INTRODUCTION

1

1 STRUCTURE AND COMMUNICATION IN THE NERVOUS SYSTEM

7

Roadmap 8
Organisation of the Nervous System 9
Cells of the Nervous System 14
Building a Brain 20

2 DRUGS AND THE NERVOUS SYSTEM: PSYCHOPHARMACOLOGY

37

Roadmap 38
How Drugs are Handled by the Body:
Pharmacokinetics 39
Effects of Drugs on Neurotransmission:
Pharmacodynamics 43
Effects of Repeated Consumption of
Drugs 45
Use of Psychoactive Drugs 47
Alcohol 47
Stimulants 50
Opiates 53
Cannabis 54
Psychedelic Drugs 56

SPOTLIGHT 2A: INDIVIDUAL DIFFERENCES IN DRUG RESPONSES

65

Introduction 66
Individual Differences in Drug
Responding 66
Implications 68
Personality and Drug Responses 68
Stress and Drug Responses 69
Environmental Factors that
Affect Drug Responses 70
Drug Expectations and Placebo Effects 71
Conditioned Drug Responses 73

3 DEVELOPMENT, DEGENERATION AND RECOVERY IN THE NERVOUS SYSTEM

77

Roadmap 78
Development 79
Degeneration 87
Repair and Recovery 89

SPOTLIGHT 3A: BEHAVIOURAL GENETICS

95

Introduction 96
The Genetic Sequence 96

SPOTLIGHT 3B: NEURODEGENERATION

111

Introduction 112
Parkinson's Disease 112
Treatment for Parkinson's Disease 118
Alzheimer's Disease 122

4 THE IMPORTANCE OF EXPERIENCE: LEARNING AND MEMORY

131

Roadmap 132
What is Learning and Memory? 133
Principles of Learning: The Role
of Surprise 134
Unconscious Forms of Memory 139
Perceptual Memory 139
Associative Learning 144
Where in the Brain? Research Strategies 144
Encoding Long-Lasting Memories 147
Synaptic Plasticity and LTP 149
Procedural Memory 151
Conscious Forms of Learning and Memory 154
The Hippocampus and Memory 155
Systems-Level Consolidation 156

SPOTLIGHT 4A: MEMORY PERSISTENCE

163

Introduction 164
How are Memories Maintained? 164
Implications 168
How are Memories Kept Relevant
when Circumstances Change? 169
Do New Experiences Result in the
Creation of New Memories or the
Modification of Existing Ones? 174

5	SENSORY SYSTEMS	183
	Roadmap	184
	What do Sensory Systems Do?	185
	The Visual System	186
	The Pathway to the Visual Cortex	191
	The Visual Cortex	192
	The Auditory System	196
	The Auditory Cortex	201
	The Vestibular System	202
	Vestibular Interactions with Vision	203
	Somatosensation	203
	Proprioception	209
	Taste and Smell	210
	SPOTLIGHT 5A: RETINAL SPATIAL PROCESSING	217
	Introduction	218
	The Retinal Ganglion Cell Receptive Field	218
	Some Things the Retina Cannot Do	227
	Implications	227
6	MOTOR CONTROL	229
	Roadmap	230
	Muscles and their Innervation	230
	The Spinal Cord	232
	Cortical Control of Movements and Actions	234
	Primary Motor Cortex	236
	Secondary Motor Cortex	237
	Selecting the Appropriate Movement: The Role of the Basal Ganglia	238
	Planning: The Role of the Posterior Parietal Cortex	239
	Learning and Control: The Role of the Cerebellum	241
	SPOTLIGHT 6A: MIRROR NEURONS	245
	Introduction	246
	Mirror Neurons in Monkeys and People	246
	The Possible Functions of Human Mirror Neurons	248
	Social Behaviour and Autistic Spectrum Disorder (ASD)	251
	The Origin of Mirror Neurons	252
	Implications	253
7	EMOTIONAL BEHAVIOURS	255
	Roadmap	256
	What is Emotion?	257
	What is the Function of Emotions?	258
	What is the Relationship Between Emotional Responses and Feelings?	259
	What Brain Areas Mediate Emotions?	265
	The Amygdala	268
	Downstream From the Amygdala: The Periaqueductal Grey (PAG)	274
	Upstream from the Amygdala: The Prefrontal Cortex (PFC)	275
	How do we Communicate Emotions?	278
	SPOTLIGHT 7A: THE NEURAL BASIS OF FEAR	285
	Introduction	286
	Is Fear Processed Serially in the Amygdala?	286
	Which Area of the Prefrontal Cortex Regulates Fear?	294
	SPOTLIGHT 7B: TOO MUCH EMOTION? POST-TRAUMATIC STRESS DISORDER AND DRUG ADDICTION	303
	Introduction	304
	Post-Traumatic Stress Disorder	304
	Implications	310
	Do Excessively Strong Appetitive Memories Underlie Drug Addiction?	315
	Implications	319
8	MOTIVATED BEHAVIOURS	321
	Roadmap	322
	What are Motivated Behaviours?	323
	Motivational Concepts	324
	Incentive Motivation	325
	Eating	326
	Mechanisms of Nutrient Monitoring	334
	Obesity and Eating Disorders	338
	Anorexia and Bulimia	339
	Sleep	341
	The Biological Bases of Waking and Sleep States	345
	Circadian Influences on Sleep	350
	Homeostatic Influences on Sleep	352
	Emotional and Cognitive Influences on Sleep	352
	The Function of Sleep	353
	Sleep Disorders	354
	SPOTLIGHT 8A: SLEEP	357
	Introduction	358
	Sleep Deprivation: A Modern Problem?	358
	Implications	360
	Sleep and Health	360
	Critical Analysis	360
	Sleep and Mental Health	362
	Sleep and Cognitive Function	363
	Sleep and Learning and Memory	364
	Implications	367

SPOTLIGHT 8B: OBESITY

Introduction	370
Defining Obesity	370
Psychological Consequences of Obesity	371
Food Addiction	371
Types of Evidence	372
Implications	378

9 PSYCHOLOGICAL DISORDERS

Roadmap	382
What are Psychological Disorders?	383
Classification of Psychological Disorders	383
Schizophrenia	384
Interactions between Genes and Environment in Schizophrenia	388
Environmental Risk Factors	389
Pharmacological Studies	394

Evaluation of the Dopamine Hypothesis	396
Depression	398
Interactions between Genes and Environment in Depression	400
Anxiety	406

SPOTLIGHT 9A: SCHIZOPHRENIA **413**

Introduction	414
Cannabis Use and Schizophrenia	414
The Effectiveness of Antipsychotic Drugs	417
Implications	420
Beyond the Dopamine Hypothesis of Schizophrenia	421

Glossary	429
References	439
Index	481
