<i>Preface</i>	<i>xiv</i>		
<i>Marine Conservation Ecology: Concepts and Frameworks</i>			
<i>Acknowledgements</i>	<i>xviii</i>		
<i>Acronyms and Abbreviations</i>	<i>xix</i>		
1 Introduction: Why Marine Conservation is Necessary <i>Significance, threats and management of the oceans and biodiversity</i>	1	7 Distinctive Areas: Species and Ecosystem Processes <i>Ecosystem processes – ergoclines and hotspots</i>	143
2 The Marine Environment: Physico-chemical Characteristics <i>Structures and processes – enduring and recurrent factors</i>	23	8 Patterns of Biodiversity: Species Diversity <i>Theories and relationships – global, regional, local</i>	157
3 The Marine Environment: Ecology and Biology <i>Pelagic and benthic realms and coastal fringing communities</i>	46	9 Species and Focal Species <i>Keystones, umbrellas, flagships, indicators and others</i>	187
4 Approaches to Marine Conservation <i>Traditional strategies and ecological frameworks</i>	73	10 Genetic Diversity <i>Significance of genetics: From genes to ecosystems</i>	208
5 Representative Areas: Global to Ecoregional <i>Marine conservation at the ecosystem/habitat level</i>	100	11 Coastal Zones <i>Components, complexities and classifications</i>	230
6 Habitats and Communities: Ecoregional to Local <i>Reality, variability and scales of relationships</i>	119	12 High Seas and Deep Seas <i>Pelagic and benthic, hydrography and biogeography</i>	258
		13 Linking Fisheries Management with Marine Conservation Objectives through Ecosystem Approaches <i>Compatibility of exploitation and preservation</i>	281
		14 Size and Boundaries of Protected Areas <i>Rationale for function, location, dimensions</i>	298

15	Evaluation of Protected Areas <i>The concept of 'value' as applied to marine biodiversity</i>	326	18	Approaches to the Establishment of Marine Monitoring Programmes <i>Stabilizing the baselines</i>	393
16	Sets of Protected Areas <i>Integrating distinctive and representative protected areas</i>	343	19	Remaining Problems in Marine Conservation <i>Present problems, future solutions</i>	411
17	Networks of Protected Areas <i>Patterns of connectivity in the oceans</i>	370		<i>Index</i>	421
