

# Contents

## UNIT I

### Introduction to Physiology: The Cell and General Physiology

#### CHAPTER 1

#### Functional Organization of the Human Body and Control of the "Internal Environment" 3

Cells as the Living Units of the Body 3

Extracellular Fluid—The "Internal Environment" 3

"Homeostatic" Mechanisms of the Major Functional Systems 4

Control Systems of the Body 6

Summary—Automaticity of the Body 9

#### CHAPTER 2

#### The Cell and Its Functions 11

Organization of the Cell 11

Physical Structure of the Cell 12

Comparison of the Animal Cell with Precellular Forms of Life 17

Functional Systems of the Cell 18

Locomotion of Cells 23

#### CHAPTER 3

#### Genetic Control of Protein Synthesis, Cell Function, and Cell Reproduction 27

Genes in the Cell Nucleus 27

The DNA Code in the Cell Nucleus Is Transferred to an RNA Code in the Cell Cytoplasm—The Process of Transcription 30

Synthesis of Other Substances in the Cell 35

Control of Gene Function and Biochemical Activity in Cells 35

The DNA-Genetic System Also Controls Cell Reproduction 37

Cell Differentiation 39

Apoptosis—Programmed Cell Death 40

Cancer 40

## UNIT II

### Membrane Physiology, Nerve, and Muscle

#### CHAPTER 4

#### Transport of Substances Through Cell Membranes 45

The Lipid Barrier of the Cell Membrane, and Cell Membrane Transport Proteins 45

Diffusion 46

"Active Transport" of Substances Through Membranes 52

#### CHAPTER 5

#### Membrane Potentials and Action Potentials 57

Basic Physics of Membrane Potentials 57

Measuring the Membrane Potential 58

Resting Membrane Potential of Nerves 59

Nerve Action Potential 60

Roles of Other Ions During the Action Potential 64

Propagation of the Action Potential 64

Re-establishing Sodium and Potassium Ionic Gradients After Action Potentials Are Completed—Importance of Energy 65

Metabolism 65

Plateau in Some Action Potentials 66

Rhythmicity of Some Excitable Tissues—Repetitive Discharge 66

Special Characteristics of Signal Transmission in Nerve Trunks 67

Excitation—The Process of Eliciting the Action Potential 68

Recording Membrane Potentials and Action Potentials 69

**CHAPTER 6**

<b>Contraction of Skeletal Muscle</b>	<b>71</b>
Physiologic Anatomy of Skeletal Muscle	71
General Mechanism of Muscle Contraction	73
Molecular Mechanism of Muscle Contraction	74
Energetics of Muscle Contraction	78
Characteristics of Whole Muscle Contraction	79

**CHAPTER 7**

<b>Excitation of Skeletal Muscle: Neuromuscular Transmission and Excitation-Contraction Coupling</b>	<b>83</b>
Transmission of Impulses from Nerve Endings to Skeletal Muscle Fibers: The Neuromuscular Junction	83
Molecular Biology of Acetylcholine Formation and Release	86
Drugs That Enhance or Block Transmission at the Neuromuscular Junction	86
Myasthenia Gravis Causes Muscle Paralysis	86
Muscle Action Potential	87
Excitation-Contraction Coupling	88

**CHAPTER 8**

<b>Excitation and Contraction of Smooth Muscle</b>	<b>91</b>
Contraction of Smooth Muscle	91
Nervous and Hormonal Control of Smooth Muscle Contraction	94

**UNIT III****The Heart****CHAPTER 9**

<b>Cardiac Muscle; The Heart as a Pump and Function of the Heart Valves</b>	<b>101</b>
Physiology of Cardiac Muscle	101
Cardiac Cycle	104
Relationship of the Heart Sounds to Heart Pumping	107
Work Output of the Heart	107
Chemical Energy Required for Cardiac Contraction: Oxygen Utilization by the Heart	109
Regulation of Heart Pumping	110

**CHAPTER 10**

<b>Rhythmical Excitation of the Heart</b>	<b>115</b>
Specialized Excitatory and Conductive System of the Heart	115
Control of Excitation and Conduction in the Heart	118

**CHAPTER 11**

<b>The Normal Electrocardiogram</b>	<b>121</b>
Characteristics of the Normal Electrocardiogram	121
Methods for Recording Electrocardiograms	123
Flow of Current Around the Heart during the Cardiac Cycle	123
Electrocardiographic Leads	124

**CHAPTER 12**

<b>Electrocardiographic Interpretation of Cardiac Muscle and Coronary Blood Flow Abnormalities: Vectorial Analysis</b>	<b>129</b>
Principles of Vectorial Analysis of Electrocardiograms	129
Vectorial Analysis of the Normal Electrocardiogram	131
Mean Electrical Axis of the Ventricular QRS—and Its Significance	134
Conditions That Cause Abnormal Voltages of the QRS Complex	137
Prolonged and Bizarre Patterns of the QRS Complex	137
Current of Injury	138
Abnormalities in the T Wave	141

**CHAPTER 13**

<b>Cardiac Arrhythmias and Their Electrocardiographic Interpretation</b>	<b>143</b>
Abnormal Sinus Rhythms	143
Abnormal Rhythms That Result from Block of Heart Signals Within the Intracardiac Conduction Pathways	144
Premature Contractions	146
Paroxysmal Tachycardia	148
Ventricular Fibrillation	149
Atrial Fibrillation	151
Atrial Flutter	152
Cardiac Arrest	153

**UNIT IV****The Circulation****CHAPTER 14**

<b>Overview of the Circulation; Biophysics of Pressure, Flow, and Resistance</b>	<b>157</b>
Physical Characteristics of the Circulation	157
Basic Principles of Circulatory Function	158
Interrelationships of Pressure, Flow, and Resistance	159

**CHAPTER 15**

<b>Vascular Distensibility and Functions of the Arterial and Venous Systems</b>	<b>167</b>
Vascular Distensibility	167
Arterial Pressure Pulsations	168
Veins and Their Functions	171

**CHAPTER 16**

<b>The Microcirculation and Lymphatic System: Capillary Fluid Exchange, Interstitial Fluid, and Lymph Flow</b>	<b>177</b>
Structure of the Microcirculation and Capillary System	177
Flow of Blood in the Capillaries—Vasomotion	178
Exchange of Water, Nutrients, and Other Substances Between the Blood and Interstitial Fluid	179
Interstitium and Interstitial Fluid	180
Fluid Filtration Across Capillaries Is Determined by Hydrostatic and Colloid Osmotic Pressures, as Well as Capillary Filtration Coefficient	181
Lymphatic System	186

**CHAPTER 17**

<b>Local and Humoral Control of Tissue Blood Flow</b>	<b>191</b>
Local Control of Blood Flow in Response to Tissue Needs	191
Mechanisms of Blood Flow Control	191
Humoral Control of the Circulation	199

**CHAPTER 18**

<b>Nervous Regulation of the Circulation, and Rapid Control of Arterial Pressure</b>	<b>201</b>
Nervous Regulation of the Circulation	201
Role of the Nervous System in Rapid Control of Arterial Pressure	204
Special Features of Nervous Control of Arterial Pressure	209

**CHAPTER 19**

<b>Role of the Kidneys in Long-Term Control of Arterial Pressure and in Hypertension: The Integrated System for Arterial Pressure Regulation</b>	<b>213</b>
Renal–Body Fluid System for Arterial Pressure Control	213
The Renin–Angiotensin System: Its Role in Arterial Pressure Control	220
Summary of the Integrated, Multifaceted System for Arterial Pressure Regulation	226

**CHAPTER 20**

<b>Cardiac Output, Venous Return, and Their Regulation</b>	<b>229</b>
Normal Values for Cardiac Output at Rest and During Activity	229
Control of Cardiac Output by Venous Return—Role of the Frank-Starling Mechanism of the Heart	229
Pathologically High or Low Cardiac Outputs	232
Methods for Measuring Cardiac Output	240

**CHAPTER 21**

<b>Muscle Blood Flow and Cardiac Output During Exercise; the Coronary Circulation and Ischemic Heart Disease</b>	<b>243</b>
Blood Flow Regulation in Skeletal Muscle at Rest and During Exercise	243
Coronary Circulation	246

**CHAPTER 22**

<b>Cardiac Failure</b>	<b>255</b>
Circulatory Dynamics in Cardiac Failure	255
Unilateral Left Heart Failure	259
Low-Output Cardiac Failure—Cardiogenic Shock	259
Edema in Patients with Cardiac Failure	259
Cardiac Reserve	261

**CHAPTER 23**

<b>Heart Valves and Heart Sounds; Valvular and Congenital Heart Defects</b>	<b>265</b>
Heart Sounds	265
Abnormal Circulatory Dynamics in Valvular Heart Disease	268
Abnormal Circulatory Dynamics in Congenital Heart Defects	269
Use of Extracorporeal Circulation During Cardiac Surgery	271
Hypertrophy of the Heart in Valvular and Congenital Heart Disease	272

**CHAPTER 24**

<b>Circulatory Shock and Its Treatment</b>	<b>273</b>
Physiologic Causes of Shock	273
Shock Caused by Hypovolemia—Hemorrhagic Shock	274
Neurogenic Shock—Increased Vascular Capacity	279
Anaphylactic Shock and Histamine Shock	280
Septic Shock	280

Physiology of Treatment in Shock	280	Abnormalities of Micturition	310
Circulatory Arrest	281	Urine Formation Results from Glomerular Filtration, Tubular Reabsorption, and Tubular Secretion	310
<b>UNIT V</b>			
<b>The Body Fluids and Kidneys</b>			
<b>CHAPTER 25</b>			
<b>The Body Fluid Compartments: Extracellular and Intracellular Fluids; Edema</b>	<b>285</b>	Glomerular Filtration—The First Step in Urine Formation	312
Fluid Intake and Output Are Balanced During Steady-State Conditions	285	Determinants of the GFR	314
Body Fluid Compartments	286	Renal Blood Flow	316
Extracellular Fluid Compartment	287	Physiologic Control of Glomerular Filtration and Renal Blood Flow	317
Blood Volume	287	Autoregulation of GFR and Renal Blood Flow	319
Constituents of Extracellular and Intracellular Fluids	287	<b>CHAPTER 27</b>	
Measurement of Fluid Volumes in the Different Body Fluid Compartments—the Indicator-Dilution Principle	287	<b>Urine Formation by the Kidneys: II. Tubular Reabsorption and Secretion</b>	<b>323</b>
Determination of Volumes of Specific Body Fluid Compartments	289	Renal Tubular Reabsorption and Secretion	323
Regulation of Fluid Exchange and Osmotic Equilibrium Between Intracellular and Extracellular Fluid	290	Tubular Reabsorption Includes Passive and Active Mechanisms	323
Basic Principles of Osmosis and Osmotic Pressure	290	Reabsorption and Secretion Along Different Parts of the Nephron	329
Osmotic Equilibrium Is Maintained Between Intracellular and Extracellular Fluids	291	Regulation of Tubular Reabsorption	334
Volume and Osmolality of Extracellular and Intracellular Fluids in Abnormal States	292	Use of Clearance Methods to Quantify Kidney Function	340
Glucose and Other Solutions Administered for Nutritive Purposes	294	<b>CHAPTER 28</b>	
Clinical Abnormalities of Fluid Volume Regulation: Hyponatremia and Hypernatremia	294	<b>Urine Concentration and Dilution; Regulation of Extracellular Fluid Osmolarity and Sodium Concentration</b>	<b>345</b>
Edema: Excess Fluid in the Tissues	296	Kidneys Excrete Excess Water by Forming Dilute Urine	345
Fluids in the "Potential Spaces" of the Body	300	Kidneys Conserve Water by Excreting Concentrated Urine	346
<b>CHAPTER 26</b>		Quantifying Renal Urine Concentration and Dilution: "Free Water" and Osmolar Clearances	354
<b>Urine Formation by the Kidneys: I. Glomerular Filtration, Renal Blood Flow, and Their Control</b>	<b>303</b>	Disorders of Urinary Concentrating Ability	354
Multiple Functions of the Kidneys	303	Control of Extracellular Fluid Osmolarity and Sodium Concentration	355
Physiologic Anatomy of the Kidneys	304	Osmoreceptor-ADH Feedback System	355
Micturition	307	Importance of Thirst in Controlling Extracellular Fluid Osmolarity and Sodium Concentration	357
Physiologic Anatomy of the Bladder	307	Salt-Appetite Mechanism for Controlling Extracellular Fluid Sodium Concentration and Volume	360
Transport of Urine from the Kidney Through the Ureters and into the Bladder	308	<b>CHAPTER 29</b>	
Filling of the Bladder and Bladder Wall Tone; the Cystometrogram	309	<b>Renal Regulation of Potassium, Calcium, Phosphate, and Magnesium; Integration of Renal Mechanisms for Control of Blood Volume and Extracellular Fluid Volume</b>	<b>361</b>
Micturition Reflex	309	Regulation of Extracellular Fluid Potassium Concentration and Potassium Excretion	361

Control of Renal Calcium Excretion and Extracellular Calcium Ion Concentration	367	<b>CHAPTER 31</b>	
Control of Renal Magnesium Excretion and Extracellular Magnesium Ion Concentration	369	<b>Diuretics, Kidney Diseases</b>	<b>397</b>
Integration of Renal Mechanisms for Control of Extracellular Fluid	370	Diuretics and Their Mechanisms of Action	397
Importance of Pressure Natriuresis and Pressure Diuresis in Maintaining Body Sodium and Fluid Balance	371	Kidney Diseases	399
Distribution of Extracellular Fluid Between the Interstitial Spaces and Vascular System	373	Acute Renal Failure	399
Nervous and Hormonal Factors Increase the Effectiveness of Renal–Body Fluid Feedback Control	373	Chronic Renal Failure: An Irreversible Decrease in the Number of Functional Nephrons	401
Integrated Responses to Changes in Sodium Intake	376	Specific Tubular Disorders	408
Conditions That Cause Large Increases in Blood Volume and Extracellular Fluid Volume	376	Treatment of Renal Failure by Transplantation or by Dialysis with an Artificial Kidney	409
Conditions That Cause Large Increases in Extracellular Fluid Volume but with Normal Blood Volume	377		
<b>CHAPTER 30</b>		<b>UNIT VI</b>	
<b>Acid–Base Regulation</b>	<b>379</b>	<b>Blood Cells, Immunity, and Blood Coagulation</b>	
H <sup>+</sup> Concentration Is Precisely Regulated	379		
Acids and Bases—Their Definitions and Meanings	379	<b>CHAPTER 32</b>	
Defending Against Changes in H <sup>+</sup> Concentration: Buffers, Lungs, and Kidneys	380	<b>Red Blood Cells, Anemia, and Polycythemia</b>	<b>413</b>
Buffering of H <sup>+</sup> in the Body Fluids	380	Red Blood Cells (Erythrocytes)	413
Bicarbonate Buffer System	381	Anemias	420
Phosphate Buffer System	383	Polycythemia	421
Proteins Are Important Intracellular Buffers	383	<b>CHAPTER 33</b>	
Respiratory Regulation of Acid–Base Balance	384	<b>Resistance of the Body to Infection:</b>	
Renal Control of Acid–Base Balance	385	<b>I. Leukocytes, Granulocytes, the Monocyte-Macrophage System, and Inflammation</b>	<b>423</b>
Secretion of H <sup>+</sup> and Reabsorption of HCO <sub>3</sub> <sup>−</sup> by the Renal Tubules	386	Leukocytes (White Blood Cells)	423
Combination of Excess H <sup>+</sup> with Phosphate and Ammonia Buffers in the Tubule Generates “New” HCO <sub>3</sub> <sup>−</sup>	388	Neutrophils and Macrophages Defend Against Infections	425
Quantifying Renal Acid–Base Excretion	389	Monocyte-Macrophage Cell System (Reticuloendothelial System)	426
Renal Correction of Acidosis—Increased Excretion of H <sup>+</sup> and Addition of HCO <sub>3</sub> <sup>−</sup> to the Extracellular Fluid	391	Inflammation: Role of Neutrophils and Macrophages	428
Renal Correction of Alkalosis—Decreased Tubular Secretion of H <sup>+</sup> and Increased Excretion of HCO <sub>3</sub> <sup>−</sup>	391	Eosinophils	430
Clinical Causes of Acid–Base Disorders	392	Basophils	431
Treatment of Acidosis or Alkalosis	393	Leukopenia	431
Clinical Measurements and Analysis of Acid–Base Disorders	393	Leukemias	431
		<b>CHAPTER 34</b>	
		<b>Resistance of the Body to Infection:</b>	
		<b>II. Immunity and Allergy</b>	<b>433</b>
		Acquired (Adaptive) Immunity	433
		Allergy and Hypersensitivity	443
		<b>CHAPTER 35</b>	
		<b>Blood Types; Transfusion; Tissue and Organ Transplantation</b>	<b>445</b>
		Antigenicity Causes Immune Reactions of Blood	445
		O–A–B Blood Types	445
		Rh Blood Types	447
		Transplantation of Tissues and Organs	449

**CHAPTER 36**

<b>Hemostasis and Blood Coagulation</b>	<b>451</b>
Events in Hemostasis	451
Vascular Constriction	451
Mechanism of Blood Coagulation	453
Conditions That Cause Excessive Bleeding in Humans	457
Thromboembolic Conditions in the Human Being	459
Anticoagulants for Clinical Use	459
Blood Coagulation Tests	460

**UNIT VII****Respiration****CHAPTER 37**

<b>Pulmonary Ventilation</b>	<b>465</b>
Mechanics of Pulmonary Ventilation	465
Pulmonary Volumes and Capacities	469
Minute Respiratory Volume Equals Respiratory Rate Times Tidal Volume	471
Alveolar Ventilation	471
Functions of the Respiratory Passageways	472

**CHAPTER 38**

<b>Pulmonary Circulation, Pulmonary Edema, Pleural Fluid</b>	<b>477</b>
Physiologic Anatomy of the Pulmonary Circulatory System	477
Pressures in the Pulmonary System	477
Blood Volume of the Lungs	478
Blood Flow Through the Lungs and Its Distribution	479
Effect of Hydrostatic Pressure Gradients in the Lungs on Regional Pulmonary Blood Flow	479
Pulmonary Capillary Dynamics	481
Fluid in the Pleural Cavity	483

**CHAPTER 39**

<b>Physical Principles of Gas Exchange; Diffusion of Oxygen and Carbon Dioxide Through the Respiratory Membrane</b>	<b>485</b>
Physics of Gas Diffusion and Gas Partial Pressures	485
Compositions of Alveolar Air and Atmospheric Air Are Different	487
Diffusion of Gases Through the Respiratory Membrane	489
Effect of the Ventilation-Perfusion Ratio on Alveolar Gas Concentration	492

**CHAPTER 40**

<b>Transport of Oxygen and Carbon Dioxide in Blood and Tissue Fluids</b>	<b>495</b>
Transport of Oxygen from the Lungs to the Body Tissues	495
Transport of Carbon Dioxide in the Blood	502
Respiratory Exchange Ratio	504

**CHAPTER 41**

<b>Regulation of Respiration</b>	<b>505</b>
Respiratory Center	505
Chemical Control of Respiration	507
Peripheral Chemoreceptor System for Control of Respiratory Activity—Role of Oxygen in Respiratory Control	508
Regulation of Respiration During Exercise	510
Other Factors That Affect Respiration	512

**CHAPTER 42**

<b>Respiratory Insufficiency—Pathophysiology, Diagnosis, Oxygen Therapy</b>	<b>515</b>
Useful Methods for Studying Respiratory Abnormalities	515
Pathophysiology of Specific Pulmonary Abnormalities	517
Hypoxia and Oxygen Therapy	520
Hypercapnia—Excess Carbon Dioxide in the Body Fluids	522
Artificial Respiration	522

**UNIT VIII****Aviation, Space, and Deep-Sea Diving Physiology****CHAPTER 43**

<b>Aviation, High-Altitude, and Space Physiology</b>	<b>527</b>
Effects of Low Oxygen Pressure on the Body	527
Effects of Acceleratory Forces on the Body in Aviation and Space Physiology	531
"Artificial Climate" in the Sealed Spacecraft	533
Weightlessness in Space	533

**CHAPTER 44**

<b>Physiology of Deep-Sea Diving and Other Hyperbaric Conditions</b>	<b>535</b>
Effect of High Partial Pressures of Individual Gases on the Body	535
Scuba (Self-Contained Underwater Breathing Apparatus) Diving	539
Special Physiologic Problems in Submarines	540
Hyperbaric Oxygen Therapy	540

**UNIT IX****The Nervous System: A. General Principles and Sensory Physiology****CHAPTER 45****Organization of the Nervous System, Basic Functions of Synapses, and Neurotransmitters 543**

General Design of the Nervous System 543

Major Levels of Central Nervous System Function 545

Comparison of the Nervous System with a Computer 546

Central Nervous System Synapses 546

Some Special Characteristics of Synaptic Transmission 557

**CHAPTER 46****Sensory Receptors, Neuronal Circuits for Processing Information 559**

Types of Sensory Receptors and the Stimuli They Detect 559

Transduction of Sensory Stimuli into Nerve Impulses 560

Nerve Fibers That Transmit Different Types of Signals and Their Physiologic Classification 563

Transmission of Signals of Different Intensity in Nerve Tracts—Spatial and Temporal Summation 564

Transmission and Processing of Signals in Neuronal Pools 564

Instability and Stability of Neuronal Circuits 569

**CHAPTER 47****Somatic Sensations: I. General Organization, the Tactile and Position Senses 571**

Classification of Somatic Senses 571

Detection and Transmission of Tactile Sensations 571

Sensory Pathways for Transmitting Somatic Signals into the Central Nervous System 573

Transmission in the Dorsal Column—Medial Lemniscal System 573

Transmission of Less Critical Sensory Signals in the Anterolateral Pathway 580

Some Special Aspects of Somatosensory Function 581

**CHAPTER 48****Somatic Sensations: II. Pain, Headache, and Thermal Sensations 583**

Types of Pain and Their Qualities—Fast Pain and Slow Pain 583

Pain Receptors and Their Stimulation 583

Dual Pathways for Transmission of Pain Signals into the Central Nervous System 584

Pain Suppression ("Analgesia") System in the Brain and Spinal Cord 586

Referred Pain 588

Visceral Pain 588

Some Clinical Abnormalities of Pain and Other Somatic Sensations 590

Headache 590

Thermal Sensations 592

**UNIT X****The Nervous System: B. The Special Senses****CHAPTER 49****The Eye: I. Optics of Vision 597**

Physical Principles of Optics 597

Optics of the Eye 600

Ophthalmoscope 605

Fluid System of the Eye—Intraocular Fluid 606

**CHAPTER 50****The Eye: II. Receptor and Neural Function of the Retina 609**

Anatomy and Function of the Structural Elements of the Retina 609

Photochemistry of Vision 611

Color Vision 615

Neural Function of the Retina 616

**CHAPTER 51****The Eye: III. Central Neurophysiology of Vision 623**

Visual Pathways 623

Organization and Function of the Visual Cortex 624

Neuronal Patterns of Stimulation During Analysis of the Visual Image 626

Fields of Vision; Perimetry 627

Eye Movements and Their Control 627

Autonomic Control of Accommodation and Pupillary Aperture 631

**CHAPTER 52****The Sense of Hearing 633**

Tympanic Membrane and the Ossicular System 633

Cochlea 634

Central Auditory Mechanisms 639

Hearing Abnormalities 642

**CHAPTER 53**

<b>The Chemical Senses—Taste and Smell</b>	<b>645</b>
Sense of Taste	645
Sense of Smell	648

**UNIT XI**
**The Nervous System: C. Motor and Integrative Neurophysiology**

---

**CHAPTER 54**

<b>Motor Functions of the Spinal Cord; the Cord Reflexes</b>	<b>655</b>
Organization of the Spinal Cord for Motor Functions	655
Muscle Sensory Receptors—Muscle Spindles and Golgi Tendon Organs—And Their Roles in Muscle Control	657
Flexor Reflex and the Withdrawal Reflexes	661
Crossed Extensor Reflex	663
Reciprocal Inhibition and Reciprocal Innervation	663
Reflexes of Posture and Locomotion	663
Scratch Reflex	664
Spinal Cord Reflexes That Cause Muscle Spasm	664
Autonomic Reflexes in the Spinal Cord	665
Spinal Cord Transection and Spinal Shock	665

**CHAPTER 55**

<b>Cortical and Brain Stem Control of Motor Function</b>	<b>667</b>
Motor Cortex and Corticospinal Tract	667
Role of the Brain Stem in Controlling Motor Function	673
Vestibular Sensations and Maintenance of Equilibrium	674
Functions of Brain Stem Nuclei in Controlling Subconscious, Stereotyped Movements	678

**CHAPTER 56**

<b>Contributions of the Cerebellum and Basal Ganglia to Overall Motor Control</b>	<b>681</b>
Cerebellum and Its Motor Functions	681
Basal Ganglia—Their Motor Functions	689
Integration of the Many Parts of the Total Motor Control System	694

**CHAPTER 57**

<b>Cerebral Cortex, Intellectual Functions of the Brain, Learning, and Memory</b>	<b>697</b>
Physiologic Anatomy of the Cerebral Cortex	697
Functions of Specific Cortical Areas	698

Function of the Brain in Communication—Language Input and Language Output	703
Function of the Corpus Callosum and Anterior Commissure to Transfer Thoughts, Memories, Training, and Other Information Between the Two Cerebral Hemispheres	704
Thoughts, Consciousness, and Memory	705

**CHAPTER 58**

<b>Behavioral and Motivational Mechanisms of the Brain—The Limbic System and the Hypothalamus</b>	<b>711</b>
Activating-Driving Systems of the Brain	711
Limbic System	714
Functional Anatomy of the Limbic System; Key Position of the Hypothalamus	714
Hypothalamus, a Major Control Headquarters for the Limbic System	715
Specific Functions of Other Parts of the Limbic System	718

**CHAPTER 59**

<b>States of Brain Activity—Sleep, Brain Waves, Epilepsy, Psychoses</b>	<b>721</b>
Sleep	721
Epilepsy	725
Psychotic Behavior and Dementia—Roles of Specific Neurotransmitter Systems	726
Schizophrenia—Possible Exaggerated Function of Part of the Dopamine System	727

**CHAPTER 60**

<b>The Autonomic Nervous System and the Adrenal Medulla</b>	<b>729</b>
General Organization of the Autonomic Nervous System	729
Basic Characteristics of Sympathetic and Parasympathetic Function	731
Autonomic Reflexes	738
Stimulation of Discrete Organs in Some Instances and Mass Stimulation in Other Instances by the Sympathetic and Parasympathetic Systems	738
Pharmacology of the Autonomic Nervous System	739

**CHAPTER 61**

<b>Cerebral Blood Flow, Cerebrospinal Fluid, and Brain Metabolism</b>	<b>743</b>
Cerebral Blood Flow	743
Cerebrospinal Fluid System	746
Brain Metabolism	749

**UNIT XII****Gastrointestinal Physiology****CHAPTER 62****General Principles of Gastrointestinal Function—Motility, Nervous Control, and Blood Circulation 753**

General Principles of Gastrointestinal Motility 753

Neural Control of Gastrointestinal Function—Enteric Nervous System 755

Functional Types of Movements in the Gastrointestinal Tract 759

Gastrointestinal Blood Flow—"Splanchnic Circulation" 759

**CHAPTER 63****Propulsion and Mixing of Food in the Alimentary Tract 763**

Ingestion of Food 763

Motor Functions of the Stomach 765

Movements of the Small Intestine 768

Movements of the Colon 770

Other Autonomic Reflexes That Affect Bowel Activity 772

**CHAPTER 64****Secretory Functions of the Alimentary Tract 773**

General Principles of Alimentary Tract Secretion 773

Secretion of Saliva 775

Esophageal Secretion 776

Gastric Secretion 777

Pancreatic Secretion 780

Secretion of Bile by the Liver; Functions of the Biliary Tree 783

Secretions of the Small Intestine 786

Secretion of Mucus by the Large Intestine 787

**CHAPTER 65****Digestion and Absorption in the Gastrointestinal Tract 789**

Digestion of the Various Foods by Hydrolysis 789

Basic Principles of Gastrointestinal Absorption 793

Absorption in the Small Intestine 794

Absorption in the Large Intestine: Formation of Feces 797

**CHAPTER 66****Physiology of Gastrointestinal Disorders 799**

Disorders of Swallowing and of the Esophagus 799

Disorders of the Stomach 799

Disorders of the Small Intestine 801

Disorders of the Large Intestine 802

General Disorders of the Gastrointestinal Tract 803

**UNIT XIII****Metabolism and Temperature Regulation****CHAPTER 67****Metabolism of Carbohydrates, and Formation of Adenosine Triphosphate 809**

Central Role of Glucose in Carbohydrate Metabolism 810

Transport of Glucose Through the Cell Membrane 810

Glycogen Is Stored in Liver and Muscle 811

Release of Energy from Glucose by the Glycolytic Pathway 812

Release of Energy from Glucose by the Pentose Phosphate Pathway 816

Formation of Carbohydrates from Proteins and Fats—"Gluconeogenesis" 817

Blood Glucose 817

**CHAPTER 68****Lipid Metabolism 819**

Transport of Lipids in the Body Fluids 819

Fat Deposits 821

Use of Triglycerides for Energy: Formation of Adenosine Triphosphate 822

Regulation of Energy Release from Triglycerides 825

Phospholipids and Cholesterol 826

Atherosclerosis 827

**CHAPTER 69****Protein Metabolism 831**

Basic Properties 831

Transport and Storage of Amino Acids 831

Functional Roles of the Plasma Proteins 833

Hormonal Regulation of Protein Metabolism 835

**CHAPTER 70****The Liver as an Organ 837**

Physiologic Anatomy of the Liver 837

Hepatic Vascular and Lymph Systems 837

Metabolic Functions of the Liver 839

Measurement of Bilirubin in the Bile as a Clinical Diagnostic Tool 840

**CHAPTER 71**

<b>Dietary Balances; Regulation of Feeding; Obesity and Starvation; Vitamins and Minerals</b>	<b>843</b>
Energy Intake and Output Are Balanced Under Steady-State Conditions	843
Dietary Balances	843
Regulation of Food Intake and Energy Storage	845
Obesity	850
Inanition, Anorexia, and Cachexia	851
Starvation	852
Vitamins	852
Mineral Metabolism	855

**CHAPTER 72**

<b>Energetics and Metabolic Rate</b>	<b>859</b>
Adenosine Triphosphate (ATP) Functions as an "Energy Currency" in Metabolism	859
Control of Energy Release in the Cell	861
Metabolic Rate	862
Energy Metabolism—Factors That Influence Energy Output	863

**CHAPTER 73**

<b>Body Temperature Regulation, and Fever</b>	<b>867</b>
Normal Body Temperatures	867
Body Temperature Is Controlled by Balancing Heat Production and Heat Loss	867
Regulation of Body Temperature—Role of the Hypothalamus	871
Abnormalities of Body Temperature Regulation	875

**UNIT XIV****Endocrinology and Reproduction****CHAPTER 74**

<b>Introduction to Endocrinology</b>	<b>881</b>
Coordination of Body Functions by Chemical Messengers	881
Chemical Structure and Synthesis of Hormones	881
Hormone Secretion, Transport, and Clearance from the Blood	884
Mechanisms of Action of Hormones	886
Measurement of Hormone Concentrations in the Blood	891

**CHAPTER 75**

<b>Pituitary Hormones and Their Control by the Hypothalamus</b>	<b>895</b>
Pituitary Gland and Its Relation to the Hypothalamus	895
Hypothalamus Controls Pituitary Secretion	897
Physiological Functions of Growth Hormone	898
Posterior Pituitary Gland and Its Relation to the Hypothalamus	904

**CHAPTER 76**

<b>Thyroid Metabolic Hormones</b>	<b>907</b>
Synthesis and Secretion of the Thyroid Metabolic Hormones	907
Physiological Functions of the Thyroid Hormones	910
Regulation of Thyroid Hormone Secretion	914
Diseases of the Thyroid	916

**CHAPTER 77**

<b>Adrenocortical Hormones</b>	<b>921</b>
Synthesis and Secretion of Adrenocortical Hormones	921
Functions of the Mineralocorticoids—Aldosterone	924
Functions of the Glucocorticoids	928
Adrenal Androgens	934
Abnormalities of Adrenocortical Secretion	934

**CHAPTER 78**

<b>Insulin, Glucagon, and Diabetes Mellitus</b>	<b>939</b>
Insulin and Its Metabolic Effects	939
Glucagon and Its Functions	947
Somatostatin Inhibits Glucagon and Insulin Secretion	949
Summary of Blood Glucose Regulation	949
Diabetes Mellitus	950

**CHAPTER 79**

<b>Parathyroid Hormone, Calcitonin, Calcium and Phosphate Metabolism, Vitamin D, Bone, and Teeth</b>	<b>955</b>
Overview of Calcium and Phosphate Regulation in the Extracellular Fluid and Plasma	955
Bone and Its Relation to Extracellular Calcium and Phosphate	957
Vitamin D	960
Parathyroid Hormone	962
Calcitonin	966
Summary of Control of Calcium Ion Concentration	966

Pathophysiology of Parathyroid Hormone, Vitamin D, and Bone Disease	967	Function of the Placenta	1005
Physiology of the Teeth	969	Hormonal Factors in Pregnancy	1007
<b>CHAPTER 80</b>		Response of the Mother's Body to Pregnancy	1009
<b>Reproductive and Hormonal Functions of the Male (and Function of the Pineal Gland)</b>	<b>973</b>	Parturition	1011
Physiologic Anatomy of the Male Sexual Organs	973	Lactation	1014
Spermatogenesis	973	<b>CHAPTER 83</b>	
Male Sexual Act	978	<b>Fetal and Neonatal Physiology</b>	<b>1019</b>
Testosterone and Other Male Sex Hormones	979	Growth and Functional Development of the Fetus	1019
Abnormalities of Male Sexual Function	984	Development of the Organ Systems	1019
Erectile Dysfunction in the Male	985	Adjustments of the Infant to Extrauterine Life	1021
Pineal Gland—Its Function in Controlling Seasonal Fertility in Some Animals	986	Special Functional Problems in the Neonate	1023
		Special Problems of Prematurity	1026
		Growth and Development of the Child	1027
<b>CHAPTER 81</b>			
<b>Female Physiology Before Pregnancy and Female Hormones</b>	<b>987</b>	<b>UNIT XV</b>	
Physiologic Anatomy of the Female Sexual Organs	987	<b>Sports Physiology</b>	
Female Hormonal System	987		
Monthly Ovarian Cycle; Function of the Gonadotropic Hormones	988	<b>CHAPTER 84</b>	
Functions of the Ovarian Hormones—Estradiol and Progesterone	991	<b>Sports Physiology</b>	<b>1031</b>
Regulation of the Female Monthly Rhythm—Interplay Between the Ovarian and Hypothalamic-Pituitary Hormones	996	Muscles in Exercise	1031
Abnormalities of Secretion by the Ovaries	999	Respiration in Exercise	1036
Female Sexual Act	1000	Cardiovascular System in Exercise	1038
Female Fertility	1000	Body Heat in Exercise	1039
		Body Fluids and Salt in Exercise	1040
<b>CHAPTER 82</b>		Drugs and Athletes	1040
<b>Pregnancy and Lactation</b>	<b>1003</b>	Body Fitness Prolongs Life	1041
Maturation and Fertilization of the Ovum	1003		
Early Nutrition of the Embryo	1005	<b>Index</b>	<b>1043</b>
