Learning Skills

PART I Foundations

Chapter 1 What Is Microbiology and Why Does It Matter?

HUMAN STORIES

Ivan Goes to Chicago...

It's for the Birds...

Special Delivery...

Hamburger Havoc...

Did You Wash Your Hands?...

The Hospital Can Be Dangerous...

THE RELEVANCE OF MICROBIOLOGY TO HEALTH CARE

Infectious Disease

Epidemiology

Pathogenesis

Host Defense

Treatment of Infectious Diseases

Chapter 2 Fundamental Chemistry for Microbiology

CHEMICAL BONDING

Ionic Bonds

Covalent Bonds

Hydrogen Bonds

WATER

ACIDS, BASES, AND pH

BIOLOGICAL MOLECULES

Carbohydrates

Lipids

Fats

Phospholipids and Glycolipids

Steroids

Proteins

Properties of Proteins

Protein Structure

Types of Protein

Nucleic Acids

Structure of Nucleic Acids

ATP

Chapter 3 Essentials of Metabolism

BASIC CONCEPTS OF METABOLISM

Oxidation and Reduction Reactions

Respiration

Metabolic Pathways

ENZYMES

Properties of Enzymes

L1	Coenzymes and Cofactors	35
	Enzyme Inhibition	36
1	Factors That Affect Enzyme Reactions	38
	CATABOLISM	38
3	Glycolysis	38
4	The Krebs Cycle	40
4	The Electron Transport Chain	40
4	Chemiosmosis	41
5	Looking at the Numbers	41
5	Fermentation	42
6	Homolactic Fermentation	42
7	Alcoholic Fermentation	43
8	ANABOLISM	43
9		
10	Chapter 4 An Introduction to Cell Structure and Host-Pathogen Relationships	47
10	CLASSIFICATION OF ORGANISMS	48
11	BACTERIA	48
	Size, Shape, and Multicell Arrangement	48
	Staining	50
15	The Gram Stain	51
16	The Negative (Capsule) Stain	52
16	The Flagella Stain	53
17	The Ziehl-Neelsen Acid-Fast Stain	53
18	The Endospore Stain	53
19	HOST-PATHOGEN RELATIONSHIPS	54
19	Pathogenicity: A Matter of Perspective	55
	Opportunistic Pathogens and Primary Pathogens	55
20	Disease and Transmissibility	55
20	BACTERIAL PATHOGENICITY AND VIRULENCE	56
21	Quorum Sensing	56
21	Biofilms	57
22		
23	THE HOST CELL	59
23	Prokaryotic Versus Eukaryotic Cell Structure	59
23	Plasma Membrane	60
24	The Role of the Plasma Membrane in Infection	62
24	Cytoplasm	62
25	The Role of the Cytoplasm in Infection	62
25	Cytoplasmic Structures Not Enclosed by a Membrane	62
27	Cytoskeleton	63
	The Role of the Cytoskeleton in Infection	63
31	Cilia	63
	The Role of Cilia in Infection	64
32	Flagella	64
32	Ribosomes	64
33	The Role of the Eukaryotic Ribosome in Infection	64
33	Cytoplasmic Structures Enclosed by a Membrane	65
34	Mitochondria	65
34	Endoplasmic Reticulum and Golgi Apparatus	65

The Role of the Endoplasmic Reticulum in Infection	66	Incidence and Prevalence	108
Lysosomes	66	Morbidity and Mortality Rates	108
The Role of the Lysosome in Infection	66	Herd Immunity	109
Proteasomes	66	Types of Epidemiological Study	110
The Role of the Proteasome in Infection	66	DIAGNOSING INFECTIONS	112
Peroxisomes	66	Growth-Based Diagnostics	112
Nucleus	66	Serology-Based Diagnostics	113
The Role of the Nucleus in Infection	67	Biotechnology and Health	113
Endocytosis and Exocytosis	67	Recombinant DNA Technology	115
The Role of Endocytosis and Exocytosis in Infection	69	Monoclonal Antibodies	116
PART II Disease Mechanisms	73	Serology-Based Diagnostic Methods	119
Chapter 5 Requirements for Infection	75	Precipitation	119
PORTALS OF ENTRY (GETTING IN)	76	Agglutination	120
Mucous Membranes	76	Immunoblotting	120
The Respiratory Tract	76	ELISA	121
The Gastrointestinal Tract	77	Diagnostic Methods Based on Nucleic Acids	121
The Genitourinary Tract	78	PCR	121
Skin	79	Hybridization	123
The Parenteral Route	80	Sequence Identification	123
ESTABLISHMENT (STAYING IN)	81	The Future Is Here: New Approaches and Opportunities	124
Increasing the Numbers	83	Chapter 7 Principles of Disease	131
AVOIDING, EVADING, OR COMPROMISING HOST DEFENSES (DEFEAT THE HOST'S DEFENSES)	83	THE RELATIONSHIP BETWEEN THE HUMAN HOST AND MICROORGANISMS	132
Capsule and Cell Wall (Passive) Protection Strategies	84	THE ETIOLOGY OF DISEASE	136
Enzyme (Active) Protection Strategies	84	DEVELOPMENT OF DISEASE	137
DAMAGING THE HOST	87	Communicable and Contagious Disease	138
Exotoxins	87	Duration of Disease	139
Anthrax Toxin	88	Persistent Bacterial Infections	139
Diphtheria Toxin	88	THE SCOPE OF INFECTIONS	142
Botulinum Toxin	89	Toxic Shock and Sepsis	142
Tetanus Toxin	90	Chapter 8 Emerging and Re-Emerging Infectious Diseases	147
Cholera Toxin	90	EMERGING INFECTIOUS DISEASES	148
Other Exotoxins	90	Environment and Infectious Disease	151
Endotoxins	91	Foodborne Infections	152
Viral Pathogenic Effects	93	Globalization and Transmission	153
Chapter 6 Transmission of Infection, the Compromised Host, Epidemiology, and Diagnosing Infections	97	Hurdles to Interspecies Transfer	154
TRANSMISSION OF INFECTION	98	Emerging Viral Diseases	154
Reservoirs of Pathogens	98	SARS (Severe Acute Respiratory Syndrome)	154
Mechanisms of Transmission	99	West Nile Fever	156
Contact Transmission	99	Dengue Fever	157
Vehicle Transmission	100	Viral Hemorrhagic Fever (VHF)	158
Vector Transmission	100	RE-EMERGING INFECTIOUS DISEASES	161
Factors Affecting Disease Transmission	102	Tuberculosis	161
Portals of Exit	102	Immune Status and Fitness of the Host	162
THE COMPROMISED HOST	102	Virulence/Fitness of the Pathogen	162
Neutropenia	103	Influenza	163
Organ Transplantation	104	AVIAN INFLUENZA	165
Burn Patients	104	PRIONS AND PRION DISEASES (TRANSMISSIBLE SPONGIFORM ENCEPHALOPATHY)	167
Opportunistic Infections	105	The Prion Hypothesis	167
Nosocomial Infections	105	The Biology of Prion Diseases	167
Universal Precautions	106	Creutzfeldt-Jakob Disease	168
Preventing and Controlling Nosocomial Infections	107	Variant CJD (vCJD)	169
EPIDEMIOLOGY	108	BIOTERRORISM	170

v DETAILED CONTENTS

Anthrax	172	Sulfur	218
Botulism	173	Phosphorus	218
Plague	173	Organic Growth Factors	219
Smallpox	175	Oxygen	219
Tularemia	176	Growth of Anaerobic Organisms	220
Viral Hemorrhagic Fevers	176	GROWTH MEDIA	222
The Danger of Bioweapons	177	Complex Media	222
Warning Signs	177	Chemically Defined Media	222
		Media as a Tool for Identifying Pathogens	224
PART III Characteristics of Disease-Causing Microorganisms	183	CHARACTERISTICS OF BACTERIAL GROWTH	226
Chapter 9 The Clinical Significance of Bacterial Anatomy	185	The Bacterial Growth Curve	227
THE BACTERIAL CELL WALL	186	Measurement of Bacterial Growth	228
Building the Cell Wall	187	CLINICAL IMPLICATIONS OF BACTERIAL GROWTH	229
The Cytoplasmic Phase	187	Specimen Collection	229
The Membrane-Associated Phase	187		
The Extracytoplasmic Phase	187	Chapter 11 Microbial Genetics and Infectious Disease	235
Additional Cell Wall Components	188	THE STRUCTURE OF DNA AND RNA	236
Wall Components in Gram-Positive Bacteria	189	Deoxyribonucleic Acid (DNA)	236
Wall Components in Gram-Negative Bacteria	189	Ribonucleic Acid (RNA)	238
Clinical Significance of the Bacterial Cell Wall	191	DNA REPLICATION	239
STRUCTURES OUTSIDE THE BACTERIAL CELL WALL	193	DNA Separation and Supercoiling	239
The Glycocalyx	193	DNA Polymerase	240
Clinical Significance of the Glycocalyx, Slime Layer, and Capsule	193	Proofreading By DNA Polymerase	241
Fimbriae and Pili	194	The Replication Fork	242
Clinical Significance of Fimbriae and Pili	194	Initiation and Termination of Replication	243
Axial Filaments	195	THE GENETIC CODE	244
Clinical Significance of Axial Filaments	196	GENE EXPRESSION	245
Flagella	196	Transcription	245
Structure of the Bacterial Flagellum	196	Translation	246
Flagellar Configurations	198	Messenger RNA in Translation	247
Clinical Significance of Flagella	198	Transfer RNA in Translation	247
Intracellular Movement	199	The Ribosome in Translation	248
STRUCTURES INSIDE THE BACTERIAL CELL WALL	199	Formation of Peptide Bonds in Translation	250
The Plasma Membrane	199	Translation Initiation	250
Structure of the Plasma Membrane	200	Translation Elongation	251
Energy Production	200	Translation Termination	251
Membrane Transport	201	REGULATION OF GENE EXPRESSION	252
Secretion	204	Induction	253
Clinical Significance of the Plasma Membrane	204	Repression	254
The Nuclear Region	205	MUTATION AND REPAIR OF DNA	256
Plasmids	205	Replication Errors	256
Clinical Significance of DNA and Plasmids	205	How DNA Damage Occurs	257
Ribosomes	206	Repair of DNA Damage	257
Clinical Significance of Ribosomes	206	TRANSFER OF GENETIC INFORMATION	259
Inclusion Bodies	206	Transposition	259
Endospores	206	Transformation	260
Clinical Significance of Sporogenesis	207	Transduction	260
		Conjugation	262
Chapter 10 Bacterial Growth	213	GENETICS AND PATHOGENICITY	265
REQUIREMENTS FOR BACTERIAL GROWTH	214		
Physical Requirements for Growth	214	Chapter 12 The Structure and Infection Cycle of Viruses	271
Temperature	214	VIRUS STRUCTURE	272
pH	216	The Virion	272
Osmotic Pressure	217	Viral Nomenclature	272
Chemical Requirements for Growth	218	The Capsid	273
Carbon	218		
Nitrogen	218		

Helical Viruses	273	VIRUSES AND CANCER	311
Icosahedral Viruses	274	Oncogenic Viruses	311
Complex Viruses	274	HOST DEFENSE AGAINST VIRAL INFECTION	312
Viral Envelopes	274		
Envelope Glycoproteins	275	Chapter 14 Parasitic and Fungal Infections	317
THE INFECTION CYCLE	275	PARASITES AND THEIR INFECTIONS	318
Attachment	276	Significance of Parasitic Infections	318
When Virus Meets Host	277	Protozoan Morphology and Pathogenesis	319
Receptor Binding	277	Helminth Morphology and Pathogenesis	320
Penetration and Uncoating	278	Life Cycles and Transmission Pathways of Protozoans and Helminths	321
Penetration and Uncoating by Non-enveloped Viruses	278	Parasites That Use a Single Host	321
Penetration and Uncoating by Enveloped Viruses	279	Parasites That Use Multiple Hosts	321
Cytoplasmic Transport of Viral Components	279	EXAMPLES OF PROTOZOAN INFECTIONS	323
Transport of the Viral Genome into the Nucleus	280	Malaria (<i>Plasmodium</i> species)	323
Biosynthesis	281	Toxoplasmosis (<i>Toxoplasma gondii</i>)	326
DNA Viruses—Replication	281	Amebiasis (<i>Entamoeba histolytica</i>)	327
DNA Viruses—Transcription	282	Trichomoniasis (<i>Trichomonas vaginalis</i>)	328
RNA Viruses—Replication and Transcription	283	Trypanosomiasis (<i>Trypanosoma</i> species)	329
Retroviral Transcription and Integration	284	EXAMPLES OF HELMINTHIC INFECTIONS	330
Viral Control of Translation	284	Intestinal Nematodes	330
Maturation	285	Enterobiasis	331
Intracellular Trafficking	285	Ascariasis	332
Assembly	287	Tissue Nematodes	333
Release	287	Trichinosis	333
Budding from the Plasma Membrane	288	Cestodes	334
SPREAD OF VIRUSES	289	Trematodes	335
		Paragonimiasis	335
Chapter 13 Viral Infection	293	Clonorchiasis	336
PATTERNS OF VIRAL INFECTION	294	Schistosomiasis	337
Acute Infections	295	FUNGAL INFECTIONS	338
Antigenic Variation	295	Fungal Structure and Growth	338
Persistent Infections	296	Yeasts and Molds	338
Chronic Infections	297	Dimorphism	340
Latent Infections	297	Fungal Infections	340
Slow Infections	298	Superficial Mycoses	340
DISSEMINATION AND TRANSMISSION OF VIRAL INFECTION	299	Cutaneous and Mucocutaneous Mycoses	341
Portals of Entry	299	Subcutaneous Mycoses	342
Respiratory Tract	299	Deep Mycoses	342
Gastrointestinal Tract	300	Pathogenesis of Fungal Infections	343
Genitourinary Tract	300	Adherence	343
Eyes	301	Invasion	343
Skin	301	Tissue Injury	344
Dissemination Pathways	301		
Bloodstream	302	PART IV Host Defense	349
Nervous System	303	Chapter 15 The Innate Immune Response	351
Internal Organs	303	BARRIER DEFENSES	352
Viral Transmission	304	Skin	352
Transmission via the Respiratory Tract	304	Mucous Membranes	353
Transmission via the Epidermis	305	The Lacrimal Apparatus	354
Transmission via Bodily Fluids	305	Saliva	354
Transmission via the Fecal–Oral Route	306	Epiglottis	354
Fetal Infection	306	Sebum	355
VIRULENCE	306	Perspiration	355
Virulence and Host Susceptibility	307	Gastric Juice	355
VACCINE DEVELOPMENT	307	Urine and Vaginal Secretions	355
Recombinant DNA Vaccines	310	Transferrins	355
Viral Culture	310	MOLECULES OF INNATE IMMUNITY	356

vi DETAILED CONTENTS

Toll-Like Receptors	357	The Immunoglobulin Molecule	397
Cytokines	357	Distribution and Function of Immunoglobulins	399
CELLS INVOLVED IN INNATE IMMUNITY	358	IgM	399
Neutrophils	358	IgG	399
Basophils	360	IgA	399
Eosinophils	361	IgE	400
Macrophages and Monocytes	361	IgD	401
Dendritic Cells	363	Timing of Immunoglobulin Release	401
Mast Cells	364	Antibody Activation of Immune Cells	401
Natural Killer Cells	365	B-Cell Activation and Cooperation with T Cells	402
THE FIVE MECHANISMS OF INNATE IMMUNITY	367	COURSE OF THE ADAPTIVE RESPONSE	403
Phagocytosis	367	IMMUNOLOGICAL MEMORY	404
Adherence	367	Natural and Artificial Immunity	405
Ingestion	368	OVERALL IMMUNE RESPONSE	406
Digestion	368		
Excretion	368	Chapter 17 Failures of the Immune Response	413
Avoiding Phagocytosis	369	IMMUNODEFICIENCIES CAUSED BY INFECTION	414
Inflammation	369	Acquired Immune Deficiency Syndrome	414
Vasodilation and Vascular Permeability	369	Cellular Targets of HIV	415
Phagocyte Migration	370	Modes of HIV Transmission	415
Acute-Phase Response	370	HIV Genome	416
Fever	371	Dynamics of HIV Replication in Infected Patients	416
The Complement System	372	Course of Infection	417
Activation of the Classical Pathway	372	Response to HIV Infection	418
Activation of the Alternative Pathway	372	Major Tissue Effects of HIV Infection	419
Activation of the Lectin-Binding Pathway	373	Other Infections	420
C3 and Beyond	374	PRIMARY IMMUNODEFICIENCY DISEASES	421
Evasion of the Complement System	375	B-Cell Defects	421
Interferon	375	T-Cell Defects	422
IFN- α and IFN- β	376	Defects in Accessory Cells	422
IFN- γ	376	AUTOIMMUNE DISEASE	424
Therapeutic Use of Interferon	376	Causes of Autoimmunity	424
GENETIC SUSCEPTIBILITY TO INFECTION	378	Mechanisms of Autoimmunity	425
Chapter 16 The Adaptive Immune Response	383	HYPERSENSITIVITY (ALLERGIC REACTIONS)	426
COMPONENTS OF ADAPTIVE IMMUNITY	384	Effector Mechanisms in Allergic Reactions	427
Strategic Lymphoid Structures	384	Phases of Allergic Reactions	428
Cells of the Adaptive Immune Response	386	Clinical Effects of Allergic Reactions	428
Dendritic Cells	386		
Lymphocytes	387	PART V Control and Treatment	433
DEVELOPMENT OF LYMPHOCYTE POPULATIONS	388	Chapter 18 Control of Microbial Growth With Disinfectants and Antiseptics	435
Clonal Selection of Lymphocytes	388	CONTROLLING MICROBIAL GROWTH	436
Survival of Lymphocyte Populations	389	TARGETS FOR DISINFECTANTS AND ANTISEPTICS	437
Lymphoid Tissues	390	The Cell Wall	437
ANTIGEN PRESENTATION	391	The Plasma Membrane	437
Class I MHC	392	Protein Structure and Function	438
Class II MHC	392	Nucleic Acids	439
T-Cell Response to Superantigens	392	MICROBIAL DEATH	439
CELLULAR (T CELL) RESPONSE	393	Factors That Affect the Rate of Microbial Death	439
Production of Activated Effector Helper T Cells	393	CHEMICAL METHODS FOR CONTROLLING MICROBIAL GROWTH	441
Activation by Dendritic Cells	393	The Potency of Disinfectants and Antiseptics	441
Activation by Macrophages	394	Evaluation of Disinfectants and Antiseptics	441
Activation by B Cells	394	The Phenol Coefficient	441
Functions of Activated Effector T Cells	394	The Disk Diffusion Method	442
Cytotoxic T Cells	394	The Use Dilution Method	442
Helper T Cells	395		
Regulatory T cells	396		
HUMORAL (B CELL) RESPONSE	396		

Selecting an Antimicrobial Agent	442	Antifungals That Affect the Cell Wall	477
Types of Chemical Agent	444	Antifungals That Affect Nucleic Acid Synthesis	478
Phenol and Phenolic Compounds	445	DRUGS FOR PARASITIC INFECTIONS	478
Alcohols	445	Anti-protozoan Drugs	478
Halogens	445	Antimalarials	478
Oxidizing Agents	446	Folate Agonists	479
Surfactants	446	Drugs for Anaerobic Protozoa	479
Heavy Metals	447	Drugs for <i>Trypanosoma</i> and <i>Leishmania</i>	480
Aldehydes	447	Anti-helminthic Drugs	480
Gaseous Agents	447		
PHYSICAL METHODS FOR CONTROLLING MICROBIAL GROWTH	448	Chapter 20 Antibiotic Resistance	485
Heat	448	DEVELOPMENT OF ANTIBIOTIC RESISTANCE	486
Moist Heat Methods	449	Bacterial Growth and Mutation Rates	486
Refrigeration, Freezing, and Freeze-Drying	451	Plasmids and Conjugation	486
Filtration	452	Inappropriate Clinical Use of Antibiotics	487
Osmotic Pressure	452	Use of Antibiotics in the Food Chain	488
Radiation	452	Immunocompromised Population	488
A Word About Hand Washing	454	Health Care Facilities	488
		Lifestyle	488
Chapter 19 Antibiotics and Antimicrobial Drugs	459	TIMELINE OF ANTIBIOTIC RESISTANCE	489
SOURCE OF ANTIBIOTICS	460	Susceptibility Testing	490
Antibiotics Are Part of Bacterial Self-Protection	460	MECHANISMS OF RESISTANCE	492
ANTIBIOTIC SPECTRA	461	Inactivation of Antibiotic	492
Antibiotic Structure	462	AmpC β -lactamase	492
ANTIBIOTIC TARGETS	465	Aminoglycoside-Inactivating Enzymes	493
The Bacterial Cell Wall	466	Efflux Pumping of Antibiotic	493
Penicillins	466	Mechanism of Efflux Pumps	494
Cephalosporins	466	Tetracycline Efflux Pumps	494
Carbapenems	467	Modification of Antibiotic Target	495
Monobactams	467	Penicillin-Binding Proteins	495
Glycopeptide Antibiotics	467	Modification of Target Ribosomes	495
Peptide Antibiotics Effective Against Mycobacteria	467	Alteration of a Metabolic Pathway	496
Polypeptide Antibiotics	468	CLINICALLY DANGEROUS RESISTANCE	496
The Bacterial Plasma Membrane	468	MRSA	496
Synthesis of Bacterial Proteins	469	VRES	498
Macrolides	469	<i>E. coli</i>	498
Tetracyclines	469	Re-emerging Diseases	498
Aminoglycosides	470	Superinfections	499
Bacterial Nucleic Acids	470	RESISTANCE TO ANTIVIRALS AND ANTIPARASITICS	500
Quinolones	471	Antiviral Resistance	500
Rifamycins	471	Parasitic Resistance	500
Bacterial Metabolism	471	HOPE FOR THE FUTURE — DEVELOPMENT OF NEW ANTIBIOTICS	501
ANTIVIRAL DRUGS	472	DNA and RNA Analysis	501
Nucleoside Analogs	474	Structural Analysis	501
Acyclovir	474	Auxiliary Targets	501
AZT	474	Automated Synthesis and Screening	502
Nucleotide Analogs	475	Virulence Factors	502
Non-nucleoside Inhibitors	475	Further Investigation of Known Antibiotic Compounds	502
Inhibiting Viral Assembly and Release	475	Testing of Antibiotics	502
Protease Inhibitors	475		
Neuraminidase Inhibitors	475		
Inhibiting Viral Uncoating	476		
Inhibiting Viral Entry	476	PART VI Microbial Infections	507
DRACO	476		
ANTIFUNGAL DRUGS	476	Chapter 21 Infections of the Respiratory System	509
Antifungals That Affect the Plasma Membrane	477	ANATOMY OF THE RESPIRATORY SYSTEM	510
Polyenes	477	PATHOGENS OF THE RESPIRATORY SYSTEM	510
Azoles	477	Bacteria That Infect the Respiratory System	512

BACTERIAL INFECTIONS OF THE UPPER RESPIRATORY TRACT	512	<i>Vibrio</i>	552
Otitis Media, Mastoiditis, and Sinusitis	512	<i>Campylobacter</i> Enteritis	553
Pharyngitis	512	<i>Helicobacter pylori</i>	554
Scarlet Fever	513	VIRAL INFECTIONS OF THE DIGESTIVE SYSTEM	555
Diphtheria	514	Rotavirus	556
VIRAL INFECTIONS OF THE UPPER RESPIRATORY TRACT	515	Norovirus	557
Rhinovirus Infection (the Common Cold)	515	Enterovirus	558
Parainfluenza	515	Hepatitis Viruses	558
BACTERIAL INFECTIONS OF THE LOWER RESPIRATORY TRACT	516	Hepatitis A	559
Bacterial Pneumonia	516	Hepatitis B	560
<i>Chlamydomphila</i> Pneumonia	518	Hepatitis C	561
<i>Mycoplasma</i> Pneumonia	518	Hepatitis D	562
Tuberculosis	519	Hepatitis E	562
Pertussis (Whooping Cough)	521	Hepatitis G	562
Inhalation Anthrax	522	PARASITIC INFECTIONS OF THE DIGESTIVE SYSTEM	563
<i>Legionella</i> Pneumonia (Legionnaires' Disease)	523	Giardiasis (<i>Giardia duodenalis</i>)	563
Q Fever	524	Cryptosporidiosis (<i>Cryptosporidium</i>)	564
Psittacosis (Ornithosis)	524	Whipworm (<i>Trichuris trichiura</i>)	565
VIRAL INFECTIONS OF THE LOWER RESPIRATORY TRACT	525	Hookworms	566
Influenza	525	Chapter 23 Infections of the Genitourinary System	571
Respiratory Syncytial Virus (RSV)	527	URINARY TRACT INFECTIONS	572
Hantavirus Pulmonary Syndrome (HPS)	528	BACTERIAL INFECTIONS OF THE URINARY SYSTEM	573
FUNGAL INFECTIONS OF THE RESPIRATORY SYSTEM	528	Pathogenesis of Bacterial UTIs	573
<i>Pneumocystis</i> Pneumonia (PCP)	529	Symptoms and Diagnosis of Bacterial UTIs	574
Blastomycosis	530	Urethritis and Cystitis	575
Histoplasmosis	530	Nephritis	575
Coccidioidomycosis	531	Prostatitis	575
Aspergillosis	532	Diagnosis	575
Chapter 22 Infections of the Digestive System	535	Treatment of Urinary System Bacterial Infections	575
CLINICAL SYMPTOMS AND EPIDEMIOLOGY	536	INFECTIONS OF THE REPRODUCTIVE SYSTEM	576
Watery Diarrhea	536	BACTERIAL INFECTIONS OF THE REPRODUCTIVE SYSTEM	577
Dysentery	536	Common Clinical Conditions Associated With STIs	578
Enteric Fever	536	Syphilis (<i>Treponema pallidum</i>)	579
Treatment and Management Options for Gastrointestinal Infections	536	Gonorrhea (<i>Neisseria gonorrhoeae</i>)	581
Endemic and Pandemic Gastrointestinal Infections	537	Non-gonococcal Urethritis (<i>Chlamydia trachomatis</i>)	583
Traveler's Diarrhea	537	VIRAL INFECTIONS OF THE GENITOURINARY SYSTEM	586
Nosocomial Infections	537	Herpes Simplex Virus Type 2	586
Food Poisoning	537	Human Papillomavirus	588
DENTAL AND PERIODONTAL INFECTIONS	540	FUNGAL INFECTIONS OF THE GENITOURINARY SYSTEM	589
Formation of Dental Plaque	540	Vaginal Candidiasis (<i>Candida albicans</i>)	589
Dental Caries	540	Chapter 24 Infections of the Central Nervous System	593
Gingivitis and Periodontitis	541	ANATOMY OF THE CENTRAL NERVOUS SYSTEM	594
Necrotizing Periodontal Disease	541	COMMON PATHOGENS AND ROUTES FOR INFECTIONS OF THE CNS	596
BACTERIAL INFECTIONS OF THE DIGESTIVE SYSTEM	542	General Treatment of Infections of the CNS	598
<i>Escherichia coli</i>	545	MENINGITIS	599
Enterotoxigenic <i>E. coli</i>	546	Bacterial Meningitis	599
Enteropathogenic <i>E. coli</i>	546	Viral Meningitis	600
Enterohemorrhagic <i>E. coli</i>	547	Chronic Meningitis	600
Treatment of all five forms of <i>E. coli</i> infection	547	Symptoms of Meningitis	600
<i>Shigella</i>	547	Diagnosis and Treatment of Meningitis	600
<i>Salmonella</i>	549	NON-MENINGITIS BACTERIAL INFECTIONS OF THE CNS	601
<i>Salmonella</i> Gastroenteritis	550		
Typhoid Fever	551		
General Treatment of <i>Salmonella</i> Infections	552		

Tetanus (<i>Clostridium tetani</i>)	601	Chapter 26 Infections of the Skin and Eyes	641
Botulism (<i>Clostridium botulinum</i>)	602	ANATOMY OF THE SKIN	642
VIRAL INFECTIONS OF THE CNS	603	BACTERIAL INFECTIONS OF THE SKIN	644
Rabies	603	Fasciitis	644
Polio	605	Erysipelas	645
Viral Encephalitis	606	Folliculitis	645
Persistent Viral Infections of the CNS	606	Acne	645
PRIONS	607	Impetigo	646
FUNGAL INFECTIONS OF THE CNS	609	Scalded Skin Syndrome	646
Cryptococcosis	609	Gas Gangrene (<i>Clostridium perfringens</i>)	647
PARASITIC INFECTIONS OF THE CNS	610	Cutaneous Anthrax	647
Primary Amebic Meningoencephalitis	610	VIRAL INFECTIONS OF THE SKIN	648
Chapter 25 Infections of the Blood and Lymph	615	Measles	648
CIRCULATING PATHOGENS	616	Rubella (German Measles)	649
Bacteremia	616	Smallpox (Variola)	649
Intravenous Line and Catheter Bacteremia	616	Chickenpox and Shingles	650
Sepsis and Septic Shock	618	Herpes Simplex Type 1	651
Intravascular Infections	618	Warts	652
Infectious Endocarditis	618	FUNGAL INFECTIONS OF THE SKIN	653
