**

<b>Protocol Analysis—Simon</b>	<b>456</b>
Means-End Analysis	458
Utility Theory	460
Bounded Rationality: Heuristics	462
Availability	462
Hindsight Bias	463
Representativeness	466
Anchoring	467
The Framing Effect	468
Counterfactual Thinking: In the Best of Worlds and the Worst of Worlds	470

### **Game Theory 476**

### **Expert Systems 478**

### **Conclusions 480**

### **Test Yourself Study Questions 480**

### **Key Terms and Concepts 481**

## **CHAPTER 14 Problem Solving and Reasoning 483**

---

### **Early Research on Problem Solving: The Gestalt Tradition 484**

Wertheimer and Problem Solving	487
Maier's Functional Fixedness	490
Luchins' Water Jug Problem: Mental Set	492

### **Reasoning 494**

The Wason Selection Task	499
The Illusion of Objectivity: Availability, Pragmatics, Motivation, and Social Contracts	501
Social Contract Theory	504

### **Mental Models 508**

The Principle of Truth	509
The Equiprobability Principle	511
The Proportionality Principle	512

<b>Building Bridges: Imaging Decision Making</b>	<b>514</b>
Analogies	520
<b>But Are We Really Illogical?</b>	<b>527</b>
<b>Test Yourself Study Questions</b>	<b>528</b>
<b>Key Terms and Concepts</b>	<b>529</b>
<b>Appendix A: Neurons</b>	<b>531</b>
<b>Appendix B: Geography of the Brain</b>	<b>539</b>
<b>Appendix C: Imaging the Brain</b>	<b>545</b>
<b>References</b>	<b>555</b>
<b>Author Index</b>	<b>581</b>
<b>Subject Index</b>	<b>589</b>
