SECTION 1

Introduction

The First Aider

SECTION 2

What is First Aid?

Definition of First Aid

The aims of First Aid

SECTION 3

First Aid in the Workplace

Health and Safety Acts and Regulations

First Aid at Work provision

First Aid containers and their contents

Accident and incident reporting

RIDDOR 1995

Key Task 1

SECTION 4

Responsibilities of the First Aider

Arrival at the scene

Dealing with casualties

Contacting the Emergency Services

Priorities of First Aid treatment

The clearing-up process

Casualty communication

SECTION 5

Action in an Emergency

Factors involved in an emergency

Possible hazards

Road traffic accidents

Electricity

Structural damage

Chemicals

Water

Fire

Section summary

SECTION 6

Primary Survey

Approaching the casualty

Checking for a response

Opening the airway

Checking for normal breathing

Is the casualty breathing normally?

SECTION 7

Secondary Assessment

6 Assessment of the casualty's condition 15

The top-to-toe survey 16

Management of the unresponsive casualty 17

The recovery position 17

6

6

SECTION 8

Breathing and Circulation

The breathing process 18

7

SECTION 9 Principles of Resuscitation

7

The principles of resuscitation 18

7

The basic life support action plan 19

8

Cardiopulmonary resuscitation 20

9

The chain of survival 21

9

Rescue breathing 21

Resuscitation and cross-infection 21

Resuscitation during pregnancy 22

Adult basic life support 22

9

Section summary 23

9

Key Task 2 23

10

10

SECTION 10

Disorders of Respiration/Airway Obstruction and Breathing Disorders

10

Disorders of respiration 24

Main causes of asphyxia 24

Hypoxia 24

11

Treatment 24

11

Airway obstruction and breathing disorders 24

11

Recognition 24

12

Choking 25

12

Recognition 25

12

Treatment for adults (partial) 25

12

Treatment for adults (full) 25

12

Smoke and fume inhalation 26

13

Recognition 26

Treatment 26

Drowning 27

Recognition 27

Treatment 27

14

Hyperventilation 27

14

Recognition 27

14

Treatment 27

14

Asthma 28

Recognition 28

Treatment 28

Section summary 28

Key Task 3 28

first aid *at work*

Contents

SECTION 11

Disorders of the Circulation

The circulatory system

The composition of blood

The pulse

Shock

Recognition

Treatment

Fainting

Recognition

Treatment

Heart attack

Recognition

Treatment

Angina

Recognition

Treatment

Anaphylactic shock

Recognition

Treatment

Section summary

SECTION 12

Wounds and Bleeding

Types of wound

Types of bleeding

Preventing cross-infection

Dressings and bandages

The treatment of minor external bleeding

The treatment of major external bleeding

Wounds with embedded foreign objects

The treatment of bleeding from the scalp

The treatment of bleeding from the hand

The treatment of bleeding from the ear

The treatment of bleeding from the nose

Penetrating chest wounds

Recognition

Treatment

Abdominal wounds

Recognition

Treatment

Amputations

Recognition

Treatment

Crush injuries

Eye injuries

Internal bleeding

Bleeding from the orifices

Treatment for internal bleeding

Section summary

Key Task 4

SECTION 13

Bites and Stings

29 Animal bites

29 Human bites

29 Insect stings

30 Marine creatures

30 Snake bites

SECTION 14

Disorders of Consciousness

30 The nervous system

31 Head injuries

31 Concussion

31 Cerebral compression

31 Fractured skull

31 Stroke

31 Epilepsy

32 Diabetes

32 Section summary

32 Key Task 5

SECTION 15

Foreign Objects

What is a foreign object?

32 Foreign object in the nose

33 Foreign object in the ear

33 Foreign object in the eye

33 Swallowed foreign objects

SECTION 16

Burns and Scalds

35 The causes of burns

35 The depths of burns

35 Assessing a burn

36 Burns that require immediate

36 hospital treatment

36 The treatment of burns and scalds

36 Burns to the airway

37 Electrical burns

37 Chemical burns

37 Chemical burns to the eye

37 Flash burns to the eye

37 Sunburn

Contents

SECTION 17

Bones, Joints and Muscle Injuries

The function of the skeleton and joints	51
The function of muscles, tendons and ligaments	51
Types of fractures	51
How fractures are caused	51
Recognition and treatment of open and closed fractures	51-52
Recognition and treatment of complicated fractures	52
The treatment of specific fractures	52
The application of a support sling	53
Spinal injuries	55
Causes and types of spinal injuries	55
Recognition and treatment of spinal injuries	56
Spinal injury recovery positions	56
Airway management for spinal injuries	56
Dislocations	57
Sprains and strains	57
RICE	57
The application of an elevated sling	58
Section summary	58
Key Task 6	58

SECTION 18

Poisoning

What is a poison?	59
How poisons enter the body	59
The general treatment of poisons	59
Household poisons	59
Industrial poisoning	59
Drug poisoning	60
Poisonous plants	60
Food poisoning	61
Alcohol poisoning	61
Section summary	61

SECTION 19

Effects of Heat and Cold

The control of body temperature	62
The effects of cold	62
Hypothermia	62
The effects of heat	63
Heat exhaustion	63
Heatstroke	63
Section summary	63

SECTION 20

Child and Infant Basic Life Support

Guidelines for child and infant resuscitation	64
CPR assessment children and infants	65
Infant resuscitation	65
Action for a choking child	66
Action for a choking infant	66
Key Task 7	67
Key Task Answers	68
