

CONTENTS

Abstract	3
Preface	7
Chapter 1. General background and biology of <i>Myrmica</i>	13
1.1. Scope of this monograph	13
1.2. The layout and use of this monograph	14
1.3. The biology of <i>Myrmica</i>	16
1.3.1. <i>Myrmica</i> in ecosystems	16
1.3.2. Anatomy and surface chemistry	17
1.3.3. Colony structure	18
1.3.4. Social interactions	20
1.3.5. Physiology	23
1.3.6. Social parasitism	25
1.4. A brief history of the taxonomic investigation of <i>Myrmica</i> in the Old World	27
1.4.1. Pre 1950	27
1.4.2. Post 1950	30
1.5. Morphometrics and <i>Myrmica</i> taxonomy	32
1.5.1. History of measurement of <i>Myrmica</i>	32
1.5.2. A brief critique of the value of morphometrics	33
1.5.3. Measurements and indices used in this monograph	35
1.6. Biographies of the authors	37
1.6.1. Biographies of the authors of this monograph	37
1.6.2. Biographies of other authors (ordered chronologically)	38
Chapter 2. Taxonomic structure of the genus <i>Myrmica</i>	51
2.1. Taxonomic position and diagnosis of the genus <i>Myrmica</i>	51
2.2. Species group concept in the genus <i>Myrmica</i>	58
Chapter 3. Review of species	69
3.1. Material studied and its deposition	69
3.2. The 303 names definitely attributable to the genus <i>Myrmica</i>	71
3.3. Review of extant <i>Myrmica</i> species of the Old World	79
3.3.1. Review of species	79
3.3.2. Drawings of the details of structure of extant <i>Myrmica</i> species	331
3.4. Fossil species, undoubtedly belonging to the genus <i>Myrmica</i>	653
3.5. Names <i>incertae sedis</i> in the genus <i>Myrmica</i>	657
3.6. <i>Nomina nuda</i> in the genus <i>Myrmica</i>	663
3.7. Unavailable names in the genus <i>Myrmica</i>	663
3.8. List of taxa originally described in the genus <i>Myrmica</i> , but afterward transferred to other genera or excluded from <i>Myrmica</i>	664
Chapter 4. Zoogeography and evolution of the genus <i>Myrmica</i>	671
4.1. The centres of <i>Myrmica</i> species diversity	672
4.2. Comparison of the regional faunas of <i>Myrmica</i>	678
4.2.1. Diversity between the nine centres	678
4.2.2. Interpretation of the diversity between the centres	686
4.3. Origin and evolution of the genus <i>Myrmica</i>	689
4.3.1. Putative ancestor and estimated time of <i>Myrmica</i> origin	689

4.3.2. Evolution within the genus <i>Myrmica</i> and origin of the species groups	691
4.3.2.1. Ancestral <i>Myrmica</i> forms and place of their origin	691
4.3.2.2. Origin of the species groups and their probable relationships	696
Chapter 5. Keys for the identification of the <i>Myrmica</i> species of the Old World	711
5.1. A key for the identification of the <i>Myrmica</i> species of West Europe and North Africa	713
5.2. A key for the identification of the <i>Myrmica</i> species of East Europe, West Siberia, northern Kazakhstan, Caucasus, Asia Minor, Turkmenistan and Iran	721
5.3. A key to the identification of the <i>Myrmica</i> species of East Siberia, Russian Far East, Mongolia, Korean Peninsula, northern China, and Japan	729
5.4. A key for the identification of the <i>Myrmica</i> species of the Middle Asian Mountains	734
5.5. A key for the identification of the <i>Myrmica</i> species of the Tibetan Plateau	735
5.6. A key to the identification of the <i>Myrmica</i> species of the Himalaya and Afghanistan	736
5.7. A key for the identification of the <i>Myrmica</i> species of South and South-East Asia	740
5.8. A key for the identification of the fossil <i>Myrmica</i> species	744
References	745
Index of the all Latin names	781
<i>Myrmica</i> names recognized here as good species	781
Other names	785
